### CANADA NOT A MERE JUMPING-OFF PLACE

#### Immigrants Welcome, But Not as Birds of Passage—Pourparlers With Italy.

London, Aug. 15.—The Canadian government is discussing with the Mussolini administration a special immigration arrangement between Canada and Italy.

When Premier Mussolini took over the reins of office, General Garibaldi, son of the famous liberator, paid a visit to Canada, and was favorably impressed with its possibilities as a home for Italy's surplus population.

It is understood that he received an intimation from Ottawa that emigrants from northern Italy, the home of intensive fruit culture, would be welcomed in Canada.

An expressed desire of the Italian government that would-be Italian emigrants to the United States might find in Canada a temporary stopping place did not, however, meet with the approval of the Canadian authorities.

Canada has given an emphatic "no" to such proposals, no matter from whence they emanate.

#### WILL NOT RUN MINES IF STRIKE OCCURS

#### But U. S. Government Will Make Every Effort To Prevent Suffering.

Washington, Aug. 15.—Confidence was expressed that the initiative taken through the coal commission would result in prevention of a strike, but it was emphasized that should a suspension of production become inevitable the administration was prepared to deal with the situation in such a way as to prevent suffering among consumers.

The declaration that the administration proposed to furnish every necessary substitute for anthracite in event of a strike by those who mine that fuel was generally interpreted as meaning that the president and his advisers had decided against any policy of taking over the mines.

In that connection it also was recalled that bituminous operators have offered to co-operate to prevent a fuel shortage should a tie-up, eventuate in the anthracite fields.

White House officials said that at any rate the country had no need to fear any such situation as was encountered a year ago when coal and railroad strikes came at about the same time.
