Although the birds may be cooked entirely under a flame there is so much danger of burning that many housewives prefer to cook them partially in the oven, perhaps for 15 or 20 minutes, before broiling them. To dress for broiling, singe, wipe and with a sharp-pointed knife, beginning at back of neck, make a cut the entire length of the bird through the backbone; lay the bird open and remove contents from inside. Cut out rib bones on either side of backbone, remove from breastbone, then cut through tendons at joints (this makes the chicken easier to eat). Sprinkle the bird with salt and pepper and place it in a greased pan, skin-side down. Dot over with bits of butter. After 20 minutes in your oven, broil to finish cooking, turning when done on one side.
