Then help them to hear the clear voice of the Lord calling for prophets, who by lip and life shall speak the adequate word for our troubled time.

There are a hundred possible wrong ways of considering this great Lesson of Ezekiel, God's watchman on the walls of Judah; but the worst way of all is to deal with it merely as a historical incident dated in the sixth century before Christ, and located in the neighborhood of old Babylon, in Mesopotamia, down near the present city of Bagdad. If the story does not mean something, and mean it tremendously, to this year of our Lord, 1922, it does not mean anything worth bothering about. The Divine call to Ezekiel is a divine call to ardent young manhood and womanhood in the here and now to serve God and our own nation and generation. Without reading much of it, I have had a suspicion that the present vogue of South Sea Island literature was simply because of its sheer sex appeal. Recently, a travel-acquaintance who is one of the most popular of continental European authors, sent me an English translation of his latest book, a South Sea Island story I read it through-and then felt as if I needed to be put through a disinfecting process, like à Chinese or Russion famine refugee. "Fight those film-coats on your teeth"

Leading dentists, nearly all the world over, now urge a new method of teeth cleaning. Millions of people already employ it. You see the results everywhere today, in whiter, cleaner teeth.

This is for those who don't know it as yet. We offer a ten-day test. You will then see the unique results and decide what they mean to you.

The war on film

One great object is to fight the film on teeth. You can feel it now-a viscous film. It clings to teeth, gets between the teeth and stays. And it forms the basis for dingy, dangerous coats.

Ordinary tooth pastes do not effectively combat it. So millions of teeth brushed daily still discolor and decay.

Film absorbs stains, making white teeth cloudy. Film is the basis of tartar. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Film constantly breeds germs. They, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film.

How to fight it daily

Dental science has now found two effective film combatants. Able authorities have proved them by many careful

A new tooth paste has been perfected, to comply with five modern requirements. The name is Pepsodent. These two great film combatants are embodied in it.
