Late Lawson Babcock, Odessa, Had Reached His Eightleth Birthday Anniversary.

Odessa, June 9 .- The funeral of the late Lanson Babcock was held from D. E. Smith's residence, Sunday afternoon. Mr. Babcock passed away on his eightieth birthday anniversary. Mr. Bray, Newburgh, conducted the funeral services. The remains will be interred in the family plot in Wilton cemetery. Mrs. John Mancur, accompanied by her sister, Mrs. Riley Lee, are visiting relatives in Kingston.

Bernard Oswald attended the funeral of his cousin, Miss Donohue Kingsford, last Tuesday. Mr. and Mrs. Stanley Holmes and little daughter, Altce, spent Tuesday with relatives in Napanee.

Mr. and Mrs. Charley Wallace, Stover, spent Sunday with friends in Camden East,

Quite a number attended the private picnic held at Parrott Bay, on June 3rd, and all reported a very pleasant day. One of the features, and a very important one, was the abundant supply of delicious edibles furnished by the ladies who all understand how to prepare something good to eat. The high school picnic was held also on the holiday at

The Camper's Lunch-Box Set

Binding Post

2-PARTS USED.

of the design and specifications of our "lunch box" portable set. Today we show the hook-up, and give a list of the parts needed in its construction.

The hook-up is shown above, and is a simple regenerative hook-up, with a conventional one-stage amplifier hooked on behind.

The primary circuit "P" is of the untuned, close-coupled type, and con- These were chosen for their small size. sists of ten turns of wire wound over one end of the tuning variometer "V- tubes. 1". This variometer is used as the whole tuning inductance, no coupler or vario-coupler being used in addition to it. The grid condenser as illustrated tran was used in the set shown. as a .00025-mfd. condenser, and the grid leak is of a fixed value of from 1 1-2 to 5 megohms-the correct value to be determined by experiment. The plate variometer "V-2" is used to secure regeneration and oscillation, and is similar in type to "V-1." There is a .001 mfd. fixed condenser across the primary of the audio transformer and the "B" battery. No rheostat is used, 3-16 inches thick. but if desired, one of the 25-ohm resistances may be placed on the back of the panel. The audio stage is connected directly to the detector, and no jack

plifier will be used also. The elimina-Yesterday we told in a general way tion of the detector jack, in addition, simplifies the construction of the set. The parts needed are as follows:

One tin lunch-box: dimensions of the lower half, which will contain the set, should be not less than 10 inches long, 4 5-8 inches wide, and 3 7-8 inches deep: The curved top part is used to carry the "A" batteries,

Two Coto-Coil midget variometers. Two bakelite sockets for UV199

One audio transformer. This may be of any type that will fit into the space behind the sockets. An Ameri-

One .001-mfd. fixed mica condenser. One .00025-mid. fixed grid condenser, with grid-leak clip attached.

Five small brass angle fastenings. Two 3-inch dials. Seven binding posts.

One single jack.

One panel-dimensions 9 13-16-inches long, by 4 5-8 inches wide, and One wooden base-dimensions 9 3-4

inches long, by 3 5-6 inches wide, by 1-8 inches or 3-16 inches thick. As we are going to use this wiring
