

## BURNS MAKES TWO CHARGES

### Regarding Illegal Traffic in Whiskey And Drugs.

## HIS AGENTS CALLED OFF

### When the Trail Was Leading to Men "Higher Up" in the United States.

Washington, D.C., April 5.—William J. Burns, director of the bureau of investigations of the department of justice and a close personal friend of former Attorney-General Daugherty, appeared yesterday as a star witness before the senate commission investigating the department of justice. His testimony, dealing chiefly with alleged illegal traffic in whiskey and drugs, created a real sensation.

Burns made two direct and serious charges. He stated the investigation that agents of his bureau had made of the embezzling of "dope" into the federal penitentiary at Atlanta has been called off at the instance of Rev. Heber Votaw, brother-in-law of the late President Harding and superintendent of prisons, at a time when the trail was leading to men higher up who controlled the source of supply. He expressed the firm conviction that had the investigation continued, the dope ring would have been smashed.

Taking up whiskey deals, Burns testified that his agents had been called off, as he understood it from Attorney-General Daugherty, at the request of the treasury department, and that this had happened also at a time when in connection with the investigations of conditions in New York the trail was leading to "very prominent men."

## Married Mothers' Rights.

London, April 5.—General support was given in the House of Commons yesterday by Mrs. Winstanley's bill which was read a second time. The bill provides that the mother of every legitimate infant shall be a guardian jointly with the father and have equal authority, rights and responsibilities.

## HAVE PROOF THAT TWO MEN WERE IMPLICATED

### In the Montreal Bank Holdup and Murder—Three More Suspects Detained.

Montreal, April 5.—Proof that two men held by the police as suspects were implicated in the attack on the Bank of Hochelaga's collection car last Tuesday when the bank chauffeur was killed, one bandit slain and \$142,288 stolen, is understood to have been secured by detectives who yesterday detained three men in connection with the case, bringing the total in the case to eight men and two women. Masks found in the bandits' abandoned automobile, a cloth discovered in a west end house and declarations made by some of the suspects are stated to be the cause of the detention of three of the men who were taken by the detectives today.

First seeding of the year in southern Alberta was reported Friday from Masinasin and Kippenville, in the Milk River district. Summer-fallow land is full of moisture and the early spring outlook is highly encouraging.

Work on the land has been started at several points in southern Manitoba, and seeding is reported from Gretna.

## "You Said It, Marceline!"

By MARCELINE DALROY  
On "More or Less Wonderful Women."  
CLOTHES may make the MAN,  
But WOMEN often make the CLOTHES.  
Sometimes by HAND, sometimes By MACHINE, Sometimes By ACCIDENT, but more often By DESIGN.  
For a PRETTY woman "MAKES" Her clothes MOST successfully Who puts HERSELF RIGHT in them,  
PROVIDED, of course,  
She leaves a LITTLE out,  
Just ENOUGH of HERSELF For us to detect  
What a CHARMING creature She REALLY is.

## SALESMAN IS KILLED IN ATTACKING BANDITS

### Who Held Up Bank at Bellmore, Long Island, and Took \$6,000.

New York, April 5.—The town of Bellmore, Long Island, was thrown into wild confusion yesterday afternoon, when at 12.30 o'clock six bandits in a blue automobile held up the Bellmore Bank, grabbed \$6,000, shot down and killed a New York bond salesman, who valiantly tried to halt them unarmed, and escaped after firing a fusillade of bullets.

Ernest L. Whitman, of Rutter and Company, 14 Wall street, is the man killed.

## PITTSBURG WINS.

### United States Hockey Honors—Imported Canadian Players.

Pittsburg, Pa., April 5.—Pittsburg last night won the national amateur hockey championship of the United States by defeating Boston 4-1. The score was 8 to 1. Pittsburg scored three goals in the first period, two in the second and one in the last, while Boston scored in the third period. The Pittsburg team was composed of players imported from Canada.

## PROPOSE A COMBINE OF HYDRO INTERESTS

### At Niagara Into One Unit for Administrative Purposes—Ontario Bill.

Toronto, April 5.—An important bill, introduced by Premier Ferguson in the legislature yesterday afternoon, proposes to amalgamate all the hydro power interests at Niagara into one unit for administrative purposes. At present there are three units, the Ontario Power Company and the Electrical Development Company, both of which were purchased by the Hydro, and the hydro development built by the commission itself. The premier said that bringing them together would reduce the overhead and prevent overlapping. The difficulty of taking this action sooner had been a debt of \$4,000,000 against the Ontario Power Company. The government, by guaranteeing these debentures, had got rid of the difficulty.

Hon. James Lyons got second reading for a bill to tax improvements in unorganized territory. The act is to get revenue from summer hotels and resorts conducted in Northern Ontario.

Several members thought they could see a clash between Ontario and the Department of Justice at Ottawa in Hon. Charles McCrea's bill establishing a mining court for Ontario. The minister said that the jurisdiction of the mining commissioner after patents had been issued had been questioned, and he proposed to make the commissioner's body a court and ask Ottawa for approval.

Second reading was also given the bill providing for larger subsidies for township roads and also giving such municipalities greater rights of expropriating gravel pits. Hon. W. F. Nickle introduced a bill to put the incorporation of insurance companies under the provincial secretary. He informed the house that the administration of the Insurance Act would remain with the Attorney-General's Department.

## Smallpox in Brockville.

Brockville, April 5.—The number of cases of smallpox originating in the seminary here of the Standard Church of America rose to five yesterday, when Mrs. H. Beatty, Ontario, Que., and F. Crawford, Bloomfield, students at the institution, were removed to the isolation hospital. There have been nine cases of smallpox since the inception of the outbreak here.

Peterboro disapproves of the proposal that the Ontario government give a bonus of \$1 on Alberta coal coming in.

## THE BATTLE AGAINST TUBERCULOSIS.

### Evidence That Cannot Be Disputed Is Forthcoming Daily of the Evils of Neglecting to Cope Effectively With the White Plague.

The clergymen of America are preaching from their pulpits the new Health Gospel. The clergymen of Kingston are equally willing to do the same.

"The Awakening" is slow, but that it is surely coming is demonstrated by the offers of all classes to aid in the K.T.A. to attain its object.

Think of the poor victim of tuberculosis hearing and reading about all that should be done while he still suffers on in his hopeless misery. Hope deferred helps to hasten the sufferer's end.

Let a mighty effort be made to realize the only hope of the unfortunate sufferer from tuberculosis—Free Sanatorium Treatment.

The poorest can help as well as the richest by raising a united voice on behalf of the helpless.

This is the day of preventive medicine and by that we mean the taking of every step possible to prevent disease and especially to prevent its spreading when it is present, by every means in our power. The preventative methods apply, of course, particularly to those diseases which we call infectious and contagious and here the old sayings that "a stitch in time saves nine" and that "an ounce of prevention is worth a pound of cure," particularly and quite appropriately apply.

Some of those contagious and infectious diseases should not longer be in our midst except in rare cases as smallpox and diphtheria, for there is in these two conditions a positive means of practically eradicating them from the district, in the first case by vaccination, and, in the other by toxin-antitoxin. In the same class with these we might also mention typhoid fever and whooping cough. There are other contagious and infectious diseases that can be greatly prevented from spreading by isolation and are compelled to be isolated by quarantine, but there are still others very infectious which do not call for quarantine, and the one of which I particularly wish to give some information, namely, tuberculosis, is so very widespread that fully ninety per cent. of all people have or have had it in some form or another. This should get us all thinking as to how we can best aid in the stamping out of this disease, which, if taken early, can be cured, and which can certainly be prevented from spreading as it has been doing.

It has been stated by some of the best authorities that practically all persons who have tuberculosis, either active or dormant, contracted it while they were infants or very young children, and that in those who survive this early infection the damage done becomes quiescent and remains so until such time, in later life, youth, manhood or old age, as some condition in the state of health of the person arises which stirs up this quiescent or dormant disease, or focus and a further spread of the condition occurs in many persons previously infected, following on attacks of the influenza epidemic of 1918 and among many who were gassed in the great war, and following an attack of pneumonia.

(Continued on Page 11.)

## RESENT U.S. EFFORT TO BUY CHURCHES

### That Have Been Abandoned in London—Much Indignation Is Expressed.

London, April 5.—The movement on foot among wealthy and influential members of the American Episcopal church to move some of London's superfluous churches, stone by stone, to America caused a flurry of indignation here when it became known that informal advances actually have been made.

The churches involved are those built in the 17th century in the heart of London, many of them being beautiful examples of architecture of the period of Sir Christopher Wren. Since the 17th century, however, the "city" has become a roaring centre of trade and finance where property is valuable and is as hard to get as in Wall street or La Salle street.

British financial interests, cramped for room, have been agitating that some action be taken regarding the useless but beautiful churches and one suggestion has been that they be removed somewhere else in England.

Wealthy American Episcopalians, responsible for the informal suggestion that the churches be taken to the United States, would be glad to get them at any price, especially four built by Wren, now in the heart of the financial district, which are not being used.

## PROGRESSIVES FAIL TO GET INFORMATION

### As to Tariff Matters—Premier King Is Keeping His Counsel.

Ottawa, April 5.—The announcement that the budget statement will be made not later than the Tuesday before the Easter adjournment again raises speculation as to what the prime minister really intends to do in the matter of the tariff. He is keeping his own counsel and emissaries to him relate that they cannot get anything definite as to tariff reductions.

The house was occupied yesterday afternoon with the discussion of the agricultural estimates, and the minister in charge, the Hon. W. R. Motherwell, had to face a fire of questions, mostly from the Progressive benches, which the minister replied to in his usual good-natured manner, and some progress was made.

Royal assent was given the interim supply bill, voting one-sixth of the estimates for current expenses in the Senate this afternoon. The Right Hon. Sir Louis Davies, Chief Justice of Canada, gave the royal assent in the presence of senators and members of the House of Commons.

## CARRY FIGHT INTO THE U.S.

### Against the Chicago Proposal to Drain Great Lakes.

## ONTARIO LEGISLATURE

### Calls on the Dominion Government to Use Every Effort in Restraint.

Toronto, April 5.—The Ontario Legislature yesterday afternoon unanimously passed a resolution proposed by F. H. Keefe, Fort Arthur, that "this House respectfully urge upon the Government of the Dominion of Canada to use every means within its power with the United States to restrain the city of Chicago from illegal and improper diversion of water from the international waters, in which Canada, and particularly Ontario, are so vitally interested," and further, "that this legislature also recommends that the Government of Canada should request the Government of the United States to take and exercise control of the works which permit of any diversion at Chicago, instead of allowing same to be under the jurisdiction of one interested party only."

Premier Ferguson heartily supported the resolution, as did W. E. N. Sinclair for the Liberal Party and Hon. Beniah Bowman for the U.P.F. Mr. Keefe said that the original agreement permitted of 4,000 feet per second to be allowed for the Chicago drainage canal. "Now 10,000 feet per second is being used, and Canada has allowed the matter to drag along without a great protest," said Mr. Keefe, adding that there was no blame to be attached to Ottawa, which was protesting vigorously now. The resolution by the Legislature was simply to strengthen the hand of the Dominion Government.

"We must publish from the house our own grievance. I do not think that the people of Canada realize the great injury being done and the danger of Great Lakes navigation from this diversion. We must enlist with us those in the United States who do not believe in this wrongdoing. According to a report made by United States Secretary Simpson, this diversion of water means a lowering of the water levels in Lake Huron and Lake Michigan 6.9 inches, Lake Erie 5.4 inches and Lake Ontario 4.5 inches. The Canadian Marine Association claims the reduction to be greater. It means increased freight rates, because ships won't be able to carry capacity cargoes through the shallow canals. The Lake Carriers Association estimates the loss to be \$90,000,000.

Water Used for Power. Chicago, he said, originally got the water for the canal on the grounds of sanitation. Now it was frankly admitted that the water was being used for power, and that a

million a year was being made out of it. "There are better systems of sewage disposal to-day than by dumping with water, as Chicago is doing," said Mr. Keefe. "But they are developing 40,000 to 50,000 horsepower with the water. That same water run to Niagara would produce 800,000 horse power and 200,000 more on the St. Lawrence. We are asked to sacrifice 500,000 horsepower for 50,000 horse-power in Illinois, which is wanton waste. We must help the Dominion Government in pressing upon the United States Government the suggestion that it should keep its own unruly child in order, stop this water piffing, and keep from violating international treaties. Chicago could well install a sewage disposal plant as Toronto has done.

Mr. Sinclair said the matter was of vital importance, and thought the legislature could well pass the resolution to stimulate public opinion so that the welfare of the country and the province could be properly protected.

The prime minister said the legislature could well give the matter attention in view of the fact that vital decisions were pending at Washington on the matter. He was ordinarily opposed to making resolutions to pass on to the federal Government, but the importance of this subject justified the action. He was willing to see that Ontario had a representative at Ottawa to assist the federal authorities. "This action of Chicago, if continued, would destroy the greatest inland waterway in the world, and the great channel of commerce for both United States and Canada," said the premier.

"If we reduce water transportation it puts us more at the mercy of the railways. This diversion in power means a loss of one-half of what the Chippewa produces."

"We are face to face with the problem of providing more power in the immediate future," the premier added. "We have several alternatives, a new canal at Niagara, development in the St. Lawrence or the Ottawa, and steam generation. I do not like to adopt the latter policy. This matter is so vital that it strikes at the future of Ontario, and we are more than justified in this protest, to be made through the federal Government."

The resolution carried without a dissenting voice.

## Suing For Divorce.

Los Angeles, Cal., April 5.—Charging that his wife deserted him on October 30th, 1920, Douglas P. Stewart brought suit for divorce in the Superior Court here against Edith Winifred Stewart, whom he married in Ottawa, Canada, on December 17th, 1900. The Stewarts have five children.

Thomas Flaherty, Fort William, Canada's oldest newsie, is dead, after a week's illness from pneumonia. He was ninety-one years of age, and had served in the British Army in India for twenty-one years.

The Spanish government has suggested the cancellation of the contemplated visit of King Ferdinand and Queen Marie of Rumania to Madrid this month.

It is announced that 30 per cent. of those unemployed during the winter months in Toronto were not bona fide residents and therefore not entitled to any special consideration from the city.

## HOPES U.S. AND CANADA WILL BUILD A CANAL

### So That the Ocean Ships May Go Far Into Their Interior.

Manchester, Eng., April 5.—Frank B. Kellogg, United States ambassador to Great Britain replying to a toast to his health at a dinner given in his honor by the Manchester branch of the Anglo-American society here last night, expressed the hope that in the not far distant future Canada and United States together would build a St. Lawrence river canal, enabling ocean going ships to go from Manchester far into the interior of United States and Canada.

Mr. Kellogg said that the growth and advancement of the civilization of the world had followed great lines of water transportation. Referring to the European difficulties, the ambassador declared that the United States never had turned a deaf ear to the call of humanity and was certainly not indifferent to the conditions of Europe.

## CALLS ON U.F.O. TO CONDEMN ROTTENNESS

### R. W. E. Burnaby Wants Farmers to Let Public Know Where They Stand

Toronto, April 5.—R. W. E. Burnaby, former president of the U.F.O. and former president of the Canadian council of agriculture, discussing the recent disclosures before the public accounts committee, calls on the United Farmers of Ontario to condemn rottenness and wrong doing, "let the books fall where they may."

In a letter to the Globe he says in part: "In view of the recent charges and insinuations made on the floor of the house at Queen's Park, as well as the editorials and other articles in the public press, I feel that organized agriculture should speak in no uncertain voice and let the public know where it stands."

## PROGRESSIVE PARTY CONVENTION IN JUNE

### Hon. Mr. Doherty Will Then Relinquish the Legislature Leadership.

Toronto, April 5.—Hon. Manning Doherty stated last night that the convention of the Ontario Progressive party will be held in Toronto on June 6th next.

At this meeting it is expected that Mr. Doherty will relinquish the leadership of the party in the Ontario legislature. Mr. Doherty, when he took the leadership in January last, said then that he would hold it for this session only. He has not changed his mind in that respect, he said last night.

At the time Mr. Doherty accepted the temporary leadership, it was understood Mr. Drury would be chosen permanent leader at the June convention.

## Hudson's Bay Railway.

Winnipeg, April 5.—Delegates from Alberta, Saskatchewan and the states of North Dakota and Minnesota, joined in expressing their wholehearted support to the completion of the Hudson's Bay railway at the earliest possible date at a meeting of "On to the Bay Association" here last night. Insisting that the dominion government make good its pledge to complete the road, a resolution was unanimously endorsed by the meeting.

C. M. Manly, artist, Toronto, is dead, following an attack of bronchitis.

## SAID TO BE AT DETROIT

### Matthews And Mason Are the Key Witnesses

## TO THE BOND ENQUIRY

### No Charge Against Either of Them—Free To Go Where They Like.

Toronto, April 5.—The Globe says this morning: Charles A. Matthews Jr., suspended deputy provincial treasurer, and L. C. Mason, son-in-law by marriage of Matthews, are said to be in Detroit. Both these men are the key witnesses to investigation now going on before public accounts committee and in the opinion of those conducting the enquiry can give the best available evidence in connection with the bond deal manipulations.

Matthews left Toronto a week ago yesterday afternoon, leaving his car on one of the streets in the downtown district. Mason went away from this city on Tuesday, March 25th going from here to London where he remained until he joined Matthews in Detroit.

Both these men, it is felt, have vital information which goes to the root of the whole inquiry proceeding in Queen's Park, as there has been no charge laid against either of them. They were, prior to leaving Toronto, and are now at liberty to go where they like.

## Declares School Girls Are Aides to Bootleggers

Louisville, Ky., April 5.—Charges of P. G. Miller, federal prohibition agent for Kentucky and Tennessee, that Louisville high school girls were "cutting" classes and using their automobiles in illicit transportation of liquor for bootleggers, brought a quick denial yesterday from S. B. Tinsley, principal.

Dr. Miller asserted that a group of girls were operating for wealthy bootleggers on a salary basis. Mr. Tinsley said he did not believe it and called on Mr. Miller "to give the most definite information regarding this matter" in justice to the girls and to the Louisville board of education.

## TEN PERSONS INJURED WHEN TRAINS CRASH

### C.P.R. Passenger Train Collides Head-on With a Work Train.

Montreal, April 5.—Ten persons were injured, one of them seriously, when the Canadian Pacific Railway through passenger train from St. John, N.B., to this city crashed head-on into a work train on the C.P.R. tracks two miles east of Foster, Que., yesterday. The victims include six passengers, the engineer who was the one seriously hurt, and the cook on the passenger train together with two men on the work train. The engineer of the latter train leaped clear just before the smash and escaped without a scratch. The engineer of the passenger train suffered a broken hip, broken ribs and cut about his head and face.

Detroit is to have artificial ice arena.

## THE WORST THING AGAINST CANADA

WRITTEN FOR THE WHIG BY ARTHUR HUNT CHUTE.

The worst thing against Canada is the yellow-streak in some of her citizens.

Of late, we have had an epidemic of "cold feet" sweeping across this dominion.

Out west I met innumerable citizens who were forever assuring me, "There's nothing wrong with the west." Which is only another way of saying that in their panic-stricken souls they believed there was something wrong.

Talking about the various epidemics to which we are subjected, measles or small-pox are easy compared to a dose of "cold feet."

In the post-bellum period of reconstruction our gravest troubles have been, subjective, no objective. If morale is three to one, what can we expect where the morale is low?

This is the same Canada that one of the prophets of Greater Britain referred to as, "The brightest gem in the British crown."

This is the same Canada that United Empire Loyalists turned to, as their day star in the darkest night.

This is the same Canada for which Lord Selkirk and his Highland settlers toiled and dreamed.

This is the same Canada that took to her arms hosts of starving paupers from the penitentiaries of Europe, and made them, into the folk of wealth and substance. To hear some of these same folk complaining against Canada is to be reminded of those who bite the hand that feeds them.

In Montreal, I encountered one of our literateurs, who has become a national Jeremiah. "This country is going to the dogs," was his continual wail. Thanks to the politicians, and other stock curses, he declared our future utterly hopeless.

(Continued on Page Three.)
