Patriotism: An appetite, modified by a deficit.

There are degrees of goodness in men. But a woman is like an egg; she is good or she isn't.

Rouged cheeks and powdered faces are rather atractive if you don't notice the yellow neck beneath.

Laziness is the quality that makes a husband think the drying of dishes an undignified task for a man.

The difference between matrimony and divorce is that they get well acquainted before they get a divorce.

Our amateur opinion is that two additional brakes on the car won't give it any advantage over a loco-

Scientists say men now live thirty-one years longer than the ancients lived. Apparently in spite of all they

The chief difference between nice people and disagreeable people that the disagreeable people don't the lives of the Canadian people. He

If the rich voluntarily quit drinking to keep from offending the poor, let's ask them to stop making so much money.

though modesty persuaded Eve to don clothes, she doubtless studied the effect in the mirror of some placid lake.

When Daughter says there nothing in the paper to-day, she means there is nothing in it about the Prince of Wales.

The man who didn't know the gun was loaded is survived by a son who didn't know the driver of the other car was loaded.

Hootch is more easily obtained in great cities, showing that Nature works always to relieve the congestion of population.

Cars and sons have this in common: they get out of control if you release your clutch and then put the brakes on tight.

The Court of St. James may not miss Ambassador Harvey so much but his resignation will be an awrul

blow to paragraphers.

Some motorists seem to feel that if a pedestrian is not looking in six directions at one instant he is guilty of negligence.

Our respect for woman's intuition diminishes each time we discover that some insignificant little shrimp is leading a double life.

The melancholy days are here and one must burn or freeze; it's little too hot for heavy ones, and a little too cold for B. V. D.'s.

It will be heartly apreciated if teachings of Jesus to the desperate coal miners will arrange future problems of patienal and internastrikes on the basis adopted by striking barbers in France, where customers are being shaved free to win public support.

Those people who are principally interested in propaganda to keep ories of crime out of the pres would be the first to shrick about subsidized newspapers and protec of the police if an gainst themselves were ignored.

LOCOMOTIVE ENDURANCE.

On the Union Pacific railroad only one locomotive is used in the run between Kansas City and Denver, a distance of 640 miles. Heretofore, four locomotives were used to cover that distance, the longest run being 210 miles. All the way between Kansas City and Denver there are heavy grades, but after a sixty-day test, the Union Pacific found to its satisfaction that one of its new locomotives could do the work of what four had formerly done. Crews were changed, but the same iron monster was used throughout the en-

locomotives are used to make the trip from Toronto to Montreal, a distance of 333 miles, but the new locomotives being built in the Kingston works can easily make the run from Toronto to Kingston or from Kingston to Montreal. For years a change of locomotives has been made at Belleville and Brockville. If the Union Pacific can run one locomotive 640 miles without changing, is it not to be expected that the Canadian National Railway may soon make the Toronto to Montreal run with one instead of three locomo-

CAUSE FOR THANKSGIVING. It is well for the Canadian people that they pause in their busy careers only over the actual name of the to reflect seriously on the many blessings which attend their every day

life. It is true that there are great many things in our national and social life in which we do not measure up to our ideals. It is questionable whether the time will ever come when we shall have attained a political and social condition which we shall not be called to the attainment of higher things and be agitated more or less with discontent. Progress is the law of life; dissatisfaction is the mother progress. It is out of dissatisfaction that there is born both the desire

for better things and the endeavor to attain them. Possibly we should be thankful to-day for even things which are not to our liking. | wards of the county and the remainus to bestir ourselves.

men and women than ever before consecrated to the cause of freedom and inspired by lofty patriotism, charity. Here the mother or, as who are daily devoting themselves to the advancement of what promises to make not only for our happiness and well-being, but for the happiness and well-being of the world. No one whose soul is not dead in a sordid materialism or unresponsive to the higher things in life can fail on this national Thanksgiving to feel the call to a devout and reverend acknowledgment before God of a deep and sincere gratitude for the multiplied blessings which to-day crown appears to have withheld from us no good gift nor to have denied us any perfect been.

YOUTH MOVEMENTS.

Normally, Youth and Despair meet only to rebound. But Europe to-day is largely inhabited by a generation of young people to whom despair, lighted only by momentary will o' the wisp hopes, has become the ac cepted way of life. Thwarted their birth-right, they snatch madi at pleasure though knowing that it, too, will melt out of their grasp and leave them alone with hateful real-

But, as always, there are a few spirits who refuse to give up, and these are driven together for mutual comfort and support and so another Youth Movement is born. These bands of young hopefuls which have sprung up spontaneously from en to end of the distressful countries are perhaps the brightest lights in an exceedingly sombre picture, a sign of the unquenchableness of the good that is in man.

The group in Paris which calls itself "The Young Republic" is described as "a friendship of young. democratic Christians, resolved each to work according to his ability in whatever condition God has placed him to make Christ known to men and to strive to bring about conditions of life such that all men may fulfil their destiny as children of God." The simple sincerity of their relationships and their faith is almost staggering. They have sufficient numbers to be represented in the French Chamber of Deputies by their leader, Marc Sangier. Party ties are not for him. He is there to denounce injustice (whether committed in France or beyond her frontiers and to attempt to apply the tional policy. Strict adherence to this programme would make him the busiest and least popular figure in Europe, one fancies. But even a voice crying in a wilderness of Deputies is not sufficient in this age of printer's ink. The movement has its own co-operative newspaper in ed, and twisted, until the production of which everyone they berak down and a nasty ulcer are attracting great attention. may take a hand cither as writer, results. proof reader, folder, subscription agent or newsboy. "It is," writes An optometrist predicts that ev- one, "a remarkable sight to visit the

work at six the next morning, inces- biles or hemorrhoids. santly fold the great freshly-inked

heets" One envies them such faith. These political activities are looked on, however, as a passing and slightly spectacular phase. The real work is done, unnoticed. by the members who, each in his own phere, act on the belief that to every individual God assigns a part which he shirks or botches only with great the Great Worker.

WHY THE HOME GRANTS.

On The Canadian National, three | are beclouding the point at issue between the city officials and the Orphans' and Infants' Homes. For the situation itself is quite simple, as the following summary will show.

Under the Children's Protection Act of Ontario, a municipality must maintain its wards either in a municipal shelter or in an "approved home," in which case the municipality shall pay 75c per day for each ward. Kingston has no municipal shelter. Accordingly the city is liable to the Children's Aid Society. as the legal guardian of the city's wards, for the maintenance of these wards at the legal rate. This liability the city has now admitted and faces. payments have begun. The Society has constituted the Orphans' and In- a standing job, where you retain the fants' Homes as the "approved homes," and places the city wards in you are up against a stiff proposithese two institutions, pending adop-

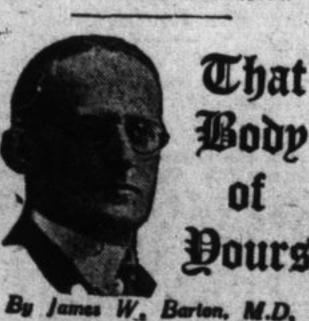

But both these homes are fulfilling a much greater mission than simply that of acting as receiving homes for the Children's Aid Society. The rescue work done by the Home for Friendless Women and Children is invaluable, and will have to go on whether that institution closes its doors or not. Of the eighteen chiidren and four adults being given shelter there, only three are city wards. So, too, with the Orphans' Home. There are at present some forty children there, ten of them wards of the the City of Kingston, seven similar for these are the things which bid der children from Kingston homes which have been broken up through To-day Canada is big with hope desertion, death or insanity. None because there is a larger body of of these latter are chargeable to the city, but are maintained partly by the parent and the remainder by known is in not a few cases, the father can visit his or her children at will and can watch their upbringing in sheltered and love-filled surroundings such as would have been denied them

> In recognition of this most necessary service for the welfare and moral health of the city, the council has hitherto made an annual grant of \$500 to each of these institutions. Provision for these grants was made in this year's budget and the council approved and passed both grants in March. But they have never been paid, though, on the strength of the city's promise to pay, both institutions have spent this amount for their urgent needs. In this matter the county has set Kingston an example by paying without hesitation both grants and per diem charges.

The sums voted have been withheld because the officials discovered that the city was by law compelled to pay for the wards who had been placed in these institutions. Very rightly (from their point of view) they declare, "The city will not pay twice for the same service."

But a moment's clear thinking tion of paying twice. The city pays land. for the maintainance of its thirteen wards as the law demands. What does it pay for the maintainance, largely charitable, of the other thirty-seven children and four adults helonging to this municipality who are being cared for in these two inetitutions? Not a dollar has the city paid for over sixteen and even the maintainance dues for wards are far in arrears.

which the citizens will look to their representatives to correct immediately. The payments might well marked "For Services Rendered."
