

No Calomel
In Hamilton's Pills

They Relieve Constipation Without Injuring the Teeth

FINE BOWEL AID

When you want a mild sure laxative to stir up the liver and bowels, take one or two Dr. Hamilton's Pills. They are small, sugar-coated, easy to take, and effective.

Your headache will disappear, your color will improve, your appetite will increase. In a hundred ways Dr. Hamilton's Pills will do you good. Men, women and children can use this good old family laxative. Get Dr. Hamilton's Pills to-day, 25c. boxes, five for \$1.00, dealers or the Catarthozone Co., Montreal.

Do not hunt for rental signs. That is where a Want Ad shines.

USE A WANT AD

A RAW, SORE THROAT

Eases Quickly When You Apply a Little Muterole

And Muterole won't blister like the old-fashioned mustard plaster. Just spread it on with your fingers. It penetrates to the sore spot with a gentle tingle, loosens the congestion and draws out the soreness and pain.

Muterole is a clean, white ointment made with oil of mustard. It is fine for quick relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, sprains, sore aches of the back or joints, sprains, sore muscles, bruises, chilblains, frost-bitten feet, colds on the chest. Keep it handy for instant use. 40c and 75c, at all drug stores.

The Muterole Co. of Canada, Ltd., Montreal.

Settle them a mustard plaster

TELLS RHEUMATICS TO BEGIN ON SALTS

Says Excess of Hydrochloric Acid is Cause of Indigestion.

A well-known authority states that stomach trouble and indigestion are nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach ferments digestion and starts food fermentations; then our meals sour like rancid butter in a can, forming acid fluids and gases, which inflame the stomach like a toy balloon. We then get that heavy, lumpy feeling in the chest, we eructate sour food, belch gas or have heartburn, flatulence, waterbrash or nausea.

He tells us to lay aside all digestive aids and instead get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast, while it is effervescent, and furthermore, to continue this for one week. While relief often follows the first dose, it is important to neutralize the acidity, remove the gas-making man, start the liver, stimulate the kidneys and thus promote a free flow of pure digestive juices.

Jad Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salt is used by thousands of stomach sufferers with excellent results.

RED PEPPER HEAT

BREAKS BAD CHEST COLDS OVER NIGHT

Ease your tight, aching chest. Stop the pain. Break up the congestion. Feel a bad cold loosen up in just a short time.

"Red Pepper Rub" is the cold remedy that brings quickest relief. It cannot hurt you and it certainly seems to end the tightness and drive the congestion and soreness right out.

Nothing has such concentrated, penetrating heat as red peppers, and when heat penetrates right down into colds, congestion, aching muscles and sore, stiff joints relief comes at once.

The moment you apply Red Pepper Rub you feel the tingling heat. In three minutes the congested spot is warmed through and through. When you are suffering from a cold, rheumatism, backache, stiff neck or sore muscles, just get a jar of Rowley's Red Pepper Rub, made from red peppers, at any drug store. You will have the quickest relief known. Always say "Rowley's."

From ear to eye and tongue and thud and thought, reject all lewdness.

Largest Hole In the World

The most interesting diamond mine in the world is not at Kimberley, but near Pretoria—the Premier mine, "the largest hole in the world."

The great open Kimberley mine can still be seen, but the actual working there, as elsewhere in that district, has now to take place underground, as the diamond-bearing "blue" clay nearer the surface has been exhausted.

The Premier is still an open mine. It is an enormous gaping hole in the middle of the valley, half a mile long and a quarter of a mile broad, with its floor 400 feet lower than the surrounding country. St. Paul's Cathedral, London, could be dropped into it, and no one a few hundred yards from the edge would know where it had gone!

Standing on the brink of its precipitous sides and looking at the hundreds of workers far below, I felt as if I were watching a scene from Dante's "Inferno"—this particular hell, I imagine, being reserved for extremist Labor leaders for shareholders' write the Hon. E. C. Knollys.

Down below us, looking like busy ants, tiny black figures were shovelling the blasted "blue ground" and pushing about small trucks, containing the earth ready for crushing, on the network of rails which lead to the tunnel up which the trucks are dragged to the surface workings. A swinging cage takes one down to the floor of the mine. There one has a more realistic view of the work than the impressive but somewhat unreal one from the top. I experienced rather a thrill at finding myself walking on the slaty-blue earth which actually contains the diamonds. But then I realized that in every hundred of these truck-loads, each weighing a ton, only about twenty carats of diamonds would be found.

When I was there not much work was being done, on account of the slump in the diamond trade. In prosperous times there are shifts working throughout the twenty-four hours, some of the most powerful searchlights made being placed at night round the top edge of the mine.

The most impressive moment is at blasting time, which takes place every afternoon to loosen the ground for carting away on the following day. A red danger flag is hoisted in a prime place. All the workers come out of the mine except those required for lighting the fuses already placed in position. At a given signal black figures rush along the bottom side of the precipice, setting light to the fuses. Having done this, they scurry to shelter in the "bomb proofs," in the center of the mine. The interval while the time-fuses burn seems an age (in reality it is only one and a half minutes). One feels that the slower lighters will not gain shelter in time. Then one explosion, another, and then a continuous roar. Rock and earth fly into the air, sometimes almost up to the surface, reminding one of a rather ragged artillery barrage.

The famous Cullinan diamond, named after the Premier, and the mine, was found in the Premier Mine, and, in spite of its great size, over 3,000 carats, it was only part of a still larger stone. The other piece, broken off, has never been found.

The mine has had a remarkable history. When diamonds were first found on this isolated farm in 1867, the property was hawked round for sale at \$475,000. Now the cash sale is more than \$115,000,000 worth of diamonds have been extracted from the mine, and its life still appears unlimited. The capital remains at \$400,000, for all developments has been paid for out of profits. Stores and land are taken into the balance at 50 cents. A remarkable record! — Montreal Herald and Weekly Star.

REV. DR. S. D. CHOWN UPBRAIDS THE ANTIS

Charges Lack of Fair Play in Regard to Church Union.

Breaking the silence with which the Methodist church has watched the campaign of the anti-unionist party in the Presbyterian church against the consummation of the proposed union of the three churches, the Rev. Dr. S. D. Chown, general superintendent of the Methodist Church in Canada has issued a pronouncement. In this statement Dr. Chown does some plain speaking, stressing his contention that sacrifice and compromise have not been confined to any one of the negotiating parties.

"Every development in connection with the anti-union controversy," says Dr. Chown, "forces Methodists to the conviction that the opponents of union have no regard whatever for the sacred pledges made by the responsible courts of their church. They are simply in rebellion against them, and all they have done in regard to Church Union for twenty years past.

"It also appears convincing that not a stirly idea ever wanders within the horizon of their thought that Methodists and Congregationalists have any rights or interest in the movement, or that they are worthy of a particle of courtesy or respect. The publicity campaign of the anti-unionists shows that they are looking exclusively upon their own things, and never a glance do they take toward the things of others. We do not know how to account for this, except that the Methodists and Congregationalists have received in good faith from time to time the actions of the General Assembly, but I would venture to suggest to them that they are scarcely giving fair play to their own proposal for unity and co-operation instead of union."

LUMBERMEN BUSY.

The weather favorable for operations in the woods.

Northbrook, Feb. 4.—The weather last week favored lumbermen and hundreds of logs are being drawn to the mill-ground. Mr. Vogan has eight thousand ready to haul and many teams are busy. Mrs. A. W. Perkins has returned to Filbury after a few weeks' visit with her sisters, Mrs. J. L. Lloyd and Mrs. R. J. Moon. S. G. Both is in Toronto on business for the Ore Chimney Mining Company. Mrs. Leeman is nursing Mrs. W. Y. Kehoe, who is convalescing from an operation.

Miss Abernethy, Kingston, made her usual calls last week in the interest of the widows' compensation. A number are attending the Standard revivals at Harlowe.

The Young People's Club are planning on giving a concert in the near future in Filbury hall. Miss Myrtle Ellis who has been suffering with ear trouble for many weeks is gaining under medical treatment. The local stores have been fortunate in securing a supply of potatoes, sufficient for all those having to buy. J. Vogan made a hurried business trip to Tweed Saturday.

On Saturday the death took place in Toronto of Mrs. A. L. Johnston, a native of Brockville. She was a half-sister of James P. Horton, Elmsborough, and Dr. R. N. Horton, Brockville.

TELLTALTE SYMPTOMS OF WOMAN'S ILLS

Every woman who suffers from backache, headaches, dragging-down pains, nervousness, irregularities, displacements, irritability, or despondency should recognize in such symptoms some derangement of her system, which should have attention before these conditions are often evidenced by a sallow complexion, dark circles under the eyes, lassitude and sleeplessness. For nearly fifty years Lydia E. Pinkham's Vegetable Compound has been pre-eminently successful in overcoming such conditions, and it is now recognized everywhere as the standard remedy for woman's ills.

Strange Companions.

A correspondent at Sydney, N.S.W., sends the following strange story:

More than three years ago a tortoise crawled into the grounds of Marengo Chase, Morpeth, New South Wales, the residence of Captain D. J. Marshall. At the same time a bat appeared.

The tortoise and the bat were friends, and their association caused much amusement. After wandering about the grounds for three months, the tortoise left, followed by the bat.

Neither the tortoise nor the bat was seen again for three years, but recently Captain Marshall was astonished by the re-appearance in his grounds of the tortoise and the bat.

During their absence they had made a new friend—a magpie, and the queer trio now live in amity.

After an illness of nine months the death occurred at Aultsville, on Friday last, of Mrs. G. LeBarr, widow of G. LaBarr, who predeceased her four years ago. The deceased had reached her seventy-third year.

William G. Hunt, Brockville, died on Saturday, aged seventy-one years. He was a commercial traveller. Two sons survive.

THE PARTY LEADERS IN ONTARIO LEGISLATURE

HON. HOWARD FERGUSON
Premier and Leader of the Conservative Party.

WHY THE WEATHER?

Weight of Snow on Roofs.

How great is the weight of accumulated snow and ice which roofs must support in winter. In the northeastern United States and eastern Canada about the maximum to be expected is 50 lbs. per square foot on a flat roof, which is the weight of a layer of water nearly 10 inches deep. Near New York architects allow for 40 lbs. per square foot. A steeply sloping roof will provide a larger receiving surface for a given amount of snowfall, and so will have to support less per square foot than a horizontal roof. Another advantage of the steep roof is that it facilitates the sliding off of snow and ice, though in cities wire snow holders are commonly used to prevent this. In the Sierras and Cascades the weight of snow may reach 250 lbs. per square foot, a ton for every 8 square feet, or three times the maximum for eastern North America. It is not surprising, then, to find houses built with very steep roofs in such places as Crater Lake, Oregon. Objects buried in deep snow are often wrecked by the pressure. For instance, the Weather Bureau observer at Summit, California, reported that the substantially built steel and sheet iron rain gauge looked as if a tornado had struck it when he dug it out of the snow in March, 1915. Even the guy wires were broken.

Collapsing of roofs occurs in unusually snowy winters, especially where snowfall is usually light and where consequently a relatively less substantial type of construction is the rule. For example at Seattle, Wash., Feb. 2nd, 1916, on the third day of a heavy snowstorm following previous snows, the dome of the St. James' Catholic cathedral collapsed under the weight of 2 1/2 feet of snow. The tragedy attending the collapse of the Knickerbocker Theater in Washington, D.C., occurred just before the end of the 28-inch snowfall of Jan. 27th-28th, 1922. When the added weight on the roof had reached about 15 lbs. per square foot.

MALORYTOWN NEWS.

Four Young Men Skate Across River to Alexandria Bay.

Malorytown, Feb. 4.—The Consolidated school will re-open Monday after being closed a few days owing to a number of cases of scarlet fever. Mr. and Mrs. Wilfrid Guild moved from Rockport on Friday and will take up residence at Adressburg. Mr. Guild has been engaged as customs officer at Rockport for the past few months during Mr. Fitzsimmons' illness. Leon Hagerman will occupy his new house in a few days. The baseball club are holding another club dance on Feb. 8th. Fred Purvis, Kenneth Ferguson and Ernie Grothier, accompanied by Allen White, skated from Rockport to Alexandria Bay, N.Y., to attend I.O.O.F. Lodge on Friday evening last. William Mallory has accepted a position as general agent with Gould, Shapley and Muir, Brantford. Miss Lettie McDonald will leave for New York in a few days to practice her nursing profession. William Guild left for Detroit a few days ago.

Strathcona Encampment, No. 35, I.O.O.F., will hold a public installation of officers on Feb. 11th. This was to take place on Jan. 28th, but owing to I. J. Moore, D.D.G.P., being confined to his home with blood poisoning the event was postponed. C. W. Mallory, Kingston, was in the village a few days ago. Cecil Brown returned from Kemptville after taking in the short course on motor mechanics at the Agricultural school. Fred Nolan has installed a radio in his house. William Brown has purchased the McDonald farm from J. G. Ruttle. Norman Hutchison has also purchased part of Joan Hagerman's farm at Quabbin.

Ignorance is the mother of impudence.

AGED CORNWALL MAN DEAD.

James C. Johnstone Built Many of Town's Buildings.

Cornwall, Feb. 6.—The death occurred here of James C. Johnstone, builder and contractor, Sunday evening. Mr. Johnstone was born in Scotland 87 years ago, and has been a resident of Cornwall for about seventy years. He built many of the buildings in town and district, and supervised the erection of the Cornwall General Hospital Nurses' Home. For many years he acted as assessor of the town, and only resigned when old age made it imperative. He was a life governor of the General Hospital. His wife predeceased him ten years ago. Surviving are two daughters and a son, Miss Eva Johnstone, at home; Mrs. J. E. Smart, Port Hope, and Fred Johnstone, manager of the Bank of Montreal, at Fenelon Falls, Ont.

Mrs. James Stapley, Sidney township, is dead aged sixty-five years. A husband and eleven children survive.

A Tall Pine that stands as a sentinel on the Madawaska River, near Calabogie, and over 200 years old.
