HAS THE REGENERATIVE SET TAKEN A BACK SEAT?

Has the Regenerative Set Taken a Back Seat? There are sets which will beat it; we do not claim that there are not. A single stage of good radio frequency amplifier in front of a regenerative detector will give increased signal strength. Two steps will give still more. But the regenerative detector alone will come very near equalling the results of the one-stage r. f. and detector, and if poor r. f. transformers are used, it is entirely possible that a good single detector will give better results. Radio frequency transformers are not perfect yet by any means. A poor, or fair stage of r. f., followed by a crystal detector, can practically always be beaten by a regenerative set. Another way of looking at it is that controlled regeneration itself is the equal of about "a stage and a half" of average r. f. amplification. And so, we say, the regenerative set is by no means to be despised. It is not claimed that the regenerative set is the peer of all circuits, but we do want to discourage the tendency to relegate it to a back seat. It is, if carefully built, still one of the most sensitive receivers we know of, particularly on the lower phone waves, and as for radiating ability it is, as we have stated, not as bad as most radio frequency sets. It is one of the best types of set, and undoubtedly one of the easiest to build and operate.

Unfortunately the tendency among many dealers and listeners today is to regard the single-tube regenerative circuit, with one or two stages of audio amplification added, as a "dead one." Radio frequency is all the rage, and unless a set uses a stage or two of radio frequency amplification it is frowned upon. This is a mistaken attitude, and it is about time that the regenerative receiver came in for its share of credit. It is safe to say that there are but few types of receivers which, when operated on an outdoor antenna, can beat a good, low-loss regenerative outfit.

There have been two main objections to the regenerative set so far. First, it has been preached against for its radiating ability, and second, it has been belittled for a supposed lack of sensitivity. The regenerative detector outfit does not always radiate—it is merely capable of radiating. This statement applies to radio frequency amplifier sets. Incidentally, the average oscillating r. f. amplifier is more annoying than an oscillating single tube regenerative set will radiate. And the way to operate each is to use the set below the oscillation point. As regards sensitivity, the regenerative set is not easy to beat.

Items of Interest From Our House Furnishing Department For the Town or Country Home

Verandah Cushions, 49c each
100 well filled Cushions covered with Chintz—suitable for the verandah and boat—size 18x18 inches.

Grass Mats, 75c each
The colors are Blue, Brown and Green, in pretty Oriental patterns.

Armure Cloth, \$1.00 a yd.
A genuine sunfast Cloth for drapes — full 40 inches wide, in colors Rose, Blue and Green.

Leatherette, \$1.25 a yd.
A good, heavy quality imitation leather in Brown and Black—full 50 inches wide.

White Bed Spreads, \$2.50 each
In pretty, stencilled patterns of Pink, Mauve and Blue. Size 80x90 inches.

English Denim, 85c a yd.
A fine quality, imported Denim or Drill, suitable for upholstery work, in Black and Brown only. Full 50 inches wide.

SCREENS
10" high, 26-44" Extension . . . 50c. each
14" high, 22-36" extension . . . 55c. each
14" high, 26-22" extension . . . 60c. each
30-52" extension . . . 65c. each
18" high, 22-36" extension . . . 65c. each
18" high, 26-44" extension . . . 75c. each
22" high, 26-44" extension . . . 85c. each

REFRIGERATORS
40" high, 24" wide, 16" deep galv. lined . . . \$15.00
40" high, 24" wide, 16" deep White Enamel . . . \$18.00
45" high, 32" wide, 20" deep, White Enamel . . . \$50.00
46" high, 34" wide, 20" deep, White Enamel . . . \$60.00

GAS RANGES
3 Burner with Oven . . . \$22.00
3 Burner with large top . . . \$30.00
4 Burner with Oven and Enamel top \$36.00

McKelvey & Birch, Limited

IN VANCOUVER AND VICTORIA

THE completion in 1886 of the Canadian Pacific Railway, a project that had received the moral and financial support of the Bank of Montreal, cast a bright ray of promise across the then somewhat troubled economic life of Canada.
Canada at last was spanned by rail from coast to coast, opening up for profitable development the fertile territory lying between.
The Bank of Montreal signaled the completion of the line by establishing a Branch at Vancouver and later at Victoria, thus completing its transcontinental chain of Branches and bringing to the Pacific Coast banking facilities essential to the successful development of the great economic potentialities there.
Of its 567 Branches, 53 are situated in the Province of British Columbia.
BANK OF MONTREAL
Established over 100 years
Total Assets in excess of \$650,000,000

DEFER CHANGE IN BASIS OF GRANTS TO SCHOOLS
Present Plan of Allotment Will Be Followed for Another Year.
Toronto, June 23.—Changes in the basis of government grants to public and separate schools, contained in an act passed by the last session of the house giving the Minister of Education wide discretionary powers in their apportionment, are not to materialize at present. Announcements to this effect are being forwarded to school boards throughout the province by the Board of Education, stating that for another year grants will remain as heretofore. Under the present plan of allotment, Ontario public and separate schools earn from the government upwards of \$2,500,000 in grants yearly.
The intention of Premier Ferguson, who carries the portfolio of education, has been to change the present basis of grants from that of qualification of teachers, his idea being that a school district's interest in education, as evidenced by its expenditure upon it, should be an important factor in determining the aid which the government would give it. With this in view he secured the passage of legislation basing the grants upon regard to "the property liable to taxation for school purposes, the expenditure of the board upon education, and to such other considerations as in the opinion of the minister should affect such apportionment."
The premier has found it impossible since the close of the session to work out the details of the scheme which such legislation had in view. Realizing that school boards require to know in advance what aid they may count upon in order to lay their plans, he has decided to leave the system unchanged for another year, when it is hoped that the new policy will be worked out in its details.

TO ELIMINATE RISK OF PREMATURE BURIAL
The British Commons Is Now Considering a Measure Aimed at Hazard.
London, June 23.—A bill aiming at elimination of the possibility of the risk of premature burial is now before the Commons and seems likely to pass owing to the growing sentiment of the country in its favor. The bill provides medical inspection of all bodies before issuance of a death certificate and also adequate enquiry before a certificate stating the cause of death is granted. A small fee of five shillings is suggested to cover the cost of these certificates.
An astonishing number of people in England lately have left instructions in their will for the performance of certain specific acts such as vein cutting or the like to prevent premature burial.

FRANCE OPENS PARLEYS.
With United States Regarding the Russian Policy.
Washington, June 23.—France and the United States are exchanging views on recognition of Russia, it was officially learned here.
Details of the exchange are being kept secret, but it is understood that the Herriot government of France took the initiative with a view of aligning this country with it in a joint programme of recognition terms to be offered Russia.
Premier Herriot's present conversations with Premier MacDonald of England likewise are understood to be on the same matter.
It is understood that the rapprochement of China and Russia, which jeopardizes French and American interests in the Chinese Eastern Railway, is also being discussed.

To Find Seat for Oliver.
Victoria, B.C., June 23.—A seat will be found for Premier John Oliver, probably on the mainland, almost immediately, as a result of the premier's personal defeat here Friday, it was intimated at Liberal headquarters.
Speaking to his supporters after the result of the election was announced Mr. Oliver said: "I know that as a result of our transportation fight we arrayed powerful interests against us, but we continued our fight for the best interests of this province regardless of consequences to ourselves—consequences which are apparent in some places."

Redistribution Protest.
Brookville, June 23 — Protest against the proposal to unite the county of Grenville with the county of Dundas under federal redistribution was entered by the counties council of Leeds and Grenville in session here, such a union being held undesirable. The council further asks that Grenville County remain an electoral district, "unless it be absolutely necessary to unite the same with another county, and that as far as possible the county boundary should not be disturbed in making such a redistribution."

DANGEROUS DRIVING.
Manitoba Free Press.
The Chicago Tribune has made an exhaustive investigation of motor traffic conditions on Chicago streets and finds that the regulations are generally disregarded. Driver after driver found to be making his own regulations. The investigators express the opinion that under the conditions existing it is strange that there are not more accidents.
The investigators were unanimous on one point: that up to twenty miles an hour there is comparative safety. Beyond that there is danger to life. Up to twenty miles, a "motor-car" driver can guard fairly well against injury to children or adults who dart out on to the street from behind vehicles or other obstructions. Once beyond a speed of twenty miles an hour, he has small chance of avoiding an accident.
The Tribune maintains that in the interests of the people living in a city the youthful driver, the careless driver, and the speed crank will have to go.
Radio industry in this country numbers about 250,000 persons connected with it.
Three of the world's most powerful transmitting stations are in Moscow.
Auto and truck loaded with beer, shipped out of Hamilton, seized by police.

VACATION TIME IS HERE!
