The writer is a composer of music the Victor Talking Machine catalogue. As a tenor, it seems very strange that he should find it tremery d.mcult on Sunday morning to sing the hymns in church. This does not apply to all nymns. to a great many, quite enough d. courage the male mempers and train a congregation in the modern that, practically speaking, two simple rules are ample for the develop ment of massed singing; first, song or hymn must be in a key calculated to let the male postion of the gathering negotiate the top notes secondly, str.ct, rhythmical, pulsat ing time must be observed, neithe too fart nor too slow, but whateve time is set must of necessity be well denned, accurately pointed. It is fallacy to think that a chorus must sing "brightly," or, in other words quickly, in order not to arag, for ! the leader will only teach the art of proper accent, slovenly blurring notes and words will not occur, and clean, crisp notes will be the re-ult giving the effect of brightness warch some think can be had only by rushing the life out of a song. From opinions gathered from

multitude of sources and from the Her Quinsy personal study of the physiology of the male voice, the writer states unreservedly that E flat is the limit for men singing the air or melody in unison, and therefore suggests that all hymns be made to abide by that rule. "Onward, Christian Soidiers," appears in the new hymnain the key of F; why not E flat? "Holy, Holy, Holy," in E natural. Why not E flat?
