A-L-L-E-N TO-DAY

Ponjola

With JAMES KIRKWOOD, Anna Q. Nilsson, Tully Marshall
 A Romance of Paris and the African Veldt.
 If there be no good feeling, the very name of friendship vanishes.

AMUSEMENTS

What the Press Agents Say About Coming Attractions

A STIRRING EXCITING STORY SHOWN AT THE ALLEN

She went into the Rhodesian gold field alone—with just one purpose in mind.
 This girl, once the idol of London, left behind her everything that could connect her with her scintillating past.
 She went in with eyes open for the man she knew that she was going into a world—a world of hard-fisted, heavy-drinking, depressed and morose men—a world where no decent girl could live and remain decent.
 Disguised as a man she plunged into this veritable hell upon earth, where men worked, fought and drank with no thought of the morrow.
 And as a man she worked, and fought with these hardened characters of the veldt, that she might save "her man" from the curse of that arid land—ponjola, the poisoning, moral-destroying drink of the flosam and jetsam that lived its monotonous life beneath the torrid African sun.
 This is "Ponjola." Cynthia Stockley's stirring, exciting story of South African gold field life, now playing at the Allen theatre.

Anna Q. Nilsson enacts the greatest role of her career in this First National picture.
 As a man, the heroine (a part played by Anna Q. Nilsson) fights for the redemption of a man, who is fast becoming the victim of the strange drink of that glamorous country. The plot moves quickly, passing from one thrilling incident to another. It is a picture that will be a treat for those who enjoy plausible drama and romance.
 "Ponjola" is interpreted by a brilliant all star cast, which includes Anna Q. Nilsson, James Kirkwood, Tully Marshall, Ruth Clifford, Edwin Sturgis, Claire McDowell, Claire Du Brey and Bernard Randall.

 No solicitations during meals.
 THE BAZAAR IS OPEN DAILY FROM 10 a.m. to 12 p.m.
 GENERAL ADMISSIONS:—Afternoon, 10 cents; Evening, 15 cents

FREE

THREE MONTHS COURSES IN AGRICULTURE AND HOME ECONOMICS will be held this winter at Kingston in the new DAIRY SCHOOL BUILDING by the Ontario Department of Agriculture and under the management of the Kingston Branch.
 Lectures and practical work will be given five days a week from 3.30 a.m. until 4.30 p.m. by a staff of seventeen lecturers and demonstrators in the following subjects:
AGRICULTURE—Animal Husbandry, Field Husbandry, Veterinary Science, Soils and Fertilizers, Elementary Physics and Chemistry, Drainage and Land Surveying, Farm Mechanics, Gas Engines and Tractors, Agricultural Botany, Economic Entomology, Farm Management, Co-operative Marketing, Farm Forestry.
HOME ECONOMICS—Foods and Cookery, Laundering, Household Administration, House-planning and Decoration, Home Nursing and First Aid, Sewing, Millinery.
JOINT LECTURES IN POULTRY HUSBANDRY, FARM DAIRYING, HORTICULTURE AND VEGETABLE GROWING, BACTERIOLOGY, CIVICS, APICULTURE, BIRDS, ENGLISH MATHEMATICS.
 Courses are open to the young men and women of the farms of Frontenac and adjoining Counties.
 Courses begin November 26th, 1923, and end February 29th, 1924.
 This is your opportunity to acquire up-to-date knowledge of improved farming methods, and thereby become better equipped for your work. Agriculture calls for more efficient business-like young men and women to bring it into its proper position in relation to other lines of business.
 Write for Calendar and full particulars to:
 A. W. SIRETT, Agricultural Representative, At Market Street, Kingston.
 HON. JOHN S. MARTIN, Minister of Agriculture.

Ladies' Classes

IN THE KINGSTON Y.M.C.A. GYMNASIUM and SWIMMING Every Wednesday AFTERNOON and EVENING ANNUAL FEE, \$2.00.

Friendship throws a greater luster on prosperity, while it lightens adversity by sharing in its griefs and anxieties.
 We take more pleasure in what we have long wanted than in what we are constantly obtaining.

How is this young man showing ignorance of good social practice? The answer will be found among to-day's want ads
 Elginburg News.
 Elginburg, Nov. 17.—The sportsmen have returned from the north countries each bringing home a deer. Mr. and Mrs. M. Gordonier are rejoicing over the birth of a son. Rev. J. Puttenham spent Thanksgiving with his brother and son in Toronto. Mr. Pound, Kingston, will speak in this church on Sunday next in the interests of missions among the sailors. Rev. J. Puttenham is to preach anniversary services at Escott, his former circuit. Mrs. Pivley and daughters, Kingston, spent Thanksgiving at J. Silver's. Mrs. J. F. Sparks and Mrs. S. H. Simpson, Kingston, spent Tuesday at Charles Irvine's.

NATURE'S TEMING MILLIONS.

Four Generations of Oyster Shells Would Outweigh World.

The wonderful profusion with which she distributes living things is one of nature's most astonishing feats.
 We are accustomed to regard the earth as fairly densely populated with human beings; Great Britain contains nearly 50,000,000, China about 400,000,000, and the whole world more than 2,000,000,000 men, women, and children.
 But mankind is one of the smallest of nature's races. A single cupful of pond water may contain more living creatures—not counting microbes or plants—than the entire human population of the earth.
 Professor J. Arthur Thomson has declared that there are at least 2,500,000 different kinds of insects, and it is certain that the insects of the world, if all were put into one gigantic scale pan, would easily outweigh the whole of the rest of the population, both human and animal.
 The greenfly that destroys our rose-bushes breeds at a stupendous rate. All those we see are females, and they give birth every few days to teeming broods of youngsters, which are full-grown in a matter of hours.
 Huxley calculated that if the progeny of a single greenfly all survived and bred, they would in one summer outweigh every man, woman, and child in China. It is lucky that the greenfly's enemies—chiefly young ladybirds—have appetites sufficient to keep the pest in check.
 Supposing a great anti-housefly campaign were so successful that only one specimen was left alive in the whole world, should we be rid of these carriers of disease? Hardly, for the housefly can increase with amazing speed. If all survived, the descendants of a single fly would number 30,000,000,000 before the end of the summer. If all these could be killed in a week campaign, 3,000 dust carts would be needed to remove the slain!
 A starfish may lay 300,000,000 eggs; and but for their enemies, which preserve the balance, these creatures would fill the world's seas in one year.
 Nature is just as prodigal with other living things that have many foes. One female fish may lay 9,000,000 eggs—this number was actually found in the roe of a turbot weighing 17 pounds.
 A pair of rats will have 100 young ones in a year, and as the young can breed at the age of four months, the family, including children and grandchildren, would number, if unchecked, 2,012 in a year. It seems that nature first invented ways of letting animals multiply rapidly, and then, becoming frightened of her handiwork, devised means for keeping them in check.
 But these figures are as nothing when we turn to the lower walks of life. Professor Loren, for example, one family of tiny microscopic creatures for five years. These minute things multiply by the simple process of splitting up into two complete living parts, and they do it once every six hours.
 During the five years the family produced 3,023 generations. Had all survived their combined mass would have been 10,000 times as big as that of the earth.
 An oyster can lay 50,000,000 eggs. Four generations, but for the work of enemies, would produce a pile of shells sufficient to outweigh our globe.
 Even in the case of such a slow breeding animal as the elephant, a pair of which will have a single young one about once in ten years, the figures are amazing. In 760 years, Darwin calculated, the descendants of one pair of elephants might number 19,000,000.

Resting Weather.
 Storms are more often in our minds than in the air. This winter season is rather nature's quiet hour, a vacation that will bear its fruit in more active seasons to come. Frost to tear at the rocks, ice to rub gravel down, melting snow and flooding rain to spread the life-containing loam over and through the earth's clay—any student can tell of these. The immortal life of our world pursues its way in the calm of winter, though more withdrawn from sight, just as in the leaping joy of spring. And, as always, beautiful beyond knowledge or deserving. It is our eyes that are dull in winter, not the sky or land. Lavender of snow shadows, purple of maple buds, laced designs of tree tops living gray against the clear, pointed fir like above melting, pointed fir like jade carvings over sunlit snow, the holy pearl and silver of late misted sunrise and the flaring red of sunsets wind-blown along the western hills, the winter days move over our world in beauty as the stars across the sky.

LOCAL NEWS.

Brief Items of Interest Picked Up by the Whig Reporters.
 Mr. Swain, piano tuner. Orders received at 100 Clergy street west.
 Edward Watts, William street, has returned home after spending the week-end in Toronto.
 Owing to two of the members being out of the city, the Utilities Commission, called for this afternoon, was postponed.
 The Bishop of Ontario is in Peterboro and began a mission in St. John's church to last throughout the week.
 The changeable weather that has prevailed in the city during the past two weeks has been the cause of considerable minor sickness.
 The deer season closes on Tuesday and the hunters are now on their way out of the woods. There was a plentiful supply of deer and all got their share.
 Through the death of her mother, Mrs. Joseph Harrison, in New York, Mrs. Everett Townsend, of this city, inherits one-third of the estate, a brother and sister also sharing. Everett Townsend is the executor.
 New table raisins, Mates, figs, new Filberts, 20c quart at Carnovsky's.
 Miss Helen Gudd, Keith McKinlon and Percy Otten, assisted in the programme at the sing-song and social hour held at the close of the evening service in Sydenham street Methodist church on Sunday evening.

TO THE ELECTORS OF THE CITY OF KINGSTON

LADIES AND GENTLEMEN:
 At the request of many citizens I have decided to offer myself as a candidate for Mayor for the year 1924, and respectfully solicit your votes and influence.
 If elected, I shall endeavor, as in the past, to serve the interests of all the people to the best of my ability.

 Every room has running hot and cold water. One-half block from Railway Station and steamboat Landings.
 J. A. HUGHES, Proprietor.
 LATE REV. W. T. WICKETT.

Former Methodist Minister at Parham Dec at Tyrone.
 Parham, Nov. 17.—A gloom was cast over this community when news received from Tyrone stated that Rev. W. T. Wickett had passed away on Sunday, the 11th. The late Mr. Wickett was a former Methodist minister here also a member of the May Flower I. O. O. F. Lodge. Sympathy is extended to his sorrowing wife and other members of the family.

The hunters are returning and report the required number of deer captured. Mrs. M. Storms fell and severely injured her hand. Mrs. W. D. Black is spending some time with her daughter, Mrs. J. W. Strader. Mrs. F. E. Davidson is on the sick list.
 Mr. and Mrs. C. H. Clow returned to Kingston on Saturday after visiting the former's parents, Mr. and Mrs. W. E. Clow. Mrs. L. B. Baleman and Mrs. Dodephe Goodfellow spent a few days last week visiting Belleville friends.
 Mrs. F. Bertin will entertain the members of the Ladies Aid Society at the home of Mrs. William Simons on Wednesday, the 21st. Miss McDonald, spent Thanksgiving at her home.
 Rev. H. K. Colman and Mrs. Colman returned from Sharbot Lake on Tuesday. They were the guests of Rev. Mr. and Mrs. Cantrell. Miss Gertrude Bertram is spending a few days in the city. She will visit Mrs. S. D. Leslie and other friends.
 Mr. and Mrs. F. W. Collins and children, Mrs. S. D. Leslie and small daughter, Kingston; Mr. and Mrs. I. C. Hartman and son Roy and Fred Clow, Long Branch, spent Thanksgiving with Mr. and Mrs. W. E. Clow.

Exceptional Kills in Quebec and Ontario

WITH the coming of the frost and the "Moon of the Falling Leaf" comes also the hunting season for caribou, moose and deer. For the past ten months, thousands of sportsmen have been longing for the return of the season. And today the season in Quebec, Ontario, New Brunswick, Nova Scotia, Alberta and British Columbia is in full swing. Once more the naked woods are echoing with the crack of the hunter's rifle and the red blood of Canada and the United States is pitting itself against the monarchs of our native wilds.
 If Quebec, good chances for deer are reported from Lake Megantic, the Laurentians, the Gatineau Valley, along the Waltham branch line of the Canadian Pacific, Timiskaming-Kipawa district and other points, while, in Ontario, Farry Sound, White Lake, Folsberg, French River,
 L. A. used hat from Northern Ontario hunting grounds.
 The head of the bull which answered the guide's call.
 Paget (for the Trout Lake Country), Lake Penage, Massey, Blind River, Thessalon, Desbarres, Mattawa, North Bay, Sturgeon Falls and Carleton Place are well favored. Moose are plentiful in Ontario in the country along the main line of the Canadian Pacific from Sudbury to the Manitoba boundary, especially near Metzgam, Biscotaing, Chapleau, Misamis, Franz, Jack Fish, Schreiber, Rossport, Nipigon, Savanna, Ignace, Dinorwic, Wabigoon and Eborac, and in Quebec in the St. Lawrence, Lake Edward, Lake Megantic, Maniwaki, Timiskaming and Kipawa districts.
 Caribou, in Quebec, may now be found only in the remote northern sections and, in Ontario, on the islands of Lake Superior and round Rossport, Schreiber and Nipigon, on the mainland.
 From all these districts come stories of wonderful luck which will thrill the pulses of every hunter. Take the good fortune of Dr. C. E. McCarty, of Montreal, and Mr. A. J. O'Keefe, of New Rochelle, New York, regular patrons of the Ste. Juste district of the Laurentians, Quebec. Penetrating some days ago from Grey Rocks Inn, at Ste. Juste, in the Deer's Lake, sometimes referred to as Lac Croix, they met several cow moose and an immense bull. The climax came when another splendid bull obligingly took up a position within 50 yards of their tent. The first shot from the doctor's trusty rifle brought him down and Mr. O'Keefe finished him off.
 Again, from F. W. Arnett's Twinship Camp, 30 miles up Lake Timiskaming from Timiskaming Station, at the mouth of Kipawa River, word comes of how Mr. J. A. Cavanagh, of New York, got his moose within an hour and a half of leaving camp, and was back within two hours and a half. Next morning, while the animal was being skinned, another big moose calmly watched the operation for five minutes from a point close by.
 After that, you can still keep your head off your rifle!
