ELECTRICITY LIKE OTHER INVENTIONS

Had Its Detractors From The Beginning And Will Have Till the End.

By Susan Ellen Dodge. The man who advanced the theory that the world was round and that if you sailed to the west you would reach the east practically took his life in his hands. Ridiculous! the world was flat. Everyone knew it. Everyone knew too (though no one had been found with the courage to attempt to prove it) that there was a "jumping off place" which when reached, would plunge you

forth into eternity. Chains, prison, loss of position and estates and even physical torture has been the reward meted out to the few courageous souls who have dared to defy the "they say" of the mob mind.

Even if the public by and large has not resorted to violence it has invariably and inevitably fallen back upon an attitude of supreme disbelief. Even so recently as 1793 crowds congregated upon the shore of the Hudson River to hoot and howl at Robert Fulton because he was such an idiot as to imagine a boat could run by steam! Why, it simply could not be done. Everyone (again!) knew that.

The automobile inventors, backers and enthusiasts, the Wright the same reception from the pub- velopment. Now the United States lic. Added to all else decreed the is Canada's investment banker. It unsafe and none would ever live the few years since the end of the through a ride. Least of all would war so much American money has such modes of transportation really been invested in Canada that the become popular.

AMERICAN BOTTLING WORKS GINGER ALE, PLAIN SODA, BIRCH BEER, LEMON SOUR AND

and absurd. "fad" that had no foundation in been "top dog" for several years, actual usage?

Go back still a little further. As late as 1879, when many folks were coming to believe in the commercial possibility of electric lighting (the method n which the vanguard modern "electric service" generally was introduced to us) so learned man as one of the Fellows of the Royal Academy of Science, of Great Britain came out in print with the following sweeping denunciation:

"During the intervening thirty years I have abstained from further meddling with electric light, because all I had seen then and have heard since has convinced me that though as a scientific achievemen the eletric light is a splendid suc cess, its practical application to al purposes where cost is a matter serious consideration is a complete and hopeless failure and must necessity CONTINUE TO BE SO!

The modern world of today with its maze and blaze of electric lights on, every hand refutes those last four words beyond the shadow of doubt. Had inventors, and experimentors rested upon the statement of the scientist just quoted we would not have the marvellous lighting system that we know today. Sim ilarly, the detractors of electrical service in general and of such devices as the dishwasher, electric re frigerator and electric range in particular may have cause, within the next ten years, to eat their words just as would the earned British gentleman of the eighteenth century were he to come back tomor

Electrica development is still obviously in its infancy. But electrical service, both domestic and commercial, is here to stay. Boosts will give this service greater headway than knocks. Why not start your bit of electrical "rooting" to-

Patronize your local Hydro shop for all electrical needs.

From 1915 American Capito Has Grown From 9 to 33 Per Cent.

Floyd S. Chalmers in "The Annalist that the United States owns one third of all the industries in Canada and one-third of all the produc ing mines; it owns a large part of the timber resources not vested the Crown, and has extensive inter ers, real estate and other assets. In- result the United States has \$848,- cheer and good food into the inside vestors in the United States hold, 000,000 invested in manufacturing of men and make them cheerful outbesides, a third of all the bonds is- plants in Canada, or 30 per cent, of side, sued by Canadian provinces, a third the total investment in Canadian in-of all the debentures issued by Cana- dustry. Some Canadian tainable and the cooking-well, you bonds of the Dominion government industries are almost entirely dom. cannot realize it until you try it.

In the days before the war, Cannated by American capital.

The Belment is just a good entirely dom.

VACATION DAYS

Safe from the sun 'neath an apple tree, Wrap in a haze of dreams; Following flights of a busy bee, Soothed with pastoral scenes. List'ning to music the binders play, Watching loads to the barn. Eating and sleeping like harvest hands-Vacation days on the farm.

Paddling along in a light cance, Bathing in waters calm, Sprawled on the sand 'till baked well through Getting a coat of tan; Singing and playing in carefree mien, Treading the smooth dance floor, Enjoying them all with rapture keen-Vacation days on the shore.

Lying at ease 'round the campfire bright, Fishing in lake and brook, Sleeping the sleep of the just each night, Hunting for things to cook. Roaming through glades and the shadowed dells, Threading the lowlands damp, Careless of dress, plain the story tells-Vacation days in a camp.

Getting fed up with the whole blamed thing Wishing you were back home Longing to hear a telephone ring-Why did you ever roam? Wondering about that deal with Bob Or Jim or Jack or Hugh Busting out to get back on the job, Yearning for work to do.
