Dangerous For "Hello Girls"

Escaped Damage.
The R. M. C. grounds and buildings escaped any serious damage during the heavy storm of Wednesday night. The college is very much exposed to the fury of storms sweeping over the lake, and in a storm of some months ago considerable damage was suffered.

Doesn't Look the Same.
The old Brock street church building which was turned into a garage when it was sold some years ago, is more and more losing its old appearance. This summer the high steps which ran up to the east door have been taken down, and the building looks quite changed.

Went on the Trip.
The steamer Wolfe Island took a large crowd on its trip to the foot of the island on Thursday afternoon. There were a number of American excursionists in the city from Alexandria Bay, two large motor boats, the 216 Y and 1467 Y, bringing up the parties.

Visiting in King*ton.

Man favorable comments have been heard about the splendid garden at the C. P. R. station on Ontario street. Officials of the railway who have seen it declare that it is one of the finest on the system and photographs of it have been taken for the railway magazines.

Their Sleep Disturbed.
Residents on Montreal street near Charles street are complaining of the actions of an outside bill poster who started work at 4.30 Thursday morning and made considerable noise wakening the residents. One resident says that when he spoke to the disturber he was "told off" in no uncertain language. The people are quite indignant and state that they will report the matter to the police.

Capable of Verification.
C. D. Cramer, cheese maker and owner of the Elginburg factory, states that his recent proof of the value of the dairy standards act is capable of verification by all other factories. Referring to statements that was not in the interest of the dairy industry Mr. Cramer states positively that it is and every farm-

er will realize this the longer the act is enforced. Many farmers at first hostile are now advocates of the act in which they see a marked advance in the quality and quantity of cheese, and, what is also of equal importance, a steady improvement in production and an incentive to build up the dairy herd to where it ought to be.
