Had a Weak Heart Was Very Nervous For Three Years

Miss Jessie Peterson, Zealandia, Sask., writes:--"I wish to let you know how much good Milburn's Heart and Nerve Pills have done for

For nearly three years I was very badly run down, had a weak heart, and was so nervous that sometimes I would almost faint away.

I heard of many people who had size from 26 to 35 at \$7.50 a suit, recommended your Heart and Nerve the regular prices of these suits Pills, so I decided to give them a were from \$9.00 to \$15.00. Prefound they had done me good, and vost, Brock street. \$5500.00-Colborne Street, solid after having taken five boxes I was completely relieved.

I cannot recommend your Pills enough, and I would advise anyone having a weak heart or troubled with has been closed and all public gathnervousness to use them."

To Burn Our Garbage. Dr. C. J. O. Hastings, the medical between Guelph and Sarnia, making health officer of Toronto, says all garbage should be burned during the winter in the house furnaces. This is the most sanitary and most economical method of garbage dis. posal. He says: "The only precaution necessary to observe is that there be a good bed of red coals in the furnace, with the drafts turned on, when the garbage is put in." Engineers say this will not hurt the furnaces. How could this plan help the garbage department of King-

CALCIUM WAFERS **BRING BEAUTY**

form a Pimpled, Muddy Skin to Pinkish Loveliness.

It was certainly a most fortunate discovery when it was found that one of the necessary constituents of skin health is calcium sulphide.

About twenty-five years ago important substance was incorporated in Stuart's Calcium Wafers and since then thousands of girls have enjoyed beautiful complexions.

This wonderful substance removes from the system the waste products

complexion disfigurements. Then the calcium is a natural aid to skin repair You cannot get this wonderful result from cosmetics or drugs nor can you have a clear, beautiful complexion without this wonderful calcium. S when you are near a drug store ask for a 60 cent box of Stuart's Calcium Wafers or send name and address to F.

Making an Inexpensive Crystal Receiver

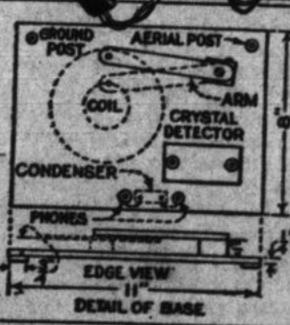

There is a wide field for a simple and inexpensive crystal detector, both among a national necessity for bankers, beginners and "old-timers." The beginbusiness men, government officials, ner does not usually want to invest much students, financiers and others. Be- money in a set, until he thoroughly unsides all the regular features which derstands the principles involved, and a have characterized the Almanac in crystal receiver is ideal for him; the more the past, and which are now brought advanced radio enthusiast, also, can use up to date, are some special fea- a crystal set to advantage as a standby tures, including the New Trade Con. for the not infrequent occasions when his vention between France and Can- large set "goes on strike"-usually when laxative regulates the tender little ada, lists of principal clubs, Boards a particularly interesting concert or lecture is "on the air."

The crystal receiver described in this article is easy to build, is always ready to use, will give excellent results up to a distance of 20 miles, and costs only about

The coil, which is of the spider-web type, is wound on a form consisting of a slotted fiber disk, & in. thick, and 5 in in diameter. There are 13 "spokes" in the form, and, if fiber is unobtainable, heavy cardboard may be used instead. Fifty turns of No. 26 single cotton-covered wire are wound on the form, the wire being led through a small hole drilled near the center of the disk and then wound on the form from the center out. over and under alternate spokes. The turns should be counted every time the starting point is passed, and, when the winding is completed, the end of the wire is passed through another small hole and drilled in the end

The coil is screwed to a small block of wood, 1 in. square and 34 in. high, which, in turn, is tacked or glued to a 1/4 by 8 by 11-in. baseboard. A bolt may be used if a hole is drilled in the small block and base, and the bolt passed through both A strip of wood, 1/4 in thick and 1/4 in

doubled end of the bared contact wire must be cleaned, and adjusted to make good contact with the coil turns. The starting end of the coil i

connected to the ground binding post, and the other end to the crystal side of the detector. The "cat-whisker" of the detects is connected to one of the phone posts the other phone post connected to the aerial post, and the condenser connect across the phone posts, all this wiring being done under the baseboard, as indicated in the drawing. A strip of wood, 1/4 by 3/4 by 8 in.,

These are heals ecsema right up.

These are light up.

The burning of discount in half and light light good results by laying three compacts are then carefully scraped off each turn along this plete turns of ordinary bell wire around the picture molding of the room, leaving the picture molding of the room, leaving the light ligh
