**Genuine Amber Strings**

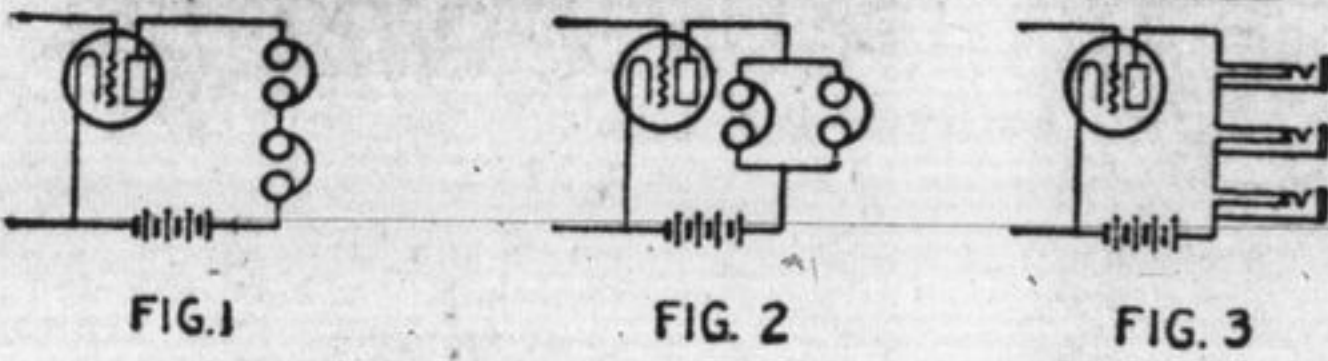

We are showing some very attractive necklets of

GENUINE AMBER

The price of this very attractive Ornamental Bead is steadily coming down.

Some of these Strings suitable for Young Girls, are priced as low as . . . . . \$4.00

Others larger, and in greater lengths, up to \$25.00.

**How to Connect Multiple Headsets**

Listeners frequently want to know whether, in connecting more than one pair of phones into their receiving sets, it is best to hook up the headsets in series with each other, as shown in Fig. 1, or in a parallel connection as shown in Fig. 2. The correct way to hook in multiple headsets is the series method, as shown in Fig. 1. When the phones are connected in this fashion, all the current passing in the plate circuit will go through each headset, and if the headsets are uniformly sensitive, the same strength of signal will be heard in each pair of phones, regardless of what the resistance of the individual phones might be. In other words, we might connect a 75-ohm phone, a 1,000-ohm phone, and a 1,500 phone in series with each other, and each phone would give as loud a signal as it would if used by itself in the tube plate circuit. The fact that each phone had a different resistance would not make any difference at all. The parallel connection, shown in Fig. 2, does not have this advantage.

Electric currents will always take the path of least resistance, and if in Fig. 2, one headset were made up of two 75-ohm phones, while the other set had two 1,000-ohm phones, we might have more current in the 75-ohm headset than in the 1,000-ohm set. This would not make the signals in the 75-ohm headset any stronger than usual, but it might seriously weaken the signals in the higher-resistance phones, and this is certainly not desirable.

Some people think that the series method of connection is objectionable because the "adding" effect of the series resistance will make it difficult for the current to force its way through more than one pair of phones. They forget, however, that the current is simultaneously encountering the "filament-plate" resistance, which is so high, by comparison, that the addition of the resistance represented by two or three extra headsets is of no consequence.

In Fig. 3 is shown how several jacks may be connected in the plate circuit so that one, or more, pairs of phones may be plugged in.

**RADIO BROADCASTING**

The following is a list of radio stations and their broadcasting programmes which may be heard locally on Tuesday:

- WBZ (337) Springfield, Mass. 5 p.m.—Leo Reisman Hotel Lenox ensemble. 5.30 p.m.—Leo Reisman and his orchestra. 6 p.m.—Results of games played by the Eastern, American and National leagues. 6.05 p.m.—Market reports as furnished by the United States department of agriculture at Boston. 6.10 p.m.—World market survey from the department of commerce at Boston, from the Hotel Kimball studio, Springfield. 6.30 p.m.—Bedtime story for the kiddies, from the Hotel Kimball studio, Springfield. 6.40 p.m.—Copley Plaza ensemble. 8 p.m.—Albert Cowles Players, from the Hotel Brunswick studio, Boston.

- KDKA (820) Pittsburgh, Pa. 9.45 a.m.—"Stockman" report of the Pittsburgh live stock market, general market review and agriculture items. 11.15 a.m.—Concert by Scalzo's orchestra, from Kaufman's dining room. 12 noon—"Stockman" report of Pittsburgh live stock, and wholesale produce markets. 2.15 p.m.—Baseball scores, inning by inning. 5 p.m.—Baseball scores. 5.30 p.m.—Organ recital by A. L. Taylor of the Grand Theatre, Pittsburgh. 6 p.m.—Baseball scores; dinner concert continued. 6.30 p.m.—The Children's Period, Uncle Ed. 6.45 p.m.—News bulletins. 7 p.m.—Baseball scores. 7.15 p.m.—University of Pittsburgh educational course, subject to be announced later. 7.40 p.m.—"Stockman" report on primary live stock markets, including grain, feed, cotton, sugar, wool and produce. 8 p.m.—Concert by Mrs. F. M. Myler, contralto; Emil O. Wolff, violin, and Charles E. Joramson, reader. 10 p.m.—Concert.

- WGY (380) Schenectady, N.Y. 11.30 a.m.—Stock market report. 11.40 a.m.—Produce market report. 11.55 p.m.—U. S. Naval Observatory time signals. 1 p.m.—Music and address, "The Keynote to Conservation—Preservation of Forests," Mrs. Edward C. Whitmyer, Schenectady Federation of Women's Organizations. 5 p.m.—Produce and stock market quotations; news bulletins; baseball results. 6 p.m.—Dinner music by Joseph A. Chickens and his Clover Club orchestra of Hotel Ten Eyck, Albany, N.Y. 7.40 p.m.—Baseball scores. 7.45 p.m.—Musical programme.

Complete radio programmes sold at Canada Radio Stores.

**LOCAL TALENT TO BE HEARD BY RADIO**  
To-night is the night when the many hundreds of Kingston radio fans will have the opportunity of hearing what Kingston talent sounds like over the air! A short programme of music is to be transmitted from 3AAY, the test station of the Canada Radio Stores, and is scheduled to start around seven o'clock and end around half past eight. This test is purely for experimental purposes and telephone calls from local fans and cards

or letters from outside points will be appreciated. The wave length is 225 meters, which will enable the average tuner to hear the programme.

In the tests held Sunday afternoon and late Sunday evening, 3AAY was heard very clearly outside of Kingston as well as locally, judging from letters received at the Canada Radio Stores this morning. No difficulty is found in tuning out 3AAY and hearing WGY KDKA and the other larger broadcasting stations.

**THE VOICE FROM WGR.**  
There's a pretty face behind the entrancing voice from WGR, the station atop the Hotel Scattler in Buffalo, N.Y., and run by the Federal Telephone & Telegraph Co. The voice belongs to Miss Helen M. White, who is shown here. When she doesn't "announce" Miss White acts as private secretary to the manager of the company.

**SPARE CURTAIN LENGTH**

It is a good plan, in having new curtains made for the house, to turn up the hem twice. This would provide for shrinkage in washing, or for larger windows in case of moving to another home. In such event, the hem can easily be turned down.

**Peeling Tomatoes.**  
It is easier to peel tomatoes by sticking them on a fork and holding over the gas flame until the skin cracks than it is to put them in hot water, and the result is much more satisfactory.

The Government Building at the Canadian National Exhibition should again be one of the most interesting structures on the grounds. Among other exhibits to be made by the Ontario Government will be a section from the Provincial game preserves containing two beaver dams, one of which will have 15 of the industrious little animals at work. Bears, deer, moose and other live specimens will also be shown.

PROBS:—Tuesday, moderate winds, mostly fair and rather cool.

**Stop Look Listen!**

To The Most Sensational Sale Announcement Of The Year

**Tuesday at Steacy's**

Here is a wonderful bargain opportunity — the greatest sale event of the year, as our entire \$150,000 stock of the finest quality merchandise is included. Special sale goods alone excepted.

**A Stupendous 20% Discount Sale!**

When 80c. has the purchasing power of \$1.00 on all cash purchases.

Here is a golden opportunity for saving — all merchandise is marked in plain figures less a straight discount of 20%.

Save 20c on every \$1.00 you spend

By concentrating your shopping here to-morrow. Stocks must be reduced and we have taken this means to that end.

There are no restrictions, even the new Fall Coats, Suits and Dresses are included in this super-bargain event.

TUESDAY is the day. STEACY'S is the place. 9 to 5 O'CLOCK are the Sale Hours.

You Save 20%

New Ideas For Your Comfort

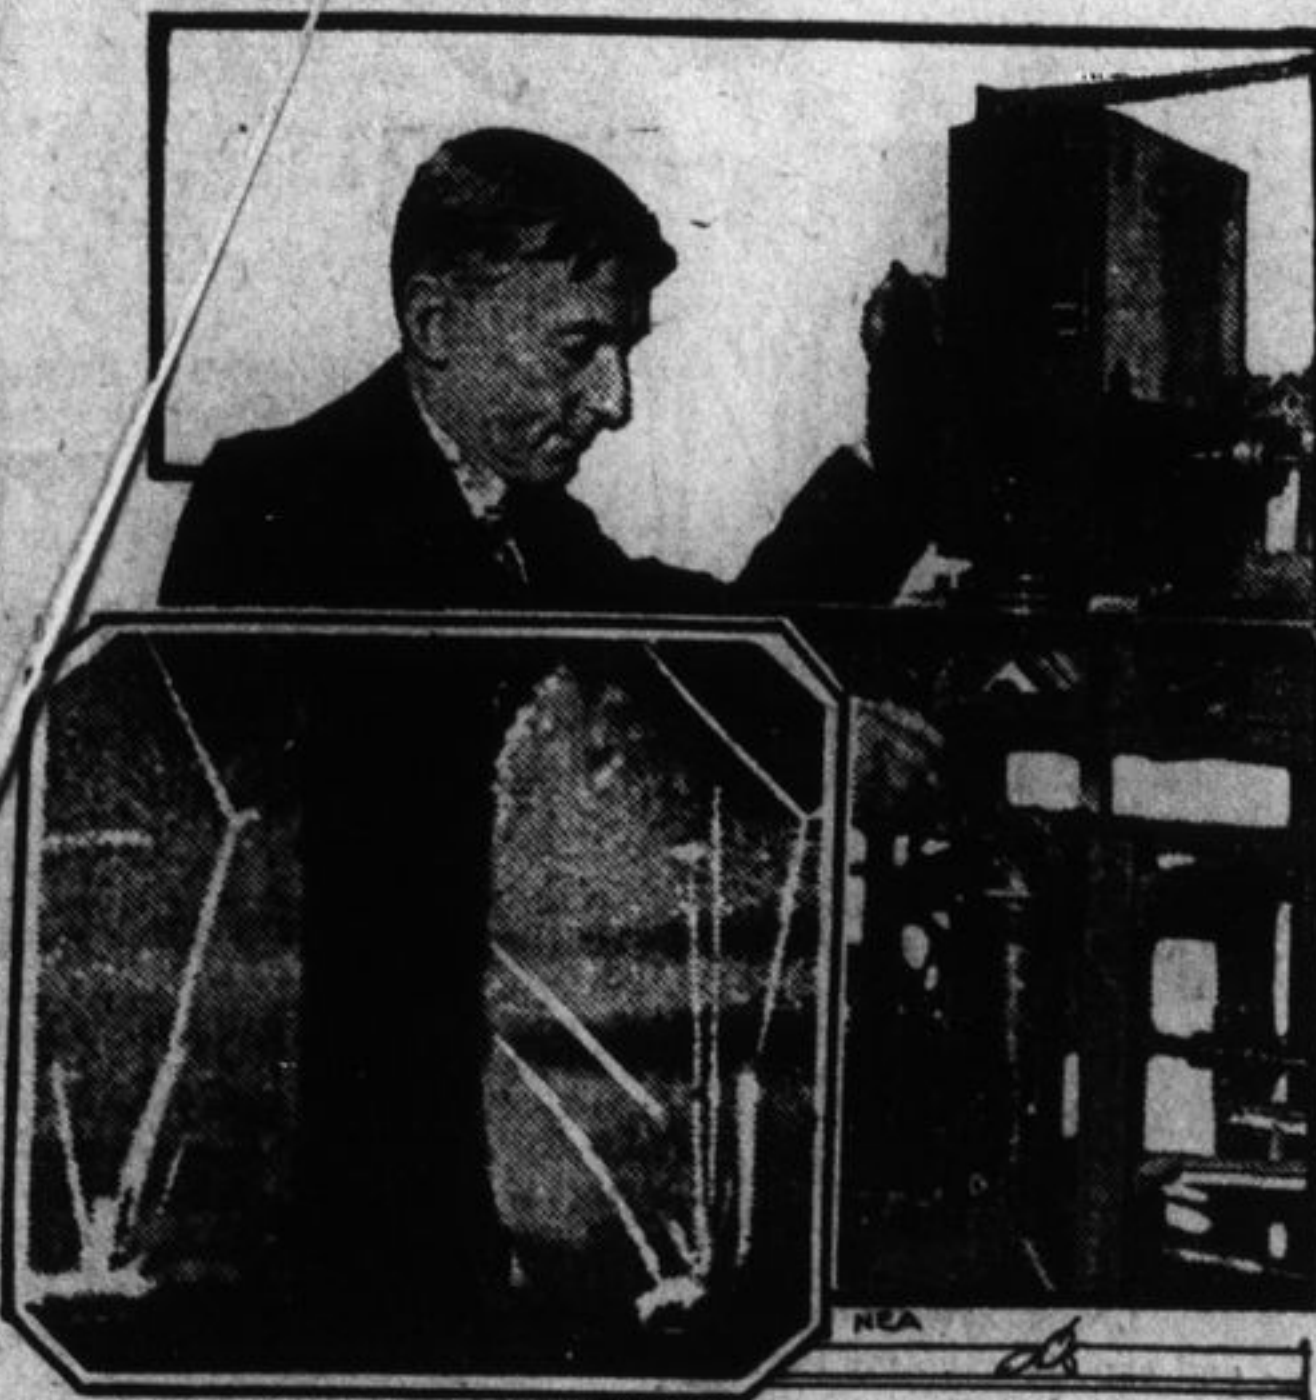

**A REDUCTION**

The Civic Utilities reduced the price of gas for cooking a short time ago. We have a Gas Range to meet every pocket.

- (A) 3 Burner Low Oven Gas Range \$22.00
- 3 Burner Low Oven Gas Range—large burners . . . . . \$30.00
- " 3 Burner Low Oven Gas Range—large burners, N. P. trim . . . \$33.00
- " 4 Burner Low Oven Gas Range—large burners, enamel top . . . \$40.00
- " 4 Burner Cabinet Range, N. P. top and white enamel . . . . . \$85.00

**McKelvey & Birch, Limited**

General Contractors, Heating Specialists, Steam Fitters and Plumbers, Jobbers of Plumbers' and Gas-Fitters' Supplies, Stoves, Sinks, Heavy and Home Furnishing Hardware, Tools, Oil, etc.; Supplies, Sheet Metal and Tin Work; Electric Work; Painting and Paper Hanging; special work of all kinds undertaken.

**AN ATOM GETS ITS PICTURE TAKEN!**

Just a few scratches on the photographic film of Prof. W. D. Harkins, but they represent the first pictures ever taken of atoms of matter in collision. It would take 100,000,000 of them laid end to end to make a line one inch long. And here they are, moving through space under the camera lens at the rate of from a few hundred to 1,200 miles a second. To further complicate matters, Prof. Harkins (above) says the picture (at the lower left) merely shows only the nucleus of an atom in collision, it being only one-ten-thousandth of the size of the entire atom.
