KINGSTON'S NEW INDUSTRY WAS WARMLY ENDORSED

At Meeting of Board of Trade Tuesday Night—Sum of \$3,000 Subscribed.

The new industry, known as Stanley and Aylward, Limited, manufacturers of Norman Silverware, recommended by the joint industries committee of the city council and Board of Trade, was heartily endorsed at a meeting of the Board of Trade on Tuesday evening when good progress was made toward the subscription of the remaining new capital of \$3,000, by the members present. The following committee was appointed to secure the remainder today: H. C. Nickle, J. M. Campbell, B. N. Steacy, R. H. Ward, C. S. Anglin, J. Donnelly, H. E. Richardson, J. C. D. D'Estere, J. F. Sowards, W. H. Craig, G. Barndon.

The decisive action of the meeting was the result of a report presented on the financial position of the company as a going concern by R. E. Burns, chartered accountant, and addresses by Messrs. Aylward and Ball, directors of the company, following which a motion by Mr. D'Estere, seconded by J. M. Campbell, was passed endorsing the proposition.

Elmer Davis, president, and in opening the meeting, which was called for the purpose of hearing detailed reports upon the proposal, introduced Mr. Burns who dealt in a thorough manner with the prospectus setting forth of the financial condition of the company, the volume of business done and the immediate prospects of success. He pronounced the business as in a sound condition and one that might be recommended as a safe proposition.

Mr. Aylward told of the organization of the company in 1903 as wholesale dealers in jewellery. During the war new lines were taken up to meet the demands, but in 1919 it was formed into a joint stock company for the manufacture of silverware. He showed a rapid increase in production and sales. In the first six months of the present year sales amounted to \$25,000 and provided production can be started immediately at the new plant proposed for Kingston, the fall trade will reach \$65,000. It is proposed to add to the present high grade lines, the sterling silver goods, including knives, forks and spoons, that will run up to an annual production of \$300,000. The domestic trade runs into \$2,000,000 annually of goods that the company will be able to make.

To Fix Cost of Production.
 Taking up the reasons for locating the plant in Kingston Mr. Aylward showed that it was most essential that the company should endeavor to fix production costs, and in a large city like Toronto it was practically impossible to do this and meet the competition in the trade. Small cities offer the best advantages for an industry of this kind because of living conditions, for production cost is everything. It is a mathematical problem entirely. Mr. Ball, head of the manufacturing department, supported what Mr. Aylward said on this point. The company was negotiating for a location in the province of Quebec, when their attention was directed to Kingston through a local jeweller who was instrumental in initiating the negotiations with the city industries committee. Mr. Ball has been all his life engaged in the manufacture of silverware.

Ald. Peters, chairman of the industries committee, said that the committee was able to give the company its fullest recommendation and he hoped that the people of Kingston would get behind them.

Dr. Sands, industrial commissioner, outlined the negotiations leading up to an agreement by which the company would take over the two upper floors of the cereal building. It was the first industry to receive such a whole-hearted reception. The firm is not coming here asking the city for anything. They are accepting the building and paying six per cent. carrying charges. They have made a new issue of \$30,000 preferred stock of which \$10,000 has already been subscribed by the jewellery trade leaving \$20,000 to be taken up by the citizens of Kingston. He never had a proposition carrying the recommendation this company has. The investment bears eight per cent. running up to twelve per cent.

Meeting Endorses Company.
 J. C. D. D'Estere moved that the meeting endorse the proposition and upon the motion being seconded by J. M. Campbell, Elmer Davis said: "This thing appeals to me as a substantial industry. The investment is good and as safe as anything can be. The terms of the stock offered are liberal, and a pretty good paying proposition." In addition to the subscriptions of \$10,000 announced a further sum of \$3,000 was subscribed by the members present, after which the committee was appointed to raise the balance today. Two new directors will be elected by the Kingston shareholders when this has been done, and upon receipt of the new charter the company will move the plant to Kingston without delay in order to start production in time for the autumn trade.

Representatives of railways, western labor commissioners and grain interests stated at Winnipeg that forty-one thousand harvesters were required to handle the crop.

At Spokane, Wash., burglars broke open eighty vaults on six floors of the Paulsen building and stole in excess of \$100,000.

CALUMET ISLAND ON THE MARKET

All Holdings of the Emery Estate at River Are For Sale.

Watertown, N. Y., Times.
 "Is Calumet Island for sale? All of the real estate of the Charles G. Emery estate is for sale. Let anyone come forward with a fair offer and evidence that he has the money to back it up and see," said Senator Henry G. Schackno, New York, one of the attorneys for his law partner, Lucien Udin, the sole executor and trustee of the Emery estate, in an interview with the Times.

"We haven't fixed any price for the property," said Senator Schackno. "All we want is a reasonable amount. I think we would sell it now for about what it is assessed at."

Senator Schackno was here in the matter of the fifth judicial settlement of the account of Lucien Udin as sole executor and trustee and while here paid a visit to his friend, Senator Fred B. Pitche, who is special guardian for Charles Mortimer Henderson and Francena Henderson, heirs of Charles Goodwin Emery. Other appearances are Attorney Melvin F. Kinkley of this city, special guardian for Frank Emery Grant, Joseph Emery Grant and Margaret Emery, Attorneys White & Case for Mabel E. Tracy and Francena E. Robinson and Attorney Henry Escher for Francena Tracy and Emery Tracey. The accounting was made before Judge Joseph Atwell of surrogate's court and at the conclusion of the proceeding Senator Schackno left for Clayton to inspect the Emery properties, which consist of about forty or fifty different parcels.

Upon Calumet Island is the brownstone castle that Charles G. Emery, the cigarette king, built for his summer home many years ago at a cost of several hundred thousand dollars. This is one of the finest places in the Thousand Islands region and is for sale, according to the statement of Senator Schackno. Likewise there is for sale the extensive Emery holdings on Round Island, near Clayton, the site of the Frontenac Hotel, which up to the time that it burned was the finest summer hotel in that region.

These properties together with the others in the Emery estate in the same location were appraised at \$3,452,198.55.

Although there have been several reports in the past of negotiations for the purchase of the Emery property there are no negotiations under way at the present time it was learned from Senator Schackno.

Calumet Island and Round Island, both of which are near Clayton, stand at the upper end of the summer resort section of the Thousand Islands and are about nine miles from Hart Island and the George C. properties, which were recently purchased by E. J. Noble, head of the Mint Products company of Port Chester and A. Graham Miles, son-in-law of Mr. Boldt.

There has long been talk of New York interests purchasing the Round Island property and building a mammoth summer hotel on the site of the Frontenac.

HE SHOWED HEROISM.
 Frank Stanton Burned in Rescuing a Little Child.
 A bit of burning paper, blown from a bonfire near her home, set fire to the dress of Ardelle Hatcher, eight years old, 6128 Beechwood avenue, and fatally burned her Sunday afternoon. She was rushed to Providence Hospital, where she died. Frank Stanton, who lives upstairs in the same house, suffered severe burns on his hands and arms in an attempt to save Ardelle's life. Ardelle was walking past a vacant lot next to her home when the piece of paper blew from the bonfire against her dress. Crying for "Mamma," she started to run for the house. The wind, when she ran, fanned the flames, and she was a sheet of fire when her mother rushed from the back door to aid Mrs. Hatcher wrapped a rug around the burning girl and called Mr. Stanton. Seeing that the rug was not smothering the fire, Stanton clasped Ardelle in his arms and smothered the flames—Detroit Free Press.

Frank Stanton is a Picton boy, son of Mrs. Sidney Stanton, Elizabeth street, and son-in-law of Capt. and Mrs. M. Hefferman, Bridge street, Picton.

ACIDS IN STOMACH CAUSE INDIGESTION

Create Gas, Sourness and Pain How to Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bismarated Magnesia and take a teaspoonful in a quarter glass of water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.
