SATISFIED MOTORISTS APPRECIATED SERVICE

And Wrote To Atwood & Dine To Say So And Render Thanks.

There is nothing that gives a man or group of men in business that grand and glorious feeling so much as a letter of appreciation concerning the service or goods of the firm.

Last week a letter we now prize very much, came our way. At the time we expected a tip that we were about to get the raspberry handed to us some dark night, or we were to cough up a quantity of simmons under a certain tree or—Bang! Bang! Bang! Instead, a letter, written by a tourist just returned home, was couched in the most eulogistic terms of the A. & D. Service.

ONLY SOME WOMEN ARE GOOD "LOOKERS"

Declares the Electric Range Demonstrator.

No, she is not the least bit catty, this Demonstrator. But when she remarked, apropos of her work, that only some women are good "lookers," it did sound that way, particularly so when her own good looks were considered.

"Oh," she said, after puzzling the matter for a moment. "I did not mean it that way. Anyway, beauty looks out from within and depends very little upon more regularity of features. I have seen many women whose charm of manner and delightful personality made one forget to study their features."

CAREER OF STEINMETZ AN INSPIRATION IN PLUCK

By S. W. Straus, President American Society for Thrift

Is it through pluck, luck or mere chance that men reach positions of great responsibility and usefulness in America today? This question, the answer to which should seem perfectly self-evident, is worthy of attention by all who are especially interested in giving encouragement to our young men and young women.

It is a fact that many are discouraged on the threshold of active life because they believe luck and pull and mere accident have much to do with success. There recently passed away a great man; a genius, we venture to assert, whose career was a striking example of what can be done through sheer pluck and ambition.

MORE POWER.

It was announced on Thursday that Kingston is to be granted a further power supply by the Ontario Hydro-Electric Commission.

Let us all put on more power this winter. In spite of all the blue predictions made by some a few years ago—in spite of all the talk of post-war famines and terrors—most of us are still going along quite comfortably.

More power to us all! There are many who wear old lenses long after they should be changed and that many a person is right now suffering the penalty for neglected eye strain that a thorough examination of the eyes would reveal.

SOME IMPORTANT OPTICAL TRUTHS

There Are Many Things About the Eyes That People Do Not Know.

It is not true that people "begin wearing glasses too soon"; not if the one who first examined the eyes was up to the standard in his work. Because, when the skilled optometrist gets through examining a pair of eyes, he knows what their condition is and he knows what they need and what they do not need.

Neither is it true that having one's eyes examined necessarily implies that one will be advised to change lenses or begin wearing glasses. Every year thousands of people who have their eyes examined are advised that they need no changes nor start wearing artificial aids to the vision.

But, many who could at one time have had their eye trouble corrected very easily and comparatively quickly, defer having their eyes examined until they are in such shape that the correction of their defect is more difficult and tedious than would have been the case had they sought proper advice soon enough.

The career of Steinmetz, a giant in vision and intellect, should prove an inspiration to the youth of our country. It is not pluck, it is not luck, it is not mere circumstance that brings success. It is pluck, thrift of time, thrift of opportunity, ambition, character, intelligent effort.
