picnickers had been swimming at the west shore of the lake, and they were returning to the landing point when a fresh breeze brought about choppy waves on the surface of the lake. Residents Shocked By Spooning of Autoists

Peterboro, Aug. 20 .- Residents along the gravel road object to the spooning that goes on at their doorsteps every night. They say the motor parties that make the lanes and by-paths a rendezvous night after night are a positive nuisance.

One side-road in particular, about two miles from the city is nightly the scene of parking and sparking parties, and has the ivy-covered demands. This, without any doubt verandah of the city completely eclipsed. The spooning motor is the latest pest that the rural community is praying may be extinguished by rain, one man said.

London, Aug. 20 .- In an interview given, David Lloyd George said that he is eagerly anticipating the opportunity which his visit to Canada will give him to renew the friendships which he made during the war and on his tour of twenty-four years ago.

"Ever since the armistice," said, "I have been seeking an opportunity to go to tell the Canadians what their magnificent co-operation meant during the hard days of my service as premier during the war. The splendid response of Canada, the courage, endurance and marveilous efficiency of her fighting men from the day they stood up against poison gas at Ypres until the recapture of Mons was beyond mere verbal gratitude and praise and I have ever since wished for a visit so that could tell Canada how the homeland was cheered and strengthened daily by the fresh proofs of solidarity and the persistence of British falth and

To Preserve Entente

London, Aug. 20 .- The publication of Marquis Curzon's white paper win in an awkward position, for re- received an inheritance from public, and the foreign minister's statement of England's financial position made a genuinely favorable impression. Great Britain therefore is anxiously awaiting Premier Poincare's reply to the British note, which is expected early next week.

The Morning Post and other organs noted for their pro-French sympathles have for several days been urging Premier Poincare to modify his policy in the hope of saving the Entente. + TEN ARE DROWNED

. bers of one family were drown- o cited Great Britain.

The lesson to be learned from the drowning tragedy of Sunday. which the lives of four young people were lost in Collin's Lake, Glenburnie, is the great risk run by fishing parties crowding into 'death-trap" punts. Sunday's tragedy was caused by leaky and frail little boats which were incapable of carrying more than two people at the most, and there was big risk even to that number. Little inland lake places are seldom equipped with safe fishing boats. Constant baling is required in most of the boats to be had at fishing places, and if there is any kind of a sea running, they are sure of shipping water in quantities. Had the coroner deemed it necessary to have held an inquest into the horrov that has stirred the city so deeply, some valuable information might have been forthcoming as to the "death-traps" which were used by the young people on Sunday, and which sent them to the bottom of the little lake and nuffed out their lives.

DR. BANTING TO USE INSULIN ON A DOG

Takes Pity on Canine Whose Fellows Were Sacrificed to Produce Cure.

Montreal, Aug. 20 .- One of the most interesting things that occurred to Dr. Banting during his trup from England home was when a Toronto man came to him and told him of a diabetic dog, a thoroughbred Airedale he owned, to which he was very much attached. This dog is to be brought to Dr. Banting's laboratory at once for treatment.

It was by the sacrifice of the lives of dogs that insulin was finally discovered. It marks a new era in the manufacture of insulin when there is enough now to use in prolonging the lives of the breed of dumb animals who made it possible to save thousands of human lives.

England is using insulin extensively. The amount of research work now going on there is tremendous. Dr. Banting said.

The wood was burned to a fine ash and the cement blocks rise above debris like headstones of graves. Scattered throughout the ashes lie broken, twisted frame beds, battered bath tubs and rusted pipes. On one of these battered beds lies the mute evidence of tragedy. On a broke out in the hotel early Sunday rusted spring is a charred mass of human bones, the remains of some unfortunate servant, overcome by smoke in her sleep in the servants' quarters in the tower alongside the elevator shaft. There is little left to identify them, but the number of masses of bones corresponds with the number of people missing.

Bodies Identified. The bodies of seven persons have been identified and it is thought there are others in the ruins. With the hotel register and all the books with the records of the hotel help destroyed, it is impossible to definitely establish the number of casualties. some of the servants came from outlying settlements and farmhouses, and their homes have not yet been checked up to see whether they caped from the flames.

One authority this morning gives as "missing and presumed dead" Mrs. Emily McNelly, wife of James Mc-Nally, Chicago. Most of the United States guests left on the special train for Toronto, but Mrs. McNally's name is not given among those who arrived safely in that city. It is also stated that Miss Elizabeth Krogan or Krooger, Cleveland, who was earlier mentioned as missing, is now known to be dead, also Miss Annie Carroll, a Toronto girl

Dr. J. P. McDonald formally opened the inquest today and adjourned it until Wednesday. There will also be a searching enquiry by the Ontario fire marshal's department.
