## CHILD'S STORY OF THE HUMAN RACE

By Uncle Ray

Chapter 136—Vase Paintings. The Greeks were very skillful in making vases. These were almost always made of clay. Their shapes were graceful and pretty, but the main thing about them was the paintings on the outside.

Some of the best artists in Greece spent part of their time making paintings on vases. These paintings give us facts as to how the Greeks lived. Most of the pictures we have had in these stories during the last few weeks were taken from Greek vases.

Today we are showing Greek vases and pitchers in a row. Observe the paintings and where they were placed.

Another illustration is a picture taken from a Greek vase. It shows Poseidon, god of the sea, talking to the goddess Athena. Notice the

three-bronged spear Poseidon is holding. The god the Romans called "Neptune" also carried that kind of a spear; in fact, Neptune is just the Roman name for Poseidon.

Another vase painting shows Dionysius, god of wine, riding in a little sail boat. Around the mast twines a vine laden with grapes. Do you see why grapes should be over the ship of the god of wine?

Next—Greek Rings and Cameos.

Pitchers and vases of the Greeks.

The wine-god riding with grapes above him.

Athena and Poseidon.

## MINERAL OUTPUT JUMPS \$26,000,000 IN HALF-YEAR

### Recovery in Production of Nickel and Copper Outstanding Feature.

Ottawa, Sept. 12.—An increase of over \$26,000,000 is shown in the value of mineral production in Canada for the first six months of this year, as compared with the same period in 1922, according to a report made public today by the Dominion Bureau of Statistics. The value of the output for the first half of this year was \$87,152,248, and for the same period last year \$60,561,109.

One of the big features of the industry this year was the recovery in the production of nickel and copper with the reopening of the smelters and refineries operated by the International and the British American Nickel Companies.

### EFFECT ON CONFERENCE.

#### Japan's Lower Ranking Is Subject of Comment.

London, Sept. 12.—Whether the Japanese disaster would change the whole current of the forthcoming Imperial conference through Japan's temporary relegation to the rank of a fourth class power, has been the subject of interested comment here. It was stated at the Admiralty yesterday, however, that the question of the Singapore base will not be affected by any alteration in naval strength thus caused. Singapore has nothing to do with Japan and was simply chosen as the best possible base in the Pacific. Naval experts say if Yokosuka harbor has been entirely destroyed as reported, Japan is in an awkward position. Yokosuka is one of her two principal naval bases, and the other being Kure. Her other two bases, Sasebo and Matsuru, are only equipped for building small cruisers and destroyers. Should Japan undertake the construction of capital ships it will take three or four years for any one

to be completed, whether laid down in Japan or in another country.

### PATROL CONTINUED LATER.

#### Minister of Lands to Have Timber Districts Well Protected.

Toronto, Sept. 12.—Fire-ranger patrol in the Northern Ontario timber districts will continue this fall until every vestige of fire hazard is passed. There are at present well over a thousand firerangers patrolling the Ontario woods—a number considerably in excess of that at work in previous seasons.

Last year's terrible forest fires taught a lesson which the department of lands, under Hon. J. S. Lyons, intends not to forget, and it is with a view to preventing any repetition of the disaster that the patrol service has been extended. As a result the number of rangers employed has been the greatest in the department's history, and extra rangers have been hired for patrol duty during periods of extreme drought. In June no less than 990 additional staff were employed.

Neither, it is said, will individual districts be permitted to bring about of their own accord the withdrawal of their fire protective forces. Timiskaming, from which fire patrols had been withdrawn previous to last year's fires, has been patrolled throughout the summer similar to other districts.

### Freezing Weather in Alberta.

Edmonton, Alta., Sept. 12.—Water in the Cereal, Alberta, district, was frozen to a depth of a half to three-quarters of an inch Monday night. Considerable damage to late oats in that vicinity was reported.

Three Rosedale boys are arrested on a charge of housebreaking, in connection with depredations in a Rosedale residence, and are released on bail aggregating \$4,000.

Cy Williams knocked out his thirty-sixth and thirty-seventh home runs of the season at Philadelphia, on Tuesday. It places him ahead of Babe Ruth.

PROBS:—Thursday, fair and cooler; frost not improbable at night.

Store Hours: 9 to 5.30 O'clock

# New Fall Coatings

Every woman, curious as she must be to see what the new season has in store, is most welcome to this showing of the season's smartest fabrics.

## WoolPom-Pom Cloth

Priced at ..... \$1.98 yd.

A heavy, all wool fabric, most desirable for the general utility coat built on tailored lines—fifteen new shades to choose from—full 54 inches wide.

## New Plaid Backs

Priced at ..... \$3.50 yard

A fabric that finds instant favor with Misses and Matrons, whose desire is to have Coats developed along Burberry lines—shown in the soft, lovat and heather colorings—54 inches wide.

## Chinellaine

Priced at ..... \$4.25 yard

An imported English Coating with a ripple surface—an excellent wearing, fine appearing cloth in the new brown tones of Rookie, Sandalwood, Mushroom and Kit Fox; full 54 inches wide.
