PROGRESS IN CAMPAIGN AGAINST TUBERCULOSIS

Meeting in Kingston May 4th
 —Committee Met Tuesday Evening.

Another meeting of the Anti-tuberculosis committee was held in the Randolph hotel on Tuesday evening, and progress in the campaign for the co-operation of all classes of citizens, public bodies, social organizations and churches, was reported by several of those present.

G. A. McCullagh, of the Ocean Accident and Guarantee Corporation, Ottawa, and a representative of the Ontario Life Underwriters, expressed very definitely the attitude of all the life insurance companies doing business in Canada to-day, and said that they were actively behind any measures calculated to check the ravages of this dreaded disease.

"Tuberculosis stands in second place in the mortality figures of this country," said Mr. McCullagh, "and our companies are giving financial support in every province to committees and associations that are taking corporate action in the fight for legislation that will reduce the death rate. These companies are the great losers as a result of failure to provide adequate treatment for the care of tubercular patients and these losses are running up higher and higher every year." Mr. McCullagh said that action had to come from the people in each municipality, and he predicted that if there could be a simultaneous movement all over Ontario the government could not afford to trifle but would be compelled to put through the necessary legislation.

Mr. McCullagh's remarks were keenly appreciated by all of the members present, and steps will be taken through him to have a similar committee formed in the city of Ottawa. As soon as the permanent committee is formed in Kingston following the meeting called for May 4th, communications will be sent to all of the outside municipalities and to the branch organizations, such as the Canadian Red Cross, I. O. O. F., Knights of Columbus, Masonic Orders, I. O. O. F., Canadian Clubs, county councils, Rotary Clubs, Kiwanis Clubs, city councils, chambers of commerce and boards of trade, women's institutes, the U. F. O. and U. F. W. O., all of which contain in their membership representative men and women in their respective communities.

General Meeting May 4th.
 Much progress has already been made in Kingston in the way of organization, and everything indicates that there will be a large attendance at the meeting to take place in the city hall on the evening of May 4th. Circular letters are being sent out inviting the attendance of officers and members of all the city organizations whose standing in the community gives weight to anything they undertake.

A local movement in a campaign against tuberculosis is of no value alone, but when made general it can become effective. While the committee realizes that alone Kingston can do nothing, it is staking all on the success of the initial organization here, for it is through the local organization that action is to follow everywhere in the province.

Only by such a course can the Ontario legislature be persuaded to take up the very serious problem of the suppression of the dread disease, tuberculosis, that is causing havoc in this province. There is little or nothing done for the protection of the people who are without money, and the disease is spread among the very poor because they cannot fight it. Mothers see their children taken from them or are taken themselves, because the government of this province has never made provision through municipal taxation or otherwise for the proper care of such patients in a tuberculosis hospital. Such conditions cannot be permitted to exist in an enlightened country, and the people of Kingston cannot afford to lag behind such provinces as Alberta and Saskatchewan where every afflicted person has the right to free treatment in a tuberculosis sanatorium.

"The members of the provisional committee are to be congratulated upon their great zeal," said the superintendent of one of the largest insurance companies in Kingston to-day, and he added, "My company will subscribe \$100 if it is needed to push along this splendid work. I believe that every one of the seventy-two companies will do the same, so that you will have all the financial support needed if you only ask for it."

Seeding Has Commenced.
 On Tuesday a number of Pittsburg farmers were busy seeding the fields. Some of them stated that the ground was in fine condition considering the great amount of snow which fell during the winter. It is stated that there should be abundant crops on account of the ground being kept so warm during the winter by the heavy snow.

Announcement has been made that Aberdeen Hospital, at Aberdeen, N.S., has been enriched by a bequest of twenty five thousand dollars in the will of the late George P. Wilson, a retired coal dealer. J. J. Morrison may run as a U. F. O. candidate in South Ontario.

MAKE BASEBALL DIAMOND AT THE FAIR GROUNDS

And Let the Youths Have the Cricket Field, Baseballer's Advice.

Lovers of baseball who desire to see Kingston players get a chance to develop a strong team are pleased over the action of the city council in voting \$500 toward the expenses of the Kingston team of the Central Ontario League. This is regarded as a recognition of a duty to promote good healthy sport, and especially a sport that appeals to the great mass of the people, and the majority of the people endorse the action of council.

There are other considerations, however, besides obtaining a public grant that would be carefully taken up by those who have the management of the teams forming this league. The most important one is to convert baseball into a paying proposition. There is a lot to learn in Kingston before this will be accomplished, but it is not an impossibility if the sport is raised as it ought to be and taken out of the class of public charities.

An experienced baseball man, in discussing this matter with a representative of the Whig, said baseball could be made to pay here, and the promising players would then get an opportunity to develop their talents and reach the big leagues just as they do in the United States.

"But," said he, "you can never do it while the citizens are content to see school kids driven off the cricket field that should be theirs, to make way for what is practically a free show that never yields more than enough to cover the railway expenses of a visiting team."

"That is not playing ball. It is only an exhibition of a mean spirit, for in addition to taking the cricket field from the little children who only have the right to it, there are many people who will not even put a nickle into the hat when it is passed around. How can you have baseball or any other sport without proper organization and management? You must get away from this thing. Leave the cricket field and the public parks to children, and make a good diamond at the fair grounds that will be a credit to the city, and will yield a revenue. This is the very thing that the citizens of Kingston want done for they have faith in the ability of Kingston boys, and desire to see them stay in Kingston rather than go to other places."

REAL ESTATE SALES

Houses and Lots Change Hands Through Mullin Agency
 The following real estate sales have been reported through the office of E. W. Mullin & Son, corner Johnson and Division streets:

Semi-detached brick, 122 Stephen street, owned by public trustee, sold to J. Abrameky.
