QUEEN'S FAVORITES FOR DOMINION LEAD

It Has the Material and Should Climb to the Top.

The Toronto Globe remarks: In Hamilton, the opinion prevails that, barring Queen's University and M.A.A.A., the teams in the Intercollegiate and Interprovincial are not as strong or any stronger than last year. Other critics lean toward the following: Hamilton Tigers—Just as strong and with better prospects owing to infusion of new blood. Ottawa—Weaker. M.A.A.A.—Seventy-five per cent. stronger. Argos—Slightly weaker. Queen's—Far stronger. University of Toronto—Stronger. McGill—Far weaker. In the Ontario Union a good prediction might be: Parkdale—Stronger. St. Brigid's—Fifty per cent. stronger. Hamilton Rowing Club and University of Toronto are new entrants.

One critic selects Queen's to go right through to the Dominion championship. This is a happy thought indeed, but it is a long and rocky road to the highest honors in the land. Some powerful teams are barring the way. Queen's, however, has the material, and should repeat Argos' success of last year.

LEEDS BOYS SUCCEED ACROSS THE BORDER

One a Chief Justice, Another a Business Man and Last an Educationist.

Gananoque Journal. Although there must be hundreds of people born in Leeds and Grenville counties who have made a success of life since their removal to the United States, a scrutiny of "Who's Who in America" reveals the fact the achievements of but six are considered worthy of their inclusion in this standard biographical reference work. Of the six, one is a woman.

Among the leading ministers of the Presbyterian church in Philadelphia is the Rev. Dr. John Archibald MacCallum, who was born at Gananoque in 1874. Dr. MacCallum is said to be the twenty-third member of his immediate family connection to be ordained to the Presbyterian ministry. After graduation in Arts at Queen's University, Kingston, he studied at Columbia University and at the Union Theological Seminary, where he received the degree of B.D., magna cum laude, in 1903. In 1915 Lafayette University conferred upon him the degree of D.D. Since 1910 Dr. MacCallum has been pastor of Walnut street church, Philadelphia, and he is also president of the Philadelphia Housing Association; a member of the Presbyterian Board of City Missions of Philadelphia; a trustee of Temple University; a member of the Board of Managers of the Presbytery of Philadelphia Social Service Exchange; and Moderator of the Presbytery of Philadelphia. A MINATURE HOSPITAL.

Is Being Carried on by Dr. Johnston in the West.

Brook, Sask., News. Dr. Johnston, our local physician and surgeon, has been busy the last week, having set up a miniature hospital in his office. He has successfully operated on ten or more patients for tonsils and adenoids. He had a trained nurse, Miss Hamilton, of Saskatoon, as an assistant. So many more have requested the doctor to attend to their children before school opens that he has arranged to re-open his hospital this week. We are sure the citizens will appreciate what Dr. Johnston is doing. He not only does the work successfully, but the expense is so much less than if the patients had to go out of town.

Dr. Johnston, who is a Queen's graduate, after returning from service overseas, was in the Vancouver General hospital for some time, before locating in Brook. Mr. and Mrs. William Johnston, the doctor's parents, who have been visiting the doctor and his wife, have left for Grand Rapids, Minn., where they will visit Mrs. Johnston's brother, T. Kells, and also their niece, Mrs. Love, in Chicago.

The crop situation throughout Alberta has improved to such an extent that officials of the department of agriculture are now of the opinion that the estimate of thirteen bushels of wheat to the acre, as recently announced from Ottawa, is somewhat on the low side.

Germany feels that the new American tariff is aimed principally at her to prevent the dumping of German industrial products on the American market. This is the view taken by the Koelnische Zeitung, an independent industrial newspaper.

Corns, Callouses, Sore Foot Lumps, Removed by Hot Water.

Looks easy doesn't it. Actually easier than it looks. Take just a minute or two to cover the corn or callous with Putnam's Painless Corn Extractor, the pain is eased at once. Follow this later by a hot foot bath, and watch your corn and callouses drop off. Think of the glorious feeling you will get at the cost of a few cents. Foot and toes are made smooth as a whistle. Try it, and you will quickly prove this is so. Get the name, "Putnam's Painless Corn Extractor." Sold at druggists everywhere.

LIVE STOCK FOR SHOWS

A Few Helpful Hints for Youthful Exhibitors.

Bear the Ancestors in Mind—Pick Tidy Animals—How to Feed and Handle Colts, Calves and Lambs—Boys Are Making Good as Exhibitors.

(Contributed by Ontario Department of Agriculture, Toronto.)

Calves that have been fed liberally and judiciously will develop as the factors which we call heredity determine. It will be all calf, but its perfection of form is determined by its parentage. Feed cannot make a square beef calf out of a three-cornered dairy calf. So to begin with the feeder should select the young calf largely on the individuality of the parents. Get a calf that will feed out to be as good or better than its ancestors—something that is worth while spending time and money on—and then take care of it. The breed score cards give clearly what is desired in breed type. These should be studied along with the animal that is being selected for exhibition. Calves should be halter broken when young, and handled gently that they may be quiet and docile at exhibition time. If in proper flesh to look well, ribs and back well covered, it is comparatively easy to complete the work of propagation. Prospective exhibitors should be kept in the stable for several weeks previous to the fair, where they can be washed, groomed and blanketed in order that their handling qualities may reach a degree of mellowness that is very desirable in exhibition calves. When exhibiting before the judge see that your calf is standing on level ground, quietly, and with feet well placed so as to present a good appearance. Don't let the other exhibitors crowd too closely and hide your exhibit from view.

Handling the Colt.

The colt selected for competition at the fair should meet the requirements of the class in which it is planned to exhibit. It should also be typical of the breed that it represents. As with the calf, the colt can only be what its ancestors make it. Colts may look very much alike when only a few old, but they certainly do not develop alike, even if the care and feed are the same. So get your start by selecting your exhibition prospect from good type parentage—exhibition stock if you can. Liberal feeding from the beginning on a comparatively narrow ration to develop all the bone and muscle possible should be the aim. Halter breaking and careful schooling to develop courage and tractability should be practiced from the beginning. The colt's feet should be dressed frequently enough to keep them in proper shape. Teaching the colt to move attractively at the walk and trot, to stand well and to permit handling of its feet is very essential in the general training of the animal. Such training is also a great aid on exhibition day. The colt that has had liberal treatment from birth and developed well, needs but little exhibition fitting. Good feeding will put a bloom on the colt that cannot be attained in any other way. Protection from the hot sun and flies, blanketing and grooming are material aids in developing a desirable coat condition, and should be practiced during the month previous to the exhibition. Ribbon and straw decorations while very attractive to the average crowd, do not carry very much weight with the high class judge, and are not likely to be of influence except in very close competition.

Shaping the Lamb for the Fair.

Lambs presented for exhibition at school or other fairs should, first of all have been born early enough in the spring to be well grown by exhibition time. The lamb's fleece should be kept free of ticks and lice, burrs and dirt. During the season, a washing can be given, if necessary, at least two weeks previous to the show. Lambs that are kept up and fed in covered pens will show a better fleece than if they had been running out on pasture up to the last minute. The fleece should be neatly trimmed one week or more after washing, if washing is practiced, and care taken to keep the fleece free of chaff and dust until the exhibition is over. In feeding for exhibition, variety in feeding stuffs should be sought in order to keep up the lamb's appetite, using oats, corn wheat, bran, cracked peas, barley meal and oil cake meal for the grain portion of the ration, and good alfalfa or red clover hay, and sweet turnips as roughage. These feeds if mixed to give a ration, with a nutritive ratio of 1 to 6 or 1 to 7 will take care of the growth demands and fatten the lambs. Should it be desired to feed the lambs while running on pasture, the grain ration given can be used. The lambs should be handled sufficiently to make them tame enough to stand well when being exhibited. If more than one lamb is called for in a class, all individuals should be uniform in size, type, condition of fleece and body shaping.

Getting the Pig Ready.

Pigs presented for exhibition at school or other fairs should first of all be of the proper type and weight for the class in which it is planned to exhibit them. The exhibit should be clean. This condition is best accomplished by an application of warm water, soap and the scrubbing brush. The crate or pen should be well bedded with straw or shavings to make it comfortable and attractive. It should also be free from nails, old wire, broken bottles or any other material likely to injure the exhibit.—L. Stevenson, Sec., Dept. of Agriculture, Toronto.

It takes no more to feed a cow that tests high in butterfat, and she may be retaining you double in profit.

The British Columbia Liberal convention passed a resolution urging the market of customs at Ottawa to make the cost of production the basis of duty payable on United States fruit imported into Canada. Okanagan dealers declared that the fruit industry of their district was in peril of extermination.

The Alberta legislature will meet for its fall session on Dec. 7th.

Facial Blemishes

Brown, mottled, roughness of blotched complexion are usually due to constipation. When you are constipated, not enough of Nature's lubricating Nujol is produced in the bowels to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Nujol is a lubricant not a medicine or laxative—so cannot create. Try it today.

This is Better Than Laxatives

One NR Tablet Each Night For A Week Will Correct Your Constipation and Make Constant Dosing Unnecessary. Try It.

Poor digestion and assimilation mean a poorly nourished body and low vitality. Poor elimination means clogged bowels, fermentation, putrefaction and the formation of poisonous gases which are absorbed by the blood and carried through the body. The result is weakness, headaches, dizziness, coated tongue, inactive liver, bilious attacks, loss of energy, nervousness, poor appetite, impoverished blood, salivary complexion, pimples, skin disease, and often times serious illness. Ordinary laxatives, purges and cathartics—sulfate, oil, calomel and the like—may relieve for a few hours, but real, lasting benefit can only come through use of medicine that tones up and strengthens the digestive as well as the eliminative organs. Get a 50c box of Nature's Remedy (NR Tablets) and take one tablet each night for a week. Relief will follow the very first dose, but a few days will elapse before you feel and realize the fullest benefit. When you get straightened out and feel just right again you need not take medicine every day—an occasional NR Tablet will then keep your system in good condition and you will always feel your best. Remember, keeping well is easier and cheaper than getting well. Nature's Remedy (NR Tablets) are sold, guaranteed and recommended by your druggist.

Removed to Sharbot Lake. Dr. K. B. Suddaby, who opened an office in Lanark a short time ago, has moved to Sharbot Lake to take over a medical practice.

Miss Laura Anderson, Carleton Place, a faithful teacher, died last week. She was highly respected.
