Sunlight—for your Washing Machine

A WASHING machine is made to wash your clothes without rubbing or boiling—and it succeeds just in proportion to the value of the soap you use.

Sunlight Soap dissolves quickly and completely in hot water and works up into an abundant suds. This is very necessary so that its rich cleansing ingredients may search through and through the meshes of the clothes and dissolve the dirt and soil spots. Then, when rinsing comes, all dirt and soapy matter runs entirely away, leaving your clothes sweet, fresh and snowy clean.

The pure lather of Sunlight Soap cleanses the clothes naturally, not chemically. The \$5,000 Guarantee of Purity is stamped on every tablet of Sunlight Soap.

Put half a cake of Sunlight into hot water in your machine and stir into generous suds. Put in the clothes and operate the machine—your clothes will be clean.

dress one may rely on for formal occasions throughout the summer. Panels of Valenciennes lace and dainty bows of ribbons provide ample decoration, for the trend in junior clothes is toward plain lines with a minimum of trimming. Among the acceptable trimmings are tiny pearl buttons which may have all manner of decorative applications, having no connection with the usual purpose of a button.

Even cape back dresses are shown in misses' sections and there are coats and capes to match some of them.

FOR MORNING WEAR

For morning wear one selects a tailor-made suit, just a little less severe than the first models were, with a waistcoat of white pique of flowered cretonne or gingham. Jacket and skirt are both very short to give the most youthful effect.

You get it as though Fresh from the Roaster

Even the best coffee deteriorates rapidly when exposed to the air. Then if the cause of deterioration could be removed you would get coffee with the fine aroma with which it left the roaster.

This is exactly what we have done with Rideau Hall Coffee. We seal it under vacuum just as it leaves the roaster. No air is allowed to come in contact with it until you break the seal. Then the tight fitting double lid preserves the flavor until the last grain is used.

Go to the Hills of Smiling Spain

SUNNY SPAIN from time immemorial has furnished the world with certain tit-bits in the way of natural products and pastimes.

The Spanish dance, full of fire and dash and lurking passion—red and black always running through the picture—the torreador, the lady of the mantilla—these are the more spectacular conceptions.

Men and women with well-fed donkeys gathering olives and almonds and peanuts and tinkling along mountain roads to the market place however are more typical of the real Spain.

Moir's men have gone into Spain, to the Southern slopes where the

almonds are at their best, and contracted for the choicest nuts with ancient dons in their haciendas, and for the most toothsome peanuts from the growers—kernels that roast with a flavor no others seem to have.

Thus does Spain contribute of her best to the excellence of Moir's Chocolates.

You taste of the golden fruits of many lands in a single box of Moir's.

Spain

The Celt, the Andalusian, the Roman and the Visigoth all have played a part in the history of Spain. Culture and barbarism have been commingled in the history of this nation. Despite the onslaughts of many conquering hosts the Spaniards have never lost their sense of national pride, and their intense patriotism, has never been held under the heel of foreign domination.
