Why It Saves Coal-

The Hecla Pipeless Furnace has all the big features of the famous Hecla Furnace.

(1) It has the STEEL-RIBBED Firepot.
This invention gives the Hecla three times the radiating surface of the ordinary furnace.
That means more heat—less fuel. At least

(2) It has the big CIRCULAR Waterpan that keeps the air mellow. You feel warmer at 65 degrees when the air is moist than at 70 degrees when the air is dry. Hecla warmth is healthful and economical.

(3) The Register of the Hecla Pipeless is scientifically planned. It is the right size for the heating capacity. The cold air balances the warm air. No heat is lost in

THESE savings are considerable. Owners of Hecla Pipeless furnaces claim they save from 25 to 50 per cent. An every-year economy good for the rest of your lifetime.

Patented FUSED JOINTS make this system proof against leaks of gas or dust.

We can install in any home IN ONE DAY. No muss or fuss. No cutting up of walls. Only a small cellar needed.

Let Us Give You an Estimate LEMMON & SONS

AGENTS 187 PRINCESS STREET KINGSTON a whole the average length of life MODERN SYSTEM turies. In the United States the annual death rate has decreased in thirty years from 20 per thousand to about 10 per thousand. The average duration of life to-day is about 56 years as compared with 40 years

In some sections of the country the length of life is even greater. In Kansas, for example, it may be How expected that a baby born in that state will live to be about 60 years old. The expectation of life in the larger cities is 53 years.

According to the Department of Health of New York City, the death rate in that city has decreased from about 20 per thousand in 1901 to approximately 13 per thousand in 1920. The death rate of babies un- Tailored by Specialists, and a Perder one year of age has decreased from 173 per thousand in 1901 to 85 per thousand in 1920.

To indicate even more strikingly the enormous saving of life, it is rate had increased to only 73,249, he would be inundated with orders. It was also significant that largely ment districts is no greater than it out for eighteen years. is among those living in the better sections of the city.

death rate ever recorded in United alone of \$500,000 a year. States and Canada. This company insu: ed attained the low rate of 5.54 per thousand lives. This is 13.7 per cent lower than the 1920 death rate which marked the minimum record

actual saving of life is best shown by the fact that, if the 1920 death rate had prevailed in this particular group, 18,661 more persons would rate had prevailed, 54,942 more deaths would have occurred.

The decline in the death rate !r 1921 was accomplished largely iu the reduction in death from tuber-The tuberculosis death rate in is 16.5 per cent lower than that for 1020 and 48.8 per cent. below the rate for 1911. Thus, in a period eleven years, mortality from tuberculosis has been cut almost in half This in itself is an almost unparalleled accomplishment in the history of public health. But more amazing still is the fact that the decline is continuing at an increased rate

from year to year. At no time in 1921 did influenza attain epidemic prevalence. In each of the three preceding years it was one of the chief mortality factors In 1921 it resumed its former status as a minor cause of death. Pneumonia, which always has a high death rate also registered a great reduction. The death rate of these two 'auses combined, in 1921, wa. iess than one half the figure for 1920 and was 43 per cent. lower than that for 1911 when conditions, with the larger department of stock with reference to influenza and goods, but is rather a useful reinforcepre monia, were normal.

one 'fird in the death rate during uniformity of quality, its same price the past eleven years which the past eleven years, which a guarantee.

desth rate of working men between 35 and 44 is approximately 50 per cent. higher than it is among male: of all classes throughout the coun

In general, however, the situation with reference to the length of life is extremely gratifying. It indicates that the people as a whole are living more sanely and that the general moral tendency is upward rather than downward, as many pessin

The requirements of this day generation are such that men to live longer in order to make most of life. So much time is quired in getting ready for one's work.
