

What the World Is Doing

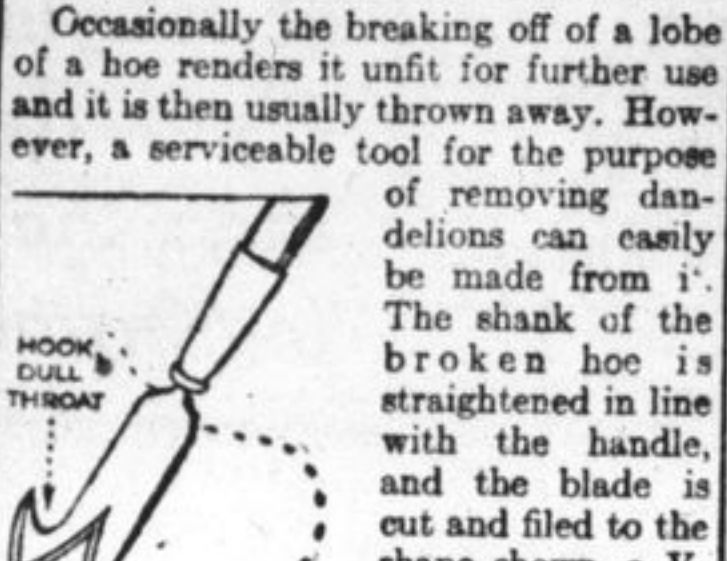

As Seen by Popular Mechanics Magazine

Golf Charts Teach Strokes and Standing Positions

To check the game of experienced golfers or to teach beginners, a set of six charts, printed with directions and illustrations showing correct standing positions, grips and strokes, and other fine points, has been devised. With them, one may read a lesson in golf technique and follow it at the same time. Printed on heavy paper, the charts are to be placed on the floor. Standing over them with club in hand, the player is able to get the proper grip and position and execute the stroke in correct form. The diagrams afford a constant check and means of comparison for accuracy in every detail.

Occasionally the breaking off of a lobe of a hoe renders it unfit for further use and it is then usually thrown away. However, a serviceable tool for the purpose of removing dandelions can easily be made from it. The shank of the broken hoe is straightened in line with the handle, and the blade is cut and filed to the shape shown, a V-shaped notch being cut in the end and filed to a sharp cutting edge. One of the points is cut to form a pulling hook, the throat of which is, of course, dull. A tool of this kind is very handy, as it can be used to cut the dandelions at their stems or pull them out entirely.

New Theory of Radio Is Advanced

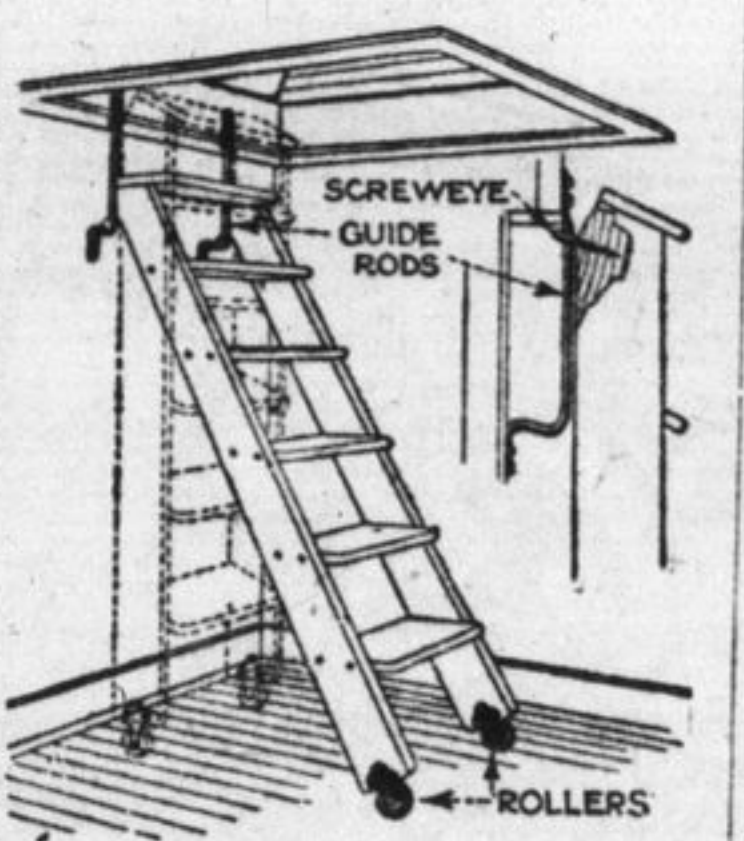

In the opinion of Carl Pfanstiel, a Chicago radio engineer, the wave theory of radio will soon be exploded completely, and the radiant-energy theory take its place in explaining radio phenomena. Mr. Pfanstiel is of the opinion that there is no such thing as "ether" as commonly referred to. He says that what are usually spoken of as radio waves are undoubtedly particles smaller than an

Serviceable Dandelion Hook

Occasionally the breaking off of a lobe of a hoe renders it unfit for further use and it is then usually thrown away. However, a serviceable tool for the purpose of removing dandelions can easily be made from it. The shank of the broken hoe is straightened in line with the handle, and the blade is cut and filed to the shape shown, a V-shaped notch being cut in the end and filed to a sharp cutting edge. One of the points is cut to form a pulling hook, the throat of which is, of course, dull. A tool of this kind is very handy, as it can be used to cut the dandelions at their stems or pull them out entirely.

Portable Garret Step

In bungalows where limited space does not permit built-in garret steps, a "folding" stepladder of the kind shown in the drawing has been found very convenient. It is made of 1 by 3-in. lumber, the risers being set between the sides at such an angle that they are perfectly horizontal when the ladder is pulled away from the wall. Two large screweyes fastened to

the top of the ladder are used to hold it on the two vertical guide rods, which are permanently attached to the wall; this arrangement allows the ladder to be raised and lowered to the positions indicated. A couple of casters provided on the feet of the ladder facilitate the work of pulling it out from the wall and pushing it back again.

Can the Skin See, Is Query

That human skin has powers of vision which to a great extent have been lost through years of neglect, is the theory of a French scientist. A series of experiments conducted by him are said to support this belief. The sensitivity of the skin and underlying tissue with its intricate net of nerves is well known, but no one heretofore has supposed them to be capable of picking up light waves in a manner comparable with the process of seeing.

HAD A FISHING TRIP.

A Tichborne Contingent Were at Crow Lake Dance.

Tichborne, June 6.—The farmers are through seeding and planting. The showers on Friday were welcomed by all. William Kennedy has a gang of men working on the road. The Ladies' Aid meeting was held at the home of Mrs. William Steele on Wednesday last. They intend holding a bazaar in the near future. Mrs. Moyce is putting on a missionary play in the Orange Hall. The stork visited the home of William Allison on Sunday last, and left a wee baby boy.

Jack Kennedy, Joseph Steele and George Goodfellow motored to Kingston on Friday last. Mr. and Mrs. William Steele and family also Mrs. Joseph Steele motored to Verona one evening last week. Ford Swerbrick, Sydenham, spent the week-end with his parents. Mr. and Mrs. T. H. Swerbrick, Mr. and Mrs. G. H. Goodfellow, also Mr. and Mrs. Edward Hayes spent a day at Crow Lake dam fishing. Mr. and Mrs. A. Kennedy, Jr., and family at Alfred Steele. Mrs. William Swerbrick at her mother's, Parham. Mrs. John Steele, Sr., has returned after spending a few weeks with her daughter, Mrs. Harold Peters, Napanee. Mrs. A. McGregor at Mrs. Alonzo Kennedy's, Sr.

WASNT STUNG!

No, he isn't a Cossack. He is a bee-keeper. And Frank Borshofer of Toronto, O., is just proving honey bees rarely ever sting. He has over 200 colonies of them. This helmet he is wearing is composed of living members of those colonies. And he didn't get stung.

LEE VALLEY NEWS.

A Cheesemaker Has Been Secured From Gananoque.

Lee Valley, June 6.—Kenneth Armstrong has secured a position in Espanola paper mills. A party of young people met at the home of Mrs. Hunt for a sociable evening Saturday. Clifford Root is helping Thomas Coburn for a few days. Miss Rowse, Miss Bell, Mrs. L. McKnight and children and Miss M. Root were visiting at Mrs. Volker's, Tuesday. The Lee Valley boys played baseball for practice on Tuesday. A small dance at night was well enjoyed.

Mrs. Hicks and Mrs. Adams were planting a border in the graveyard, Wednesday. W. McKnight has five team drawing lumber to Massey. The Women's Institute meeting held in the hall was well attended. Considerable business was straightened up and plans made for June 19th when the convention of delegates from the different branches will meet at Lee Valley.

Walter Molleson has returned from Little Current for a few days. Mr. Hampton has made considerable improvements on the little store. Mr. Jackson, Gananoque, has been secured as cheese-maker for Lee Valley the factory starting Tuesday. Miss Eleanor Waram has gone to Espanola to work for Mrs. Claud Caldwell. Alexander Caldwell is staying at his grandmother's, Pleasant Valley.

Mr. and Mrs. Jason Caldwell, Mrs. Dave Stevens and Myrtle and Miss Brett motored to Lee Valley and Birch Lake on Tuesday in Miss Brett's car. Miss Helen Andress is spending a few days in Espanola. Claud Hampton has gone to Sudbury.

VILLAGE OF ATHENS.

Business Places Close Wednesday Afternoons During Summer.

Athens, June 10.—Under Woman's Institute auspices, Mrs. Maman Campbellford is expected to address a public meeting here.

Places of business are closed at noon on Wednesdays during June, July and August.

While riding a bicycle Sunday night, Frank Robinson, aged ten, was struck by an auto, the result being a fractured leg and a demolished wheel.

E. C. Neff, B.S.A., Mrs. Neff and family have gone to Western Ontario to visit friends and attend some meetings in the interests of agriculture.

"Go-To-Sunday-School" day was duly observed here on the 1st inst. One item particularly worthy of mention was the pageant, "The Building of a Nation," for the presentation of which our local artist, C. C. Black, prepared an artistic painting.

On Thursday last at the meeting of the W.M.S. in the Methodist church, Miss Dora Klyns gave a comprehensive report of the recent sessions of the Montreal conference branch meeting at Ottawa. Another feature was a song and pageant, "The World's Children for Jesus" by nine Mission Band girls.

Members of the Baptist congregation are busy preparing for the sessions of their annual association meeting to be held here the third week of June.

Thirty Years of Dunlop

Experience Certainly Tells in Making Tires

You cannot go astray in your tire purchases if you buy this kind of experience:—

1894-1924

DUNLOP TIRES

30 Years in Canada

Many a man is driving a motor today who was not born when Dunlop Tires first appeared on the highways of Canada.

Thirty years is a long time in the Tire business. It is the very beginning of the industry. 1888 saw the world's first pneumatic tire; 1894 saw the industry taking hold in Canada.

Doesn't it stand to reason, in view of the above facts, that we must be better equipped and better qualified to serve the exacting demands of Tire users?

Knowing the past of the Tire Industry so well, we must have pretty good intuition regarding not only the needs of the present, but the possibilities of the future.

Money cannot Buy More—Usage cannot Demand More—than what you get with present-day Dunlop Tires.

There's a Dunlop Tire for every purpose.

—For Every type of Rim—
—For Every Pocketbook.

Dunlop Dealers Everywhere Ready to Serve You

Also Makers of Dunlop Rubber Belting, Hose, Packing, etc. Dunlop Rubber Tile Flooring, Dunlop Rubberoleum.

The old time favorite at the old time price

Manufactured by General Cigar Company Limited, IMPERIAL TOBACCO COMPANY OF CANADA LIMITED, Sole Distributors.

Do You Know the Price of Goodyear Tires?

YOU know the quality of Goodyear Tires — acknowledged to be the highest. You know that you would get more satisfaction from using Goodyear Tires. Do you know equally well the price of Goodyear Tires? Do you know you can buy from a local Goodyear Selected Dealer a genuine Goodyear at prices as low or lower than many so-called advertised "Special Sale Prices"? Do you know that if you don't need the supreme mileage and road-grip of the All-Weather Cord, you can buy the Wingfoot Cord at a saving and get a tire excelled only by the All-Weather? Goodyear builds tires to meet your price requirements — whatever they are. But every one is full Goodyear quality and yields heaping value.

Have a talk with a Goodyear Selected Dealer in your community. He is well worth knowing. Out of 10,000 tire dealers in Canada, only 2,500 are Goodyear Selected Dealers—the best of them. They save you money on tires by selling economically and by rendering valuable service.

Web Cords for a low inflation tire

—Because Balloon or Balloon Type Tires are made with fewer layers of cords and the cords are much longer—because of the great circumference of the tires,—and because the play of the casing with low inflation as it compresses beneath the weight of the car, is much greater,

—the value and necessity for the Web Cord process, combined with Sprayed Rubber for the side walls, becomes many times emphasized.

Web Cords marked the greatest advance in building standard cord tires since the cord method was first evolved and this improvement, exclusively used in Canada for Dominion Tires, places Dominion Royal Cord Balloon and Balloon Type Tires in a class by themselves.

If anything will insure the practical road success of a low inflation tire, Web Cords and Sprayed Rubber will do it.

These processes are used exclusively in Canada for—

Dominion Royal Cord Balloon Type Tires,—to fit all present wheels.
