CAN NOT ESCAPE

No Chance for Murderer Who Uses Poison.

Science Has Made That Form of Killing a Lost Art, Unlike the Days of Old.

Ever since medieval times a silent but none the less determined war has been going on between the subtle art of poisoning and the more subtle art of discovering and locating poisons in the human body.

In the old days fortunes awaited those who could prepare some concoction that would remove people from this world without leaving traces of how it was done. Poisoning, as understood by a Catherine de Medici, was a grand art. Today it is a lost art, for science has practically won the long fight and is now able to discover and classify every known poison even months after the victim has succumbed to its effects.

Within the last generation almost every kind of poison has come within the scope of the ever-increasing experience of medico-legal experts who have been called to give evidence in important cases—from the hysteresis of the Crippen case to the arsenical flypaper of the Seddon affair.

Arsenic, antimony, prussic acid, carbolic acid, oxalic acid, mercury, belladonna, opium, heroin, morphia, calabar bean, croton seed, nitric acid, pyridine that most deadly poison found in minute quantities in dirty tobacco pipes—all have been traced, tabulated and chained by the patient, emotionless detective, Science.

So highly has the work of scientific detection been developed that the presence of arsenic may be discovered even years after it has been taken. No more delicate tests in chemistry, and at the same time no more infallible ones, can be used than the tests for arsenic and antimony. In the former poison the tests are so severe that one part in sixty millions can be revealed.

It is to the Borgia that one must go to hear about the incredibly subtle poisons which could not be detected, but the light of modern science proves that much which is credited to that family's knowledge of the art of poisoning was really impossible of accomplishment unless we concede—which is just possible—that they knew more about toxicology than do modern savants.

There was one particular poison which the Borgias are credited with using which has remained a secret. It was tasteless, could kill the victim quickly or leisurely, as the poisoner willed, and it left no trace discernible to the chemists of that time.

The lists of nobles and dignitaries of the church who died by this subtle means is believed to be formidable. It was used in two ways, powder and liquid, and its method of manufacture was related by an obscure scientist of the period.

The powder form of the poison was white like flour, with a taste like sugar. It was called Contarella. Its composition was never known, but the liquid was prepared in the following way:

A wild boar was caught, and to it was administered a strong dose of arsenic. As soon as the poison began to take effect the boar was hung up by the heels. Convulsions came on, and a froth, which ran from its jaws, was collected in a silver dish, and then was transferred to a bottle which, after some Contarella was added, was hermetically sealed. This was kept for a certain time and the result was the notorious poison.

Certain it is that no poison known today is secret. Chemistry and science can provide the means of detection, and can often supply the antidote.—Overseas Daily Mail.

Important to Know.

A fire had broken out in a factory in the country, and a young village constable was sent to make inquiries. After questioning the manager he asked to see the man who was responsible for the electric lights. The manager stated that the electric switches were under his control.

Police—Then you are the man who lights up the electric affair? Manager—That is so. Police—That is so. Now, be careful how you answer my next question, 'cos if it ain't satisfactory it will be used against you as evidence. When you lighted the electric light last night where did you throw the match?"

Priceless Painting in Old Chest.

An altar piece the center panel of which is alleged to have been painted by Leonardo da Vinci and the side panels by Michelangelo has been discovered in a chest at the Hungarian castle of Papa, belonging to the late Count Maurice Esterhazy's estate.

Experts are divided as to the authenticity of the painting. If the present owner of the castle, Count Thomas Esterhazy, has his claims sustained the altar piece will be the only known example of the combined work of these two famous painters. It will be worth a fabulous amount which experts hesitate to name.

Vitamins as a Cure-All.

Possibly the present tendency to extol vitamins as a cure-all is drawing to its close. The United States public health service reports that efforts during the year to discover the unidentified food substance whose absence from the diet causes pellagra have excluded two of the three known vitamins. The search for the missing element is being steadily narrowed.

Wonderful Old Bible.

A citizen attending the Winchester-Dean Bible meetings says in a note to the Whig, "Those present must have gone away thinking a great deal more of our wonderful old Bible, which hasn't changed since it was written, but which some men are trying to tear to shreds."

SOME NASTY INSECTS.

There are many insects creeping. That are man's most cruel foes. Who'll attack him, waking, sleeping: Why God made them no one knows.

"If you look up the word 'Tarantula' in the dictionary, Teddy," said Uncle Frank, "you will read the following rather amusing description: 'a large spider whose bite was formerly supposed to produce an irresistible mania for dancing.' Just get bitten by one and you will understand the dancing part of the business. Jazz will not be in it, Teddy, and you may die dancing. It will be dancing with pain, however, and I honestly do not recommend you to try it. I always gave the nasty things as wide a berth as I could. I do not like creepy-crawly things at all and I could never understand anyone liking them. I had a friend once who had a pet tarantula. He kept it under a finger bowl on his sideboard and it was always allowed to run around on his dining table. He used to catch flies and feed them to it with his fingers. Once that spider fiend escaped and I absolutely refused to stay the night in my friend's bungalow. I had no relish for finding it in my bed for instance. The bite causes intense pain and is frequently fatal. They are horrible fat hairy things and they can move as quick as lightning. I was nearly bitten several times by them. One Sunday morning I was lying half asleep in bed when old Silvanalgon came in with my early tea. 'Master,' he said, 'let your hand fall on the bed.' One never stops to ask reasons in foreign lands, and I let my hand drop on the bed from where it was leaning on the wall. Then I looked to see the reason. There was a huge tarantula spider just above where my hand had been. Old Silvanalgon then made very sure of his aim and hit it with a stick. If he had missed he would have had the spider after him. One seldom gets in a second shot although I once did in New Guinea. I never realized how quick a spider could move until then.

The Charming Centipede.

"Then there is the centipede, Teddy, and I can assure you that he can make you jazz and shimmy too. I was bitten by one on the forehead, and it never starts to rain after a dry spell that I do not know about it. One sees plenty of them after the first rain. They are about four to six inches long and are a reddish brown in color. They can jab those nippers in to come effect, let me tell you. They have not got a hundred legs as the name suggests but the nippers make up for several thousand. They are horrid things and if you happen to get one in the sleeve of your coat, the leg of your trousers or in the rim of your hat at any time, you will certainly not forget the centipede. They only come into the bungalow after a first rain. They are often to be found in a bunch of bananas, where I think they go to catch other insects. The tarantula also has a way of getting up a banana or plantation tree at times.

The Scorpion Uses His Tail.

There are quite a number of scorpions one can get too well acquainted with, and the tarantula is not the only dancing master, Teddy, by a long way. I can guarantee a scorpion to put his tail over his head and give you a lesson in dancing that you will remember. Black and greenish scorpions are often concealed beneath a stone, and if you happen to be the one who has to pick up that stone, then over comes the tail and the dance begins. They have something of the look of a lobster only the tail curls up into a barb. There are small scorpions, who have a turn for scholarly attainments, for you will often come across them in books. They can hurt, too, although they are small. When a scorpion is injured, he will often turn his dagger on himself and commit suicide. They are great boys to fight and when insects fight there is no quarter given, more often than not both die.

GASSED OVERSEAS SHELL SHOCKED and RHEUMATISM

Mr. F. M. Blaquier, Morinville, Alta., writes:—"After three years service overseas I returned to Canada almost a complete wreck. I had been gassed, and was suffering from shell shock and rheumatism, and was so nervous I could not sleep at night. I tried many medicines and doctors, but none of them did me any good for any length of time. I got so bad, in the Fall of 1919, my hands were so shaky I could scarcely hold anything, and it seemed as if I had a steel band pressing on my head. The least excitement would almost drive me into fits, and my whole system seemed to be in disorder. I had cramps in my legs nearly every night, and hot and cold chills running up and down my back nearly all the time. One day I decided to try Milburn's Heart and Nerve Pills, and after I had taken six boxes I began to feel better. I kept on using them and after a while I was completely relieved." Price 50c. a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

NOSE CLOGGED FROM A COLD OR CATARRH

Apply Cream in Nostrils To Open Up Air Passages.

Ah! What relief! Your clogged nostrils open right up, the air passages of your head are clear and you can breathe freely. No more yawning, sniffling, mucous discharge, headache, dryness—no struggling for breath at night, your cold or catarrh is gone.

Don't stay stuffed up! Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, giving you instant relief. Ely's Cream Balm is just what every cold and catarrh sufferer has been seeking. It's just splendid.

The Lady Mosquito is Dangerous. "The mosquito does not hurt much, Teddy, but the female mosquito carries the malaria germ, which makes the lives of so many a burden in tropical lands. Numbers die every year from fever, and those who live have to take big doses of quinine, which is the only known remedy, and not very pleasant one either. There are some mosquitoes here, but they do not carry the malarial germ. Be thankful for that."

Notes From Bongard. Bongard's Nov. 15.—Quarterly sacramental service will be held at Rev. J. J. Weller, Picton, will take charge, assisted by Rev. Mr. Bruthen. Mr. and Mrs. R. Harrison, accompanied by Mr. and Mrs. J. Allan Harrison and small daughter, were guests at B. E. Harrison's, Picton, on Sunday. Mr. Thos. Bongard and daughter spent the week-end in Picton.

J. Wilkinson has purchased the farm property of the late P. C. David. Mr. and Mrs. Milton Gilmore and Mr. and Mrs. Ward of Picton, were callers at Mrs. J. D. Bongard's on Sunday last. Born to Mr. and Mrs. Percy Thurston, a daughter.

Fire Totally Destroys Factory. Renfrew, Nov. 16.—Fire Tuesday morning totally destroyed the main manufacturing building of the M. J. O'Brien, Limited, scales factory here. Warehouses containing manufactured goods were saved, and stock enough to carry on until the factory is rebuilt, which it is the company's intention to undertake immediately. The fire started in the japanning room, but investigation so far has failed to ascertain the cause. The loss cannot be estimated, but it is covered by insurance.

An automobile race was recently held in Nevada over a 1,000-mile course.

Gifts in beautiful Anniversary Packages

A GIFT of 1847 Rogers Bros. Silverplate always shows good taste and good sense of value. In attractive velvet-lined gift boxes and chests, this fine silverplate makes an ideal Anniversary Gift. It is the more appropriate, because this year marks the seventy-fifth anniversary of silverware that bears the quality date—1847.

Every one who receives this distinctive Anniversary Silverplate or selects it for her own use lays the foundation for a complete table service in harmony. Each new piece in the same pattern adds to the value of the others. The fancy serving pieces—berry spoon, pie knife or cold meat fork—contribute that little touch so necessary in correct table settings.

Your dealer has "1847 Rogers Bros." or can get it for you.

MERIDEN BRITANNIA CO., LIMITED, HAMILTON, ONT. Made in Canada by Canadians and sold by leading Canadian dealers throughout the Dominion.

The Family Plate for Seventy-five Years

1847 ROGERS BROS. SILVERPLATE

Sold by Mahood Bros.

Canada's Winter is Cold

Stanfield's Unshrinkable Underwear is soft, warm and durable. Stanfield's Unshrinkable Underwear is neither low priced, nor high priced, but fair priced.

Stanfield's Unshrinkable Underwear gives more than it costs in warmth, ease, comfort, health protection and sturdy wear. It is the soundest economy to buy.

STANFIELD'S Unshrinkable UNDERWEAR

For sample book, showing weights and textures, write STANFIELD'S, LIMITED, TRURO N.S.

It wears longer

Sir Joseph Ward to Quit.

Wellington, Nov. 16.—Sir Joseph Ward, former prime minister of New Zealand, who has been laid aside from public duties for some time owing to ill health, has decided not to be a candidate in the general election to be held on December 9th. His health has greatly improved, but he feels that he is not strong enough yet to resume strenuous public activities.

Cost of Living in Austria.

Manchester, Nov. 16.—A staff correspondent in Vienna wires the Guardian that since September 16th the cost of living in Austria has dropped fourteen per cent., although the prices of bread and flour and rent have risen. The lower cost of living means a reduction in state expenditure for civil servants of sixty billion kronen a month.

A high grade blend—nothing added—nothing taken away.

Sold only in Air-tight tins.

GORMAN, BERRY & CO. Limited London and Winnipeg
