BY LIEUT. JOHN R. IRWIN INSTRUCTOR U. S. AIR SERVICE

ELIMINATION OF ANTENNA RESISTANCE.

Mr. H. H. Beverage, research engineer, Radio Corporation of America, writing in a publication issued by his company, reveals

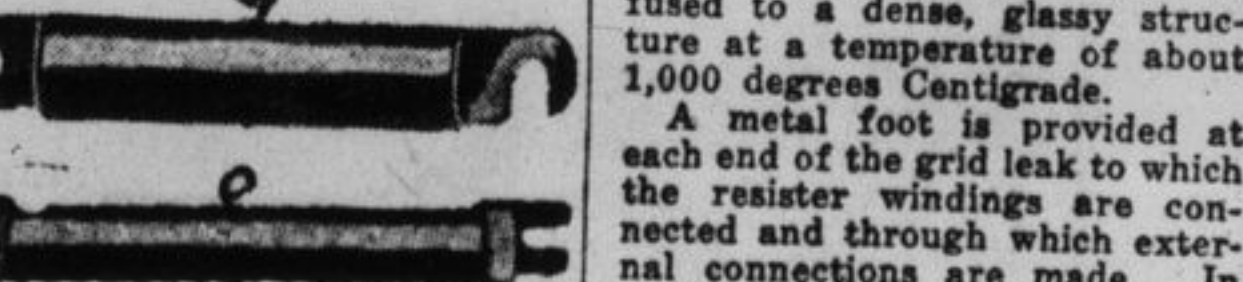

several hundred feet of wire into it showed an antenna resistance of 60 to 70 ohms at wave lengths of 200 to 300 meters. This high resistance was undoubtedly caused by the antenna flux being forced to travel a considerable distance through very high resistance soil before reaching the low resistance ground wires in the pond.

APPARATUS AND DEVICES

By RALPH BROWN, RADIO ENGINEER

TRANSMITTING GRID LEAKS.

The purpose of these grid leaks is to limit the potential accumulating on the grid of an oscillating tube, and thus govern the output to the antenna, and

extreme temperature changes without becoming cracked, weakened or in any way injured. After being wound upon this compound it is embedded in a blue vitreous enamel which is fused to a dense, glassy structure at a temperature of about 1,000 degrees Centigrade.

Mr. and Mrs. McMann and Miss Lulu spent Sunday at Sydenham. Mrs. Vincent and family returned to England on Tuesday. Eileen Marshall, Lansdowne, is visiting at the home of W. E. Cooper. N. E. Brown has

The Man Who Brings the Message of Life Insurance is the True Friend of Us All

You know something of the work of the Life Insurance Man, but do you appreciate that if it were not for his efforts, the homes of Canada would be without the protection of three-and-a-half billion dollars of life insurance?

He is, by his daily work, "holding the bridge" against trial and distress for millions of wives and children, or providing "old age comfort" for many who would otherwise be in want.

Moved by a vision of the good to be accomplished, the Life Insurance Man has faced his problems with optimism, and now sees over a million dollars paid out each week by the Life Insurance Companies in Canada to the beneficiaries of his labor.

Life Insurance Representatives are the great ambassadors to your home. They will be pleased to show you how simply and easily you can throw the "mantle of protection" around it.

In Toronto this week the Life Insurance Representatives on this Continent are meeting for the purpose of further increasing their power to serve the public. Life Insurance Service extends greetings from all who are engaged in this great cause, and also on behalf of the policyholders throughout the Dominion of Canada.
