ASK SERVICE EXTENSION IF RATES ARE INCREASED

Opinions Expressed About the Request of Street Railway Company.

The proposal to carry out the permanent pavement on King street is causing a great deal of comment, not because there is found to be any objection to the work, but because the street railway company has asked permission to increase the fare rates. Many citizens think the proposal of the company should be regarded as an opportunity for negotiating an extension of the service, and in the event of such extension they would be perfectly willing to see some increase in the rates.

One suggestion being put forward is that the railway run a loop from Montreal street up Pine street past the fair grounds to Alfred street connecting with the main line at Princess street. Residents of that area have long complained of the lack of street car service, and there is a large population in the north side of the city west of Montreal street.

Aldermen representing Frontenac and Rideau wards will be asked by the rate-payers to support the suggestion for an extension of the service as consideration for an increase in the rates asked for by the company.

The people residing in Rideau and Frontenac wards have to walk to and from their work, because there is no car service, and they would quickly learn to ride if a loop were placed on Pine street. Moreover, the company would derive financial benefit. Residents who desire to go to the waterfront now have to walk nearly a mile to the car line, and this is a discouragement.

Members of the city council are accumulating information on this subject.

When the company consented to make a capital expenditure for the new tracks for the permanent pavement on Brock and Ontario streets to William street, it was realized that some limit to the demands should be set and the company's consent was conditional upon there being no further demand made within a period of three years. Nobody is making any demand except the residents of King street, and except for the direct improvement they receive, there is no advantage gained by the rest of the city. The suggestion has been made to charge up the cost to those property owners to be paid for as under the local improvement law.

The railway company feel that in making heavy expenditures they have a right to some means of improving their revenue and a slight increase in the fare rates is the only method by which this can be done. According to figures quoted by H. C. Nickle, superintendent of the company, nearly all cities are paying higher fares than Kingston, so that he expected, sooner or later, to seek permission to increase the fares up to the limit within the power of the municipality.

PRESIDENT WALLACE GIVEN A FREE HAND

To Negotiate Terms of Sale of the Canadian Locomotive Works.

The Financial Post, Toronto, has the following:

"According to advices from Kingston the board of directors of the Canadian Locomotive Company has given to President Wallace a free hand to negotiate terms of sale with an American corporation, he to submit a definite offer as soon as this can be obtained.

"The Financial Post understands that overtures for the purchase of the plant of the Canadian Locomotive have been made by the Baldwin Locomotive Company. It is said that a tentative offer on the basis of \$90 per share has been made but that some of the big shareholders are holding out for a higher price."

The annual meeting of the company is to be held about the 8th of September, and it is thought that there will then be an announcement.

CHINESE PICNIC.

In Connection with Sydenham Street Methodist Sunday School.

The Chinese department of Sydenham street Sunday school held a very successful picnic at Kingston Mills Friday evening. The party of sixty left the city in cars at five o'clock and on arrival at the picnic grounds, races and sports were held and a splendid supper partaken of. About twenty of the Chinese pupils of the department were present and had a very pleasant time. The remainder of the party consisted of the teachers of the department, and Rev. Prof. Johnston, who is acting minister of the church, C. S. Anglin, superintendent of the school, and R. H. Ward, superintendent of the Chinese department. There were also a number of other friends of the school present.

KINGSTON AN IDEAL PLACE

For the Holding of the University's Summer School Sessions.

The fact that Queen summer school made a twenty-five per cent. increase in attendance this year speaks well for the university, which is thus advancing one of its branches which was formerly not considered very important but is now becoming one of the most valuable to the university and also for the situation of Kingston as a vacation city. The students who come from all parts of the country appreciate the opportunity given them at Queen's that they may advance themselves there educationally and not "stagnate," as it were. Besides the fact that the local university provides probably the best and most advanced summer courses of any university, the situation of Kingston is also another factor in drawing the ever increasing crowd of students to the school. The city is admirably suited for biological and geological study and having easy access many splendid places, as at Belle Isle, Barrieffield, Cataraqui cemetery, where a splendid collection of trees are to be found, and near Collis's Bay for the study of peat.

Kingston's lakeshore situation is also appreciated by the teacher students, particularly those of the western provinces and the lake for bathing is a great attraction for those who do not have this privilege. Basking is also a feature of the vacation devoted to study.

Under the heading "Queen's an Ideal Place for Summer" the Bulletin of the Queen's Summer School Association (the students organization) states:

"No university in Canada has geographical surroundings which appeal to the summer students as do those of Queen's. The spirit of the Queen's staff and students is such that every one of these natural advantages is utilized to the full to make the social and sporting life of the summer student an unbounded success. The staff has arranged every summer a series of field excursions for all the science courses and the students enjoy this out door study is one of the most fascinating parts of the great Laurentians."

Mr. and Mrs. W. Johnson, Tamworth, have taken possession of the property recently purchased from H. Walker, Milford.

The honest man never has to waste much time telling about his honesty. The other kind hires a publicity agent.

Downing Down Cherry Valley—Hats Off to Wellington.

Belleville Ontario.

"Cherry Valley, speed limit fifteen miles per hour," is the sign which confronts motorists touring Prince Edward county as they glide down into the charming valley of the cherries with its smiling orchards and quaint and comfortable homes nestling in the wide spaces, for Cherry Valleyites are real outdoor people and require plenty of living room. The command to slow down to fifteen miles an hour is not so much a command as a privilege conferred upon motorists who otherwise might hurry right through Cherry Valley and not see half its beauties. Five miles an hour is plenty speed in passing through Cherry Valley and to make the visit more pleasant stop and have a chat with the Oldest Inhabitant and the Youngest Citizen as they amuse each other on the lawn of one of the first families.

Wellington, on the shore of Lake Ontario, in Prince Edward County, is one of the prettiest villages in Canada. So prettily is it situated and so neatly is it kept by its proud citizens that many summer visitors come every year and enjoy the peace and quiet, lovely scenery and healthful breezes. Wellington is also in the forefront of modern educational progress with a new Consolidated School, one of the finest of this new type of educational development. The new school building is nearing completion and will house pupils from several school sections covering a wide area giving them better teachers and better conditions for study than would be possible. Hats off to Wellington-by-the-Lake.

Our alarms are much more numerous than our dangers, and we suffer much oftener in apprehension than in reality. A man who is always well-satisfied with himself is seldom so with others, and others are as little pleased with him.
