THE LATEST CROP REPORT

Information That Reached Bank of Montreal Headquarters.

Montreal, Aug. 10.—Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned.

General.
Conditions generally are favourable in Eastern and Prairie Provinces, but in British Columbia drought conditions still obtain.

Prairie Provinces.
Edmonton district—Wheat crop has suffered severely from drought. Oats a short crop and hay poor. Recent local showers have slightly improved feed situation but more rain is needed; harvesting is commencing this week. Calgary district—Showers and warm weather have hastened maturity of grains. Cutting has commenced. Conditions in northern section are poor to fair. Good average crop is probable in south. Lethbridge district—Crops are making good progress and are reported to be filling well. Rye harvesting is general. Wheat cutting has commenced. Extreme heat has lowered yield in Bow Island and Medicine Hat localities and crops are poor. Saskatchewan district—Heavy general rains have helped late grains. Wheat cutting has commenced and will be general by 15th instant. Yield Saskatchewan and west will be below average. Prince Albert, Tisdale, Humboldt and tributary localities report good average crop in sight. Regina district—Extreme heat has been experienced recently, relieved by general rains. Average yield of all grains expected. Wheat cutting will be general 20th instant. Winnipeg district—Heavy rain has delayed harvesting but will be beneficial to late sown grain. A better than average crop is assured.

Province of Quebec.
Cereal crops are looking well and with warm weather from now on should produce a good yield. Hay has all been harvested and, generally speaking, the crop is heavier than usual. Root crops are doing well. Grass pasture continues in good condition.

Province of Ontario.
Prospects are still generally favourable, although warm, dry weather is needed for all crops. Heavy rains during the last few days have delayed harvesting. Fall wheat crop is above average and is mostly harvested. Barley and rye are cut and are good crops. Oats are a heavy crop with long straw. Rust is threatening in some districts. Cutting has commenced. Corn, more heat needed for an average crop. Roots promise to be above average. Hay indicates that second crop will be heavy. Fruit is a good crop. Weather conditions are good for pasture.

Maritime Provinces.
Prospects continue favourable throughout Maritime Provinces for good hay and grain crops. Prince Edward Island anticipates best all round crops in years. Reports indicate potatoes are suffering in St. John Valley District and yield will be below average. Root crops in other districts are doing fairly well. Apples are progressing favourably in Annapolis Valley. Weather has been unfavourable for harvesting in Nova Scotia, and New Brunswick.

Province of British Columbia.
Serious drought conditions still obtaining. Hay crop harvested is 50 to 60 per cent. of normal. Grain cutting is general and crop is 60 to 70 per cent. of average. Roots are suffering but crop of Asperott potatoes above average. Hops are 95 per cent. of normal. Okanagan apples are 80 per cent. of normal and are sizing up well. Tomatoes are in good condition. Fraser Valley tree fruits are 90 to 95 per cent. of normal and crops are of fine quality. Pasture is burnt and livestock prospects are poor. Forest fires continue. Telegram received to-day states rain falling steadily in Vancouver and vicinity and appears to be general.
