

KINGSTON, ONTARIO, MONDAY, AUGUST 25, 1924.

YEAR 01; No. 169.

THE MISSING AIRMAN FOUND

The Italian Aviator Was Worn Out By Fatigue.

FORCED TO COME DOWN

East of Cape Farewell, Greenland, And Drifted For One Hundred Miles.

On board U.S. Cruiser Richmond, east of Cape Farewell, Greenland, Aug. 25.—Lieut. Locatelli, the Italian aviator, and round-the-world flier, who disappeared shortly after leaving Iceland for Greenland last Thursday with the United States fliers, has been found. He was rescued at 11.35 o'clock last night by the United States cruiser Richmond 125 miles east of Cape Farewell. The Italian flier and his companions were uninjured, although worn out by fatigue. Motor trouble had forced Locatelli to come down on the water during the flight of Thursday. He was unable to bring his plane into the air again and drifted for one hundred miles. Locatelli asked that his airplane be destroyed, and his wish was complied with.

WELCOME BY CANADA.

Air Force Director Is Leaving for Nova Scotia.

Ottawa, Aug. 25.—Canada will be officially represented on the arrival of the American around-the-world fliers in Picton, N.S., within the next few days.

Group Captain J. F. Scott, M.C., Director of the Royal Canadian Air Force, will leave for Picton, N.S., to welcome on behalf of the Canadian Government the American fliers. The Canadian Government has made adequate preparations to take care of them.

Lieut. Wade, who lost his machine a short time ago, will continue the flight from Picton with Lieut. Smith and Lieut. Neilson.

The Hon. E. M. Macdonald, Minister of National Defence, has instructed Group Captain Scott to extend every facility possible to the American fliers.

Direct System.

Paris, Aug. 25.—The Senate on Saturday adopted a bill re-establishing the direct representation system of electing members of the chamber of deputies. By this system each deputy will be elected by his own separate constituency instead of by groups. It is expected the chamber will approve the method.

ENGLAND'S HANGMAN SERIOUSLY WOUNDED

John Ellis Shoots Himself—Had Brooded Over Executing So Many People.

London, Aug. 25.—John Ellis, England's famous hangman, who lost his nerve and relinquished his sinister occupation last year after executing Mrs. Edith Thompson, the last woman who suffered the death penalty in Great Britain, was found this morning at his home seriously wounded, with a revolver lying beside him. Ellis, who isolated himself socially during nearly the quarter of a century he served as public executioner, was said to have brooded over the fact that he had sent to their doom more condemned murderers than any other man who had ever held the hangman's office.

“You Said It, Marceline!”

By MARCELINE DALROY

On "Taking a Lady's Hand"

When a PRETTY WOMAN Holds out a DAINTY HAND SOME MAN is sure To TAKE IT For granted She WANTS something and If she is pretty ENOUGH He MAY risk a gift. A FLIRT, when he takes A lady's hand, SQUEEZES IT, A LOVER—caresses it. A man with NO imagination SHAKES IT, but an EXPERIENCED man bends Over it and KISSES It; sometimes, this MAY SURPRISE a girl.

40-YEAR EXODUS DONE BY AUTO IN FOUR HOURS

Jerusalem, Aug. 25.—A small automobile did in four hours, yesterday, what it required the Israelites forty years to accomplish in their exodus from Egypt to Palestine. This was crossing the Sinai Desert, the wild and barren region between the Gulf of Suez and the Gulf of Akabah, about 130 miles.

WINDSOR CARS PAY ON FIVE-CENT FARE

Annual Report for 1923 Shows Good Surplus and Increased Traffic.

Windsor, Aug. 25.—Operation of Windsor's Hydro Electric street car system is now on a paying basis with a five-cent fare. The annual report of the system submitted Saturday by W. R. Robertson, general superintendent of the Ontario Hydro Electric Railways shows that the lines serving Windsor and adjoining municipalities last year carried 12,318,000 passengers, operated 1,772,766 car miles and netted a revenue of \$688,416.

Shoe Exports Show Large Increase in Year

Ottawa, Aug. 25.—Canada exported in the month of July this year 24,924 pairs of boots and shoes as compared with 9,646 in July last year. During the twelve months ending July, 1924, 132,153 pairs were exported and during the twelve months ending July, 1923, only 54,618 pairs were exported.

ONTARIO TEACHERS DESCEND INTO MINE

Pay Visit to Sudbury and the International Nickel Company at Creighton.

Sudbury, Aug. 25.—Ontario teachers reached here before 7 a.m. today and were met on the station platform by a deputation from the business girls club under the guidance of the president, Miss Guybrough, and escorted to breakfast. After studying the geography of Sudbury they proceeded by train, via Copper Cliff, to Creighton, where they were welcomed most cordially by officials of the International Nickel Company and shown the working of the huge plant above ground and then descended into the mine. Perfect weather added greatly to the enjoyment of this lesson in nickel mining.

HERRESHOFF HAS SOLD OUT.

Gives Sir Thomas Lipton a Better Chance for America's Cup.

New York, Aug. 25.—Great interest has been aroused in yachting circles here by cable reports that Sir Thomas Lipton will challenge again for the America's Cup. In connection with the reports it is being recalled that Sir Thomas had stated publicly a number of times he could never win the cup while Nat Herreshoff designed the U. S. Cup defender. Herreshoff had designed the boats that defeated the various Shamrock entries of Sir Thomas. He recently sold his shipyards.

Killed in Collision.

Montreal, Aug. 25.—Gashed by glass from the windshield when the automobile driven by his father collided with another car in the east end of the city Friday night, Pene Demers, aged 10, of this city, was instantly killed. Except for nervous shock, his father escaped unhurt. The vehicles met in a head-on collision and a piece of glass penetrated young Demers' neck.

PLEADS FOR BOYS' LIVES

Chicago Lawyer Goes Back Of the Murder Itself.

THE PHANTASY GREW

With Richard Loeb of Being Able to Produce "A Perfect Crime."

Chicago, Aug. 25.—Character analysis based on heredity environment was the theme of Clarence Darrow today as he pleaded anew before Judge Caverly for the lives of Richard Loeb and Nathan Leopold, Jr., kidnapers and murderers of Robert Franks. "The weird, mad act of the youths was mentioned only incidentally as the veteran of the bar went back of the crime itself to trace from childhood influences, which surrounded his clients. He spoke of "Dickie" Loeb and said that the phantasy of being able to produce a "perfect crime" grew naturally from the youth's habitual reading of detective stories, superimposed upon the brain, forced like a hot house plant to absorb book after book.

"His parents might have done better if they had not had any money," he declared. "Nature is strong and pitiless. She works in her own mysterious way and we haven't much to do with ourselves. Let us be honest with each other. We all know that youth is without thought and without care. Congressmen, judges, lawyers, yes, even states attorneys, have in youth done something wrong. That they were not caught is their own good fortune."

U.S. Traffic Policeman Is Caught With Ale

Rochester, N.Y., Aug. 25.—Arrested as he piloted his crippled motor boat into Charlotte Harbor with 64 cases of Canadian ale aboard, Frederick A. Fricke, a traffic policeman here, is charged with illegally introducing forbidden merchandise into the United States. The motor boat narrowly escaped collision with two steamers in Lake Ontario, because the steering apparatus was out of order. Fricke said he was returning from a vacation in Canada where he met a bootlegger who suggested he take back a few cases of ale for his own use.

Unveiled Celtic Cross Where Collins Was Shot

Dublin, Aug. 25.—In the presence of President Cosgrave, many senators and a large body of troops, General C. Duffy, Commander-in-Chief of the Free State forces, unveiled a Celtic cross which has been erected at the foot of the hill where Michael Collins was shot and killed in 1922.

The impressive ceremony concluded with the sounding of " taps " by a bugler. Many wreaths were deposited at the foot of the cross by relatives of Collins, members of the army and others.

STRESEMANN'S ORATORY.

Will Have Big Effect Upon the German Reichstag.

Berlin, Aug. 25.—Saturday was Dr. Stresemann's day. With Chancellor Marx and Finance Minister Luther his fellow members of the German delegation to the London conference, the German foreign minister faced a Reichstag session with hostility, and by sheer aggressiveness and brilliant oratory contributed tremendously toward the German Government's chances of obtaining the Reichstag's support of the London pact.

A Gruesome Discovery.

New York, Aug. 25.—A tin box in a Greenwich village gave up the body of aged Aaron Graf, wealthy manufacturer, of Wilkes-Barre, Pa., and furnished the homicide squad another gruesome murder mystery to solve.

Graf, missing since August 1st, had been strangled. His limbs had been hacked off and crammed with the rest of his body, into a galvanized container four feet long. Blankets had been stuffed around him, the lid of the box had been sealed with shellac, and over all had been poured a thick coating of wax and plaster-of-Paris.

Big Packing Concern Falls.

Trenton, N. J., Aug. 25.—Wilson and Company, one of the large packing establishments in the United States, has been placed in the hands of a receiver. It is alleged that the big packing concern is indebted to various banking institutions for nearly \$30,000,000.

The Mills of the Chicoutimi Pulp and Paper Company, which have been closed since the month of February, will be reopened shortly.

The Ameer is likely to suppress the Afghan rebellion in time, but the struggle is expected to be fierce.

ANTI-KLAN WOMAN GETS BIG MAJORITY

Temple, Texas, Aug. 25.—Additional returns today swelled the plurality accorded Mrs. Miriam A. Ferguson, anti-Klan candidate for democratic nomination for governor in Saturday's run-off primary in Texas. It was estimated at her headquarters that her majority over Judge Felix Robertson, Klan candidate, would eventually total 100,000.

To Be Agent-General Under the Dawes Plan

Paris, Aug. 25.—Owen D. Young, of New York, is to serve temporarily as agent-general under the Dawes reparation plan, probably for a period of three months, during which time he will get a staff well organized and break in his permanent successor. In this work he will be aided by Rufus C. Dawes, brother of General Dawes, and Henry M. Robinson, who, like Mr. Young, served on the expert committee which drew up the plans. The reparation committee is expected to meet tomorrow to act formally on the appointments.

KIND OF PUBLICITY THAT CANADA NEEDS

Is to Send to Old Land Those From There Who Have Succeeded Here.

Ottawa, Aug. 25.—The kind of publicity Canada needs in Great Britain is to send men and women there who came originally from the Old Land and have made good, and are happy and contented in Canada, to tell of their experience and how to go about emigrating. In the opinion of Mrs. Charles H. Thorburn, of Ottawa, honorary commissioner on behalf of Canada to the British Empire Exhibition, and Canadian Government delegate at the International Labor conference, Geneva, who returned home last night, Mrs. Thorburn is making a report to the minister of labor on the labor conference. She was very much impressed with the charms of her colleague at the Geneva conference and with her capability.

ANGLO-AUSTRALIAN AIRSHIP SERVICE

Sydney, Australia, Aug. 25.—Sir Keith Smith, noted Australian aviator, who has arrived here to supervise Australian undertakings at Vickers Limited, the big British engineering firm, says he intends to investigate the possibilities of an air service between England and Australia, with a view to laying foundations for such service.

DRIVE FROM DETROIT IN TWENTY HOURS

Record Established by Fred Wallace—Three Hours for Sleep and Meals.

From Detroit, Mich., to Kingston in a Ford sedan in twenty hours is the record established by Mr. Fred Wallace of Detroit, who is the guest of his sister, Mrs. G. H. Williamson, Brock street. Mrs. Wallace, with his sisters, Mrs. Paleifer and Miss Harriet Wallace, and Miss Doris Stedman, left Detroit on Saturday afternoon at 5.30 o'clock standard time, and reached Kingston at 4.15 p.m. standard time Sunday. Mr. Wallace drove right through with the exception of two hours' stoppage for sleep and one hour for meals. A distance of over 450 miles was covered in that time, as quite a number of long detours had to be made. For steady running it is stated that this feat has not been equalled.

Life May Exist There.

Professor Frost presently told his audience a few things about Mars. "I hate to disappoint you," he smiled, "but really I expect nothing of consequence to come of this observation. I am, though, interested in the possibility of a new satellite and its discovery."

He said that it was entirely within the range of possibility that life of some nature might exist on the neighboring planet.

"This by no means indicates," he explained, "that I think there is intelligent human life on Mars. Far from it. But I do believe it entirely possible that some sort of primitive vegetable life does exist."

He scouted as absolutely ridiculous any possibility of inter-communication between the planets by means of radio or other devices. And he declared that the so-called canals, which were not visible to the untrained eye during the observation, were not "canals" in the usual sense, but "channels of twenty miles wide and thousands of miles long."

The red coloring of Mars, said Professor Frost, comes not from forest or vegetable matter, but most likely from red sand, ferrous salt or ground up jasper. The canals, he said, are very possibly vegetable in origin.

Lightning strikes binder in Oxford county, killing three horses, but driver and helper are unscathed.

MARS PASSED WITHOUT WORD

Best Condition in Years For Observing Fiery Planet.

ITS TWO MOONS SEEN

Vegetation Apparent And Seasons Similar to Ours—Human Life Is Scouted.

Yerkes Observatory, Williams Bay, Wis., Aug. 25.—Seen through the largest refracting telescope in the world here, the planet Mars looked like a small orange with a patch of mold on it, shortly after midnight Sunday morning. The swash-buckling planet was closer to earth than it has been for 120 years—34,637,000 miles. And it will be almost 120 years again before it dips once more into such close view.

Luckily, atmospheric conditions were almost perfect for observation early yesterday morning. The sky above Lake Geneva was clear and splashed with stars. Mars itself shone in the south like a great burning diamond.

"This is the best night for observing Mars we have had in twenty-four years," said Engineer Frank R. Sullivan, of the observatory of Chicago. "Both satellites are clearly visible—an extremely rare bit of luck."

Mars Has Two Moons.

For Mars has its moons—two of them. They shone in the great lens like chips of star dust. They play leap with their father planet with such dizzy speed that full moon, half moon and crescent moon—two each—appear on Mars in the space of an earthly 24 hours.

The smallest one, known as "deard," is only twelve miles in diameter; the other, called "fear," about 20. "Fear" is about 12,000 miles from the edge of Mars, and traverses its tiny orbit every seven hours.

Prof. Edwin D. Frost, director of the observatory, said that a third moon might possibly be discovered. Most of the night his assistants, Prof. George Van Biesbroeck, kept his eyes glued to the lens, searching the heavens some 35,000,000 miles away, but the third satellite did not appear. Excellent photographs were taken of the satellites to direct nightly observations.

The tube of the Yerkes telescope weighs six tons. It is sixty-two feet long and it is so delicately balanced that a baby's hand could swing it around. The dome was dark. With Professor Frost and Professor Van Biesbroeck, were Engineer Sullivan, Professor Storrs Barrett, Professor W. H. Garrett, a few invited friends and newspapermen.

Professor Van Biesbroeck was crouched before the lens, jotting down notes, alert on his target 35,000,000 miles away. To his eye Mars looked like a ruddy silver dollar or an orange. At one tip was a spot of tarnish.

"A snow field," explained Frost. It appeared as he talked that the Martian seasons correspond quite closely to seasons on this earth, and that the Polar regions at this time of the year are covered with a great peninsula of ice.

"It looks like the North Pole," said Prof. Frost. "Really however, it's the southern extremity. The lens inverts the image."

Then there were the tiny moons of Mars chasing each other around their glowing father.

Life May Exist There.

Professor Frost presently told his audience a few things about Mars. "I hate to disappoint you," he smiled, "but really I expect nothing of consequence to come of this observation. I am, though, interested in the possibility of a new satellite and its discovery."

He said that it was entirely within the range of possibility that life of some nature might exist on the neighboring planet.

"This by no means indicates," he explained, "that I think there is intelligent human life on Mars. Far from it. But I do believe it entirely possible that some sort of primitive vegetable life does exist."

He scouted as absolutely ridiculous any possibility of inter-communication between the planets by means of radio or other devices. And he declared that the so-called canals, which were not visible to the untrained eye during the observation, were not "canals" in the usual sense, but "channels of twenty miles wide and thousands of miles long."

The red coloring of Mars, said Professor Frost, comes not from forest or vegetable matter, but most likely from red sand, ferrous salt or ground up jasper. The canals, he said, are very possibly vegetable in origin.

AS PROFITABLE CROP AS THAT OF 1923

Toronto, Aug. 25.—The western harvest may lack in bulk but will be as profitable as the 1923 crop, says Stuart Lyon, Globe editor, in a special despatch from Edmonton, Alta.

"MYSTERY" SIGNALS EASILY EXPLAINED

U.S. Radio Beacons Sent Series of Dashes Heard at B.C. Station.

Victoria, B.C., Aug. 25.—So-called mysterious signals picked up by British Columbia wireless stations recently are not mysterious at all, according to E. J. Haughton, superintendent of the Dominion Government wireless service.

The department is somewhat annoyed that any of their staff should make public announcements of any nature concerning the operation of their stations of what transpires there.

"The signals reported to be so 'mysterious' were merely those sent from U.S. radio beacons on their new tonic train transmitter. Both Swiftsure and Columbia River light vessels have series of dashes as their characteristics, and it is these signals which were heard at Point Grey."

POLICE MAKE SEARCH FOR MISSING PRIEST

College Supervisors Fear That He May Have Met With Foul Play.

Sandwich, Aug. 25.—Unless Rev. Father Joseph Morrissey, instructor in astronomy at Sandwich College, is working somewhere, probably on a farm in the vicinity of Toronto, his supervisors at the college believe he may have met with foul play over a week ago.

Father Morrissey, who is one of the most brilliant priests of the Basilian community, disappeared a nervous breakdown. A search conducted by the provincial police through western Ontario and a search by the state police through Michigan has failed to reveal his whereabouts.

Northumberland, N.B., By-election Oct. 7th

Ottawa, Aug. 25.—The by-election to fill the vacant seat in the Federal House for Northumberland, N.B., will be held on October 7th. Writs were issued Saturday by Chief Electoral Officer O. M. Biggar, calling for nominations on September 23rd and the election on October 7th.

The seat was made vacant by the death of John Morrissey about a month ago. Mr. Morrissey represented that constituency in the Liberal interests since the general election of 1921.

FIVE LONDON GIRLS FAIL TO COME HOME

After Embarking on a Stage Career—A Wide Search Has Begun.

London, Ont., Aug. 25.—Chicago police have been asked to locate five London girls who left nearly a year ago to embark on a career behind the footlights, but who failed to return to their parents at the time appointed.

This step has been taken following a visit to the U.S. city on the part of one girl's father, who made an unsuccessful endeavor to locate them, although mail being received at their homes carries a Chicago postmark.

The girls, all musical, received their early training in London and left this city in charge of a chaperon to make fame for themselves and city. In June they were to have returned home, but when days passed into weeks without their return the parents became much worried. Their worry since then has been all the more profound, with no date yet as to when they will return. All teen age girls, their mysterious whereabouts is causing much anxiety.

Police in all the principal cities of the Western States have also been asked to assist in the search.

Uses a Searchlight To Kill Skeeters

Belgrade, Jugoslavia, Aug. 25.—An ingenious local locksmith has devised a trap for mosquitoes, which are not only a great pest in this region, but have become a serious health problem because of their spreading malaria. He set a powerful searchlight in one of the public parks here, to which was attached a suction apparatus. As the insects approach the light they are drawn into a receptacle. The inventor is obliged to empty the receptacle at very short intervals, so efficacious is the trap.

Herriot aiming to bring about commercial treaty with Germany for production of iron and steel products.

Paris, Aug. 25.—The Chamber of Deputies early Sunday morning voted confidence in the Herriot Government by 336 to 304, following the long debate in the Chamber on the Government's action at the London conference.

CONFIDENCE VOTED IN HERRIOT GOVERNMENT

Paris, Aug. 25.—The Chamber of Deputies early Sunday morning voted confidence in the Herriot Government by 336 to 304, following the long debate in the Chamber on the Government's action at the London conference.

Three evangelists visit Toronto on trans-continental preaching tour in motor car.

Wheat pool, which will handle much of prairie crop, will pay dollar a bushel down for current delivery.

PRINCE SAILS FOR AMERICA

Went Aboard at Four O'clock in the Morning.

WAS ASLEEP IN BED

When the Crowds Were Waiting For Him at the Steamer Train.

Southampton, Eng., Aug. 25.—In holiday attire, with flags flying and bunting waving, the giant liner Berengaria, with the Prince of Wales on board, sailed for the United States at 2.30 o'clock Saturday afternoon. The prince is on his way to visit his ranch in Alberta, Canada.

The quays were lined with large crowds of townspeople, who waved enthusiastic farewells to the departing vessel, but there was no response from the royal quarters where the prince was sleeping peacefully, having gone to bed for a much-needed rest immediately after he went on board at 4 o'clock in the morning.

Determined there should be as little ceremony as possible in connection with his sailing, his Royal Highness late Friday slipped quietly out of London by automobile, spent a few hours at the Isle of Wight, about twenty miles from here, boarded the Berengaria almost without being noticed and immediately went to bed.

As the prince intended travelling in the guise of an ordinary passenger, it had been arranged that he should come here on the regular boat train leaving the Waterloo Station, London, at 11 o'clock Saturday morning. He was assured of a hearty send-off there by the crowds who always surge around him to witness his comings and goings.

The last minute change in his plans caused much disappointment among his admirers. On the Isle of Wight the prince spent a few hours with Lord and Lady Louis Mountbatten who are accompanying him on the voyage. He left in a motor launch during the small hours of the morning and boarded the Berengaria.

The giant liner was dressed in her best array to receive the prince, gaily-colored flags flying from stem to stern and from starboard to port in honor of her royal passenger. Externally the liner looked like a brand new ship, for she has been painted all over and up to the last minute workmen were busy putting finishing touches to her hull.

The ship's chief has prepared several decorative features for the cold buffet. The centrepiece, carved in wax, represents Neptune raising aloft a trident in his right hand and driving four sea horses with his left hand. Neptune stands in a chariot and is rising from the sea.

Baptists Immerse Converts in a Distillery Vat

Greenbrier, Tenn., Aug. 25.—Recently converted Baptists here have undergone the unusual sensation of being immersed in a pool formerly used as a vat in distilling a famous brand of whiskey.

When the word was sent out the converts were to be baptized in the pool once used to cool the condensing coils of the Greenbrier distillery, everybody went to the baptizing. Several thousand persons were present and only a small per cent. of them could get into the building. Thirty-three were immersed and it took almost all day for the ceremony.
