YOUR What the World Is Doing

Hot Weather Forms Ice in

Coal Mine

During the summer, ice is mined from coal pit located in an eastern state. Cold air seeping through earth fissures in rinter cools the rocks to a temperature ar below freezing, but no ice forms beause the atmosphere is too dry. At its lepth the heat of summer cannot reach he vault. During warm months, the haft becomes moist, and when coal was seing dug there recently, it is said, the niners had to remove three or four caroads of ice every morning before they were able to get to their posts. As a re-sult, the working was abandoned as a source of fuel, leaving it entirely free for me as a natural refrigerator.

Hunters Snowshoe Over Mud to Stalk Sea Game

Skis and snowshoes are used by fishermen and hunters on the islands of the North Sea to enable them to walk over the wet and slippery mud that covers the ground most of the year. With these it is possible to travel miles over the soggy ground, inhabited by sea-dogs and water fowls, much of which otherwise would

In case seem to jut at a vast distance and, in one there is no other stump to hitch to, dis scene, the sky stretches behind a great down so as to expose the main root, and peak, a horizon line which is, in fact, a after fastening one end of the chain, wind beach cutting across the watery heavens. it around the stump, and under the root The painter's work under water is don on calfskin. Fish swim about the artist while he is at work to catch the bits of detached paint. Some of these sea deni sens are dangerous, among them being the tiger shark, the octopus, and the ray, giant cousin of the stingaree, whose weaon is his weight-a ton and a half.

Mistletoe Is Pest in South, Festive Twig Elsewhere

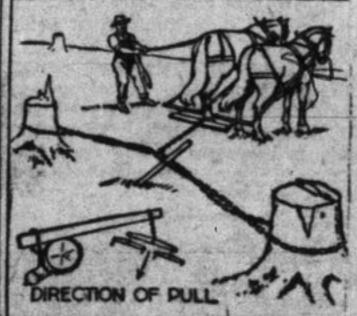

While mistletoe generally is favored as a yuletide decoration, it is regarded as a pest in the Southwest, and for the

How to Clean Tools

To keep tools clean and bright rub s little mercurial ointment over them. which will form a moisture-resisting coating. Mercurial ointment is also known as blue butter. It is somewhat poisonous so should be handled carefully. Another good mixture to keep tools from rusting is made by taking six parts of lard and one part of resin. Heat these together slowly until the resin is melted. The mixture should be heated in the open air in case of fire, and benzine added in about the proportion of one pint of benzine to half a pound of the mixture. When cool the mixture can be rubbed lightly over the bright-steel articles. Tools thus treated will resist the corrosive action even of salt water.

Effective Method of Pulling Tree Stumps

In pulling stumps a team and one or two long chains will do the work effec tively if arranged correctly. The greater the distance the stumps are apart, the
