Many A Child With **Defective Vision**

Gets attention in every way except a consideration of the eyes. It is taken for granted by the parents that the child's eyes are perfect, unless he complains of his inability to see. It is beginning to be appreciated how great a mistake this is, for it is now known that serious errors of vision are present in childhood without indication of it. Parents the above deserves your best thought.

WRITES "SOME" LETTER

In Reply to an Advertisement Offering an Organ For

From time to time people who advertise articles for sale get some very funny replies. A lady who reeently came from England to reside in Kingston handed the Whig a copy of a reply which she received to an advertisement which she placed in an English paper to the effect that she had an organ to sell. We publish a correct copy of the letter and also what we think is a correct translation. The letter is as follows:
