CITY LEAGUE

This evening at the cricket field the Live Wires and 4th Hussars meet in another senior city league encounter. With a tie with Gananogue to their credit in the standing the Hussars will put forth every effort to make a victory out of the game and thus go into the lead, while Live Wires, fighting for a showing in the first half of the schedule, should put up a great battle. The players lined up in the senior city class cannot fail to make the baseball interesting and a good crowd should be on hand.

Kingston is at Oshawa on Saturday and at Belleville on Wednesday next, returning home for a match with Belleville on Friday the twentieth. This leaves next week open to other games and the Gananogue-Live Wires match on the 17th should be an attraction as well as the junior games and the Mercantile fixtures.

Victorias and Shamrock will have another pitched battle tomorrow and on Monday night the Printers and Civil Servants will dig up their has-beens and will-bees and get on the job in Mercantile circles once more.

Major Mackenzie's Gananogue Orphans have suffered their first loss of the season and will come back with harder work than ever. The Live Wires expect to make them step on Tuesday evening next.

I have had my ups and downs. Experience has been a great teacher. I take more pleasure out of my 1923 comeback than my record of 59 home runs.

I delivered after a lot of people pronounced me through. I was able

You must believe that no obstacle is too great to be overcome if you would succeed in the big show. The don't quit spirit is what makes possible the victory over seemingly impossible handicaps.

Advertisement for C.C.M. Bicycles. It's the "Hidden" Quality that Counts. WE could build another bicycle that would be almost a Twin to the C.C.M. in appearance, and yet be far inferior. Without your knowing it, we could use cheaper tubing for the frames instead of our high-grade, English Seamless Tubing, reinforced at the joints. We could use a cheaper hanger instead of the three-piece Triplex that makes the C.C.M. turn so smoothly and easily. We could use cheaper bearings instead of our Flint-hard Steel bearings that a file cannot cut. We needn't clean our frames so thoroughly, nor treat them with a coat of anti-rust before enameling. We needn't put on so many coats of our rich, lustrous special C.C.M. enamel, nor leave the frames in the enameling ovens so long. We needn't take so much care in cleaning our handle bars, crank hanger, hubs and other parts before they're nicked. We take off every speck of dirt and grease, so as to have a thoroughly clean surface. Next we coat the parts with copper to prevent rust. Then, the C.C.M. parts are left in the nickel baths for about two hours, instead of the twenty-minute or so dip given cheaply-nickeled parts. Wouldn't you rather pay a little extra for C.C.M. rust-proof nickeling, than to get a bicycle that, before long, shows little marks of red rust peeping through the nickeling? We could save expense by not making all of the 1,761 parts of C.C.M. Bicycles with such care and precision. C.C.M.'s are made so accurately, you could take two bicycles to pieces. Mix up the parts, then re-assemble the machines, and all parts would fit together perfectly. C.C.M.
