DO YOUR WINTER REPAIRING SOON

Automobiles Should Be Put in Shape Before Severe Weather Has Chance at Them.

During the summer months there is not much out of the ordinary to bother motor car owners and drivers. Occasionally there is danger of overheating, the radiator, must be watched closely, and tires must not be left exposed to the full rays of the sun too long, but generally speaking it is a good season for the motor cars.

But there is one thing that should be done before putting the car to the test of the cold weather. It should be thoroughly overhauled after the long and heavy driving of the summer and put into such shape that it will be proof against the most severe tests that winter can place upon it.

Give your car a chance. Have it overhauled before you start your late fall and winter driving. Let Warren & Williams, experts on overhauling, 110 Clergy street, just a few doors from Princess, look over the engine and working parts and give you an opinion. For appointments, telephone 275.

NEW VIOLIN SCHOOL. Local Musical Academy Puts Out Much Improved Violin System.

The Telgmann Tetarchoed (Half-scale) Semitone System, Violin Method, based on the natural law of harmonics, and equal temperament, as adopted by the schools, is being published for use in schools and private tuition.

LOYAL SON OF CANADA. TEACHING AUSTRALIANS ABOUT HIS NATIVE LAND.

Frank Coffee Began Life in Guelph, Ont. But Has Now Become a Leading Publisher in Our Sister Dominion in the Southern Pacific. He Has Written Interesting Facts About Land of His Birth.

One of the leading publishers of Australia is Frank Coffee, a Canadian who began his life in Guelph. In addition to handling books, Frank Coffee writes them, and he has published an interesting volume of travel which bears the title "Forty Years on the Pacific."

FOR YOUR PARTIES GET PUREST CREAM

Masoud's Will Be Busy Filling a Keen Demand This Winter.

The season for dances and parties is approaching and up at the Masoud plant on Princess street they are making preparations for the big fall rush. The excellency of the service and the products turned out by the Masoud factory have spread afar, so that, when there is need of ice-cream, candies or pastry for any entertainment or social gathering, those in charge have a habit of ringing up Masoud's and solving all their problems in a minute.

Masoud's ice-cream plant, unlike those of most manufacturers of the frozen delicacy, is almost as busy during the winter months as in the summer. There are so many social functions demanding the products of this factory that the men and the machinery keep going at top speed all the time filling orders and making up orders for dates ahead.

These are but a few of the reasons why Masoud's products and Masoud's service are daily growing to an even greater extent than they have been in the past—and that has been some extent.

BE CAREFUL. Concerning Milk Consumed by the Family.

We cannot be too careful in the matter of foodstuffs. Time and again this fact has been impressed upon us and indisputable figures given, showing the fatal results of carelessness about foods.

Food is as necessary to man as coal to a steam power plant or a stove. Food is the fuel that heats the body and provides the energy to keep its various organisms functioning. Poor food is worse for the body than poor fuel for the stove or boiler, because the latter two can almost always be repaired and put in shape again, or can be replaced; but the body is very often injured beyond repair, and, once destroyed, is so for good.

One of the most important foods that we consume is milk. Good milk, taken from high grade cows and purified to remove all impurities, is one of the very best foods that can possibly be obtained. It contains the body-building ingredients so necessary to humans, is easily digested, and not very expensive. But impure milk, especially when given to children, is a menace.

Try Wilmot's for pure milk from high grade stock. Ring 2360 r 14.

LOYAL SON OF CANADA. TEACHING AUSTRALIANS ABOUT HIS NATIVE LAND.

ed in Puget Sound, and the Gulf of Georgia, which are noted for the number of their waterfalls. On the voyage, the ship is seldom in the open sea, and the going is smooth. But sometimes in spring and autumn, Puget Sound, the Gulf of Georgia and the waters between them and Alaska are fog enveloped.

Occasionally in summer a forest fire will contribute a huge pall of smoke to add to the dangers and difficulties of navigation.

To beat the elements at their worst the officer on watch must, first of all, know the time the engine is making. Of course, he must possess excellent hearing and an accurate measurement faculty, together with a qui vive alertness that is attuned to the slightest variation. Not for an instant must he forget that sound travels a mile in four seconds, and his reckoning must be absolute.

The whistle is tooted frequently, and the captain must gauge his position by the echo-return just how far he is from rocks. There are some very narrow passages, and all the skill of the captain is called into play. There is a large amount of iron in the rocks contiguous to the shore which demagnetizes the compass, making it unreliable. For that reason, on board some of the ships, the use of the magnetic compass has been discontinued, and the gyroscopic compass is used instead.
