# RACY OF OUR OWN SOIL.

(Continued from Page 1) According to the law of supply and demand these works are entirely adequate. In the terms of the Jew producer, "They fill the bill."

"If that's the case, then what the devil are you grousing about?" in quires my friend the American Editor. I'm a Canadian." I reply.

"What's that got to do with it?"

"Simply this, as a Canadian I have aspirations to see a literature produced in Canada that is racy of our own soil."

"But what about the work of my great star? Why, there is no man in Canada who knows your North like he does." "Thank God there isn't."

When Gilbert Parker gave us "Pierre and his People" he gave us something authentic that had the smack and tang of our own country. Robert Bridges, editor of Scribners, tells me that he regards those tales as among Parker's best. I agree, because it is so distinctively Ca-

nadian. It belongs somewhere just as surely as the mere frame story belongs nowhere. Gilbert Parker's children will live, when these other brats of the editorial doorstep are not even a memory.

All fiction is a work of art. The Americans have carried the short story as a work of art to a high degree of perfection. There is however a danger with some of them that they tend to be more keen on form than they are on matter, that is they would sooner have the pipe than the water that flows through the pipe.

Form and technique are absolutely essential. The slothful artist who refuses to pay the price in this particular will find the door effectually closed against him. When the lessons have been learned mere dexterity may dazle for the moment, but it is the content which gives per

No fiction mechanic of "Bagdad on the Subway" could have written Marie Chapelaine. That belongs to Old Quebec, beloved by its own, and now beloved by many more because of this one book.

The Canadian stories of Marjorie Pickthall, still running in the Red Book, are enchantingly beautiful. It was a sad loss to Canadian literature when this talented author passed out with her youth. Inspiration like hers is rare indeed. The work which she has left will be cherished by all who cherish their native land.

I read recently an essay by a modern American critic, bemoaning the fact they are so poor in literature redolent of America. I do not agree with the critic. I think that they are rich indeed in national literature. We can rule out Howells on Venice, and Lew Wallace on the Holy Land, and a host remain.

George Cable and the Creole days, Mark Twain and the Mississippi, Booth Tarkington and the midlander, Owen Wister and the West of Virginian, Stewart Edward White and the blazed trail, Edward Eggleston and the Hoosier folk, Bret Harte and California. To quote these names is to cite examples of American writers that are pungently American.

Many a citizen of the old world, who never left there, has learned to reveal in new world haunts, because of magicians like those quoted.

Kipling, as a youth in India tells how he was enthralled by the pages Canada is still waiting for such magicians to give her that literature

which is racy of her own soil. What vast and untapped mines are here, the habitant of Quebec, the Gaelic Highlander of Cape Breton with his far away and long ago, the mining camps of North Ontario, that frontier West of ours that still remains frontier, these are glimpses of the land that waits for our own Seannachie, or story teller.
