Letters to the Editor

Frontenac's Main Issue
 Harrowsmith, June 16. — (To the Editor): The drainage of the Napanee river seems to be the main issue in the Frontenac election. Mr. Rankin says the farmers' clubs did not petition the government to get the grant. He also says the work was unsatisfactory.

Now, Mr. Editor, the Verona farmers' club sent a resolution to the honorable minister of public works asking him to use his influence to get a grant to remove the rack cut at Ferworth, in the Napanee river. After that some of the farmers took the matter up with the minister and were able to secure his promise that he would do what he could for the people. Then Mr. Rankin jumps in and tries to get the credit for getting it. Now if any one disputes this statement let them write the minister of public works for a statement of how the money was secured. If Mr. Rankin is as much interested in that work as he says he is, why did he not do something for the people when his government was in power? The same thing existed then. During that time someone blew out part of the dam and they allowed a stronger dam than ever to be built. Now he is crying extravagance. We have no guarantee that there will ever be any more done if the present government is turned down, for they are the only government that would undertake the work.

Now as for the work. I was named by the minister of public works as foreman of the work. An engineer was sent down and laid out the work for me. I did the work according to instructions and when the work was nearly done he came again and said the work was satisfactory. Now Mr. Rankin is blaming me for not doing the work as it should have been done. If Mr. Rankin was so much interested in the work why did he not come there when I was at work and be a man. He came on Sunday to look the work over and found a lot of fault with it. It seems to me it would have been more gentlemanly if he had stayed at home studying his Sunday school lesson. Now as for me not being on the works half of the time, the statement is absolutely untrue and I can prove it. I will have to give Mr. Rankin credit for spending nearly \$25,000 to build a road into a mine in this county. It would be a good thing if the voters of this county could visit that place and see if they could tell what the road was built for. At the same time there were other mines running and the road they had to haul over was almost impassable, but they got no help.

Now, Mr. Editor, we expect on the 25th of June to elect Mr. Clark, a man that Frontenac should be proud of.
