

HEATING BILL OF \$4,000 PRESENTED TO THE CITY

In Connection With the Isolation Building At the General Hospital.

The Mayor Is Surprised As the City Considered That Contractors Were Liable For Heating Buildings Under Construction.

Mayor Ambrose received quite a shock on Thursday morning when a bill was presented to him from the city treasurer's office for \$4,000 for the heating of the city's isolation building at the General Hospital during its construction. The bill was from R. Easton Burns, on behalf of the hospital building committee. Mr. Burns stated that a settlement was being made between the hospital committee and Queen's University, and the university engineers figured that the city's share of the heating cost of the isolation building would be about \$4,000. It was proposed that the city should pay \$3,000 on account.

The civic authorities never expected that they would be billed for heating the isolation hospital building during its construction, and the

mayor is of the opinion that the contractors are liable for any cost in that regard. The city council voted \$175,000 for the construction of the building and left the matter of issuing the contracts to the hospital building committee. It is understood that the building has not cost \$175,000 and that the heating bill could be covered by it and then there would be some money left out of the appropriation.

However, the city authorities intend to go carefully into the matter. The communication from the hospital committee has been placed in the hands of Ald. Nash, chairman of the council charities committee, and it will likely go from him to the city solicitor for an opinion as to whether the city is liable. This means a careful study of the contracts.

Peterboro Protests Kingston Players And Wants Play-Off Games Eliminated

(Special to the Whig)

Oshawa, Aug. 28.—When Secretary Nott of the Central Ontario Amateur Baseball League arrived home from the final game of the Peterboro-Kingston championship series he found a formal notice of protest from the Peterboro baseball club, signed by the president, N. E. Phelan, as to the eligibility of players Kelly and Rickman, under the residence rule, contending that neither player was a resident of Kingston by January 1st of this year and asking that the game of last Saturday and also that of Tuesday be eliminated from the league records.

The protest was accompanied by a marked cheque for \$25, according to the Central Ontario League constitution. A copy of the protest was wired to Business Manager Booth and President Steacy of the King-

ston club this morning at 10.30 o'clock and officials of the Kingston club will have forty-eight hours, or until twelve o'clock Saturday noon, to have defence filed, accompanied by marked cheque for \$25, in the hands of Secretary Nott at Oshawa.

It is hardly thought that this latest double-cross of the worthy Mr. Solomon will amount to anything. Kelly's record has been questioned before the league this season and he was upheld by the executive. Rickman can also stand inspection. A meeting of the local executive will be held this evening to send back a reply and defence.

Jakle should have been satisfied that Kingston took him into the playoffs and thus gave him a good financial windup.

Roland Hewgill Dies of Injuries Received When Struck By Automobile East of Kingston

Roland Hewgill, the Queen's third year arts student, who was struck by a car on the provincial highway early Wednesday morning, died in the General hospital at 1.45 o'clock Thursday afternoon without completely regaining consciousness. Death was caused by injury to the base of the skull, shock and injury to one kid-

ney. Dr. Gardiner, coroner, has called an inquest at eight o'clock Thursday night in the Police Court.

The deceased was twenty years of age. He is survived by his parents, Lieut. and Mrs. W. P. Hewgill, 352 King street, one elder brother, Frank, a science graduate of Queen's, and one sister, Myrtle.

PREMIER AT PETERBORO.

A Big Community Picnic Being Held In His Honor.

Peterboro, Aug. 28.—Right Hon. W. L. Mackenzie King arrived in Peterboro this morning to take part in a big community picnic organized by G. N. Gordon, K.C., M.P., deputy speaker of the House of Commons. The premier was accompanied by Hon. George F. Graham, minister of railways and canals, and W. E. N. Sinclair, R.L.A., leader of the Liberal party of Ontario. A monster parade has been arranged for the afternoon and a crowded evening of speeches and sport at the exhibition grounds.

WARSHIPS PROCEEDING TO SHANGHAI, CHINA.

Shanghai, Aug. 28.—British and United States warships are proceeding here from Chefoo and Wathaiwei in connection with the seizure by Tientsin of Chokiang and Kiangsu province of different sections of the Peking-Nanking railway.

Grapes Are Nearly Ready. St. Catharines, Aug. 28.—The crop of early grapes in the Niagara district is so far advanced that shipments will begin on Monday, September 8th.

OUTLOOK AT BERLIN IS REPORTED WORSE

Paris, Aug. 28.—The outlook for ratification by Germany of the Dawes plan agreement concluded at the recent international conference at London, became worse today, according to the latest news from the German capital. The reichstag probably will vote on the pact late tonight, it was learned by officials here.

400 Mexican Girls Elope in Six Months

Mexico City, Aug. 28.—Love laughs more heartily every year in Mexico at parental objections to marriage, according to statistics given out by the Department of Justice, wherein it is noted that in the first six months of 1924 charges of kidnapping were filed by irate parents against four hundred ardent swains accused of eloping with their hearts' desires. The total would be much greater, officials declare, if the poorer classes took the trouble to notify the authorities of runaway matches. Eighty-five per cent. of the elopers were minors.

LAUGH SURELY ON PETERBORO POLICE

Who Ordered Cutting of Weeds, Which Happened to Be Potatoes.

Peterboro, Aug. 28.—Peterboro police are long on liquor prosecutions and short on botany. They have been waging war on those letting weeds grow to seedling on vacant lots. Recently they sent a preemptory notice to H. B. Rye, reeve of the adjoining Township of Monaghan, that unless he immediately cut down weeds covering several vacant lots he owns on the city side of Boundary road, prosecution would result. Mr. Rye explained to the energetic "weeds" of the law that their "weeds" were fine crops of potatoes in full bloom. Prosecution collapsed.

WANT HUDSON'S BAY RAILWAY FINISHED

Hon. Mr. Motherwell Says Canada Is in Position to Do Work Now.

The Pas, Man., Aug. 28.—"The Hudson's Bay Railway is not a political football. It has been the policy of the Liberal Government ever since the time of Sir Wilfrid Laurier that this route should be developed primarily for the benefit of all Canada, neither for the East nor for the West, and Canada has been committed to build a road by both Liberals and Conservatives," declared Hon. W. R. Motherwell, Federal Minister of Agriculture, speaking yesterday at a luncheon tendered by The Pas Board of Trade.

"Now, the war has been over five years, and I believe Canada is now capable financially of going ahead and completing the Hudson's Bay Railway," the Minister continued.

Fullest Amends Made For Official's Death

Washington, Aug. 28.—The fullest amends have been made by the Persian government for the murder of Major Robert L. Imbrie, late American vice-consul in charge at Teheran.

Honors paid the body of the American official by the Persian national authorities and people during the long trip from the capital to the port of Bushire on the Persian Gulf and his embarkation on the scout cruiser Trenton left nothing to be desired. In addition the Persian government has agreed to pay an indemnity of \$60,000 to Mrs. Imbrie.

A MYSTERIOUS CASE.

Dr. A. A. Cauley, formerly of Toronto, Ill in Hamilton. Hamilton, Aug. 28.—Stricken with a malady that baffled the diagnosis of specialists hurriedly brought here from Toronto, Kingston and Buffalo, Dr. A. A. Cauley, formerly of Toronto, but who has practiced here since graduation, yesterday recovered consciousness in St. Joseph's Hospital after being in a coma for seventy-two hours.

In a bulletin, Dr. Leeming Carr, L.A., said that the malady had been diagnosed as meningitis of a peculiar form. Although the patient's condition is still critical, it is believed that the crisis has passed.

Dr. C. E. O'Connor, of this city, was called to Hamilton on the case. Dr. Cauley is a graduate of Queen's receiving the degree of M.S., C.M. in 1915. His home was at Lombardy.

POWER PLANS ARE HELD UP

No Dam At Morrisburg For Present At Least.

FEAR FURTHER DELAY

Because of the International Aspect of the St. Lawrence Case.

Ottawa, Aug. 28.—Plans of the Ontario Hydro Electric Commission for a power dam on the St. Lawrence at Morrisburg are held up indefinitely because the Department of Public Works considers that the approval which ordinarily it would give, would not be sufficient by reason of the international aspect of the case.

The Ontario Government has been inquiring within the past few days as to the status of the case. It is being advised that it has been referred to the committee which is acting in conjunction with the international body of engineers to investigate the whole St. Lawrence power navigation project. Two of the members are abroad and no action will be considered before next month.

The Hydro Electric filed its application for approval of the dam last January, and forthwith there was a protest from the Dominion Marine Association. Instead of the departmental engineers investigating it was considered that the subject ought to be referred to the larger committee of engineers advising in regard to the St. Lawrence project because of the international aspect. It has not been acted upon.

Meanwhile the general St. Lawrence scheme is held up because the United States has suggested an enlarged scope of the engineering inquiry and the Government here is negotiating on the subject, secrecy being maintained as to the additional question in which Washington would like to have investigation made.

Pinchot Again Dry Law Violators

Philadelphia, Aug. 28.—Violators of the prohibition law were fayed by Governor Pinchot in an address before the Polish National Alliance convention here.

"We have made drink illegal in America by solemn enactment in our fundamental law," declared the governor. "Men without respect for our institutions—many of them, I blush to say, native born Americans—have undertaken to nullify this provision of the constitution and set their own appetites and their own personal profit above the law."

The governor asked the delegates to join with him and stand "firmly against these men who have forfeited all right to be called decent Americans by their peace-time treachery to the constitution."

Train Is Derailed; Forty Are Killed

Odessa, Aug. 28.—Forty passengers were killed and a larger number were injured when the express from Odessa to Moscow, which left here last night, was derailed 200 miles from here. The accident was caused by a break in the track, which apparently had been purposely torn from its bed by unknown persons.

STARTED AS FARM LABORER.

Made Fortune of Nearly a Quarter Million at the Tailor's Bench. St. John, N.B., Aug. 28.—Coming to Canada a lad of sixteen and starting as a farm laborer, Michael Farrell, tailor, who died recently, left an estate valued at \$225,600, according to papers filed in the probate court here. Of the total \$208,600 was personal property. After charitable and personal bequests amounting to \$5,500 have been paid the estate is to be divided equally among his three nieces and a grand niece.

Newsy Bits From To-day's Classified Ads.

There is lots of good news in the Whig's Classified Section to-day.

At present we are advertising several good positions vacant. Probably one of them would suit you.

Were you wanting to sell your farm? How can you expect to sell it if you do not list it in the Whig's Classified column along with the farms for sale.

MOONSHINE EXPLODES; TWO ARE KILLED

Detroit, Mich., Aug. 27.—Two prisoners were killed and fifteen others seriously burned in the explosion of a large quantity of confiscated liquor in a police station here yesterday afternoon. Police were attempting to transfer the liquor outside from the vacant cell where it had been stored when the explosion occurred.

Burglars Fail to Get Loot in Freight House

Clayton, N.Y., Aug. 28.—Burglars gained entrance to the freight house of the New York Central station at night but apparently nothing was taken. Entrance was gained to the building by taking the hinges off the door. Light freight had been delivered so that only bulky, heavy pieces of freight remained in the shed.

The burglars attempted to enter the ticket office in the station. They bored several holes in the door but due to a strong, double lock they were unable to gain entrance.

FOUGHT WITH FISTS IN THE REICHSTAG

Police Entered and Forcibly Removed Two of the German Communists.

Berlin, Aug. 28.—The police entered the Reichstag yesterday afternoon for the first time in its history, forcibly removing two Communist members who had refused Reichstag President Waisra's demand that they leave the chamber. This unprecedented action followed a wild tumult at this morning's session, when a regular fist fight occurred, wherein Herr Brodau, of the Democratic party, received a black eye and was otherwise so roughly handled that friends had to carry him from the hall and summon a physician. Fists flew right and left during the melee, and several members, beside Brodau, carried away marks of the fray.

President Waisra left his seat in disgust thus automatically closing the session, but the row continued on the Reichstag floor for some minutes before the participants could be quieted.

GIRL CHANGED HER MIND.

She Turned Down Hubby-To-Be for Oshawa Young Man.

Oshawa, Aug. 28.—Engaged to be married to a young man in Cobourg, a Prince Edward county girl recently performed the feat of leaving home with an Oshawa young man. Naturally the hubby-to-be was upset and according to latest information is still in Oshawa at present.

The Cobourg young man searched far and wide without success. Armed with a photograph, he compared it with girls who disembarked from the Rochester ferry with the same result.

Police departments were notified of the disappearance and on Tuesday License Inspector Mason of this city telephoned Cobourg that the happy pair were here.

The girl's parents communicated with the police with a view to getting assistance, but it is doubtful whether any charge can be laid against "the man who came between."

Give Moths Pneumonia, New Way to End Pests

London, Aug. 28.—Moth balls and lavender bags now are out of date as a means of getting rid of moths. The really latest method of exterminating these pests is to give them—pneumonia! That isn't so difficult as it sounds.

When it is found moths have got into one's best coat, that article should at once be placed in a refrigerator and left there several days, then suddenly expose for a short time in a temperature of about 50 degrees, and then again refrigerated. After this treatment it is said any article whether clothes or furniture, will be entirely free of moths.

Envoys to Japan and Mexico. Plymouth, Vt., Aug. 28.—Appointment of Edgar Addison Bancroft of Chicago, as ambassador to Japan, and of James Rockwell Sheffield of New York city, as ambassador to Mexico, is announced by President Coolidge.

The appointments fill the two major vacancies in the diplomatic corps. Both men are prominent in the law profession.

A Young Lady Drowned. Waddington, Aug. 28.—Beatrice Converse, aged sixteen, of Fort Jackson, St. Lawrence county was drowned while swimming at the pulp terminal dock here on Tuesday. Other bathers were too far away to come to her assistance and a boy's attempt to save her was of no avail. Divers will seek the body tomorrow.

OVER 100 INJURED WHEN HUGE WAVE HIT STEAMSHIP

The Arabic Was Lashed And Buffeted in Tornado Off New York.

Port Holes Were Crushed In--Liverpool Fireman Sustains a Fractured Spine In An Effort To Rescue a Little Girl.

New York, Aug. 28.—After being lashed and buffeted by a storm of tornado proportions, the White Star liner Arabic arrived in port at five o'clock yesterday afternoon, with a ten degree list and a casualty list of over one hundred passengers. The forty-five of whom were under the surgeon's care. In response to radio messages from Captain Hickson, ambulances were waiting at the pier and those of the injured who required hospital treatment were taken to various institutions as soon as the liner docked. None of the passengers, it is believed, are fatally hurt. Sixteen members of the crew received injuries.

Officers of the liner reported that the vessel encountered a terrific hurricane Tuesday afternoon off Nantucket. The ship nosed into the storm and rough seas without damage, but a giant wave rolled over her about 3 p.m., shattering her upper structure from bow to stern and shaking up the passengers roughly.

The list of the vessel was caused by a shifting of the cargo. The Arabic was on her first trip as a cabin ship under the White Star flag, and came from Hamburg and Cherbourg via Halifax, where she landed many of her original 385 cabin and 226 steerage passengers. Originally the Arabic was the North German Lloyd liner Berlin, and she is a staunch twin screw ship of 16,786 gross tonnage with a reputation as a storm defier. She sailed from Halifax late on Monday night after a comparatively tranquil trip to that port, and encountered the hurricane yesterday when off the Massachusetts coast.

The Hurricane.

Soon after noon the wind rapidly rose, reaching a hurricane velocity of 120 miles an hour and throwing up great pyramids of water, some of them so high that Captain Hickson from the bridge, 85 feet above the water, stared at them on a line.

About 3 p.m. a tremendous wave

TO BE CENTENARIAN IN 1925.

Tillsburg, 100 Years Old Next Year, Will Celebrate.

Tillsburg, Aug. 28.—The News says that Tillsburg is going to wait till next year—that will be after the referendum.

Most Ontario townships have been holding old boys' reunions this year, but Tillsburg intends staging a real old boys' reunion next year, to commemorate 100 years of its existence. On March 26th, 1825, the first white settlers arrived here and immediately started to make it habitable, in the persons of George Tillsburg and Benjamin Van Norman. The good work started by these gentlemen was ably continued by the late E. D. Tillsburg, and the fine streets are

struck the ship broadside on the starboard bow, slightly abaft the bridge, throwing the vessel down to an acute angle.

Between eighty and one hundred passengers, mostly women and children, were gathered in the main lounge when the wave struck. The furniture in this room, which is amidships, was not made fast for the most part, and the loose pieces were hurled with the men, women and children, into the angle on the port side in a general mix-up. As the ship righted itself from the terrific blow the stewards began exhorting the fallen passengers, many of whom had sustained bloody cuts and lacerations.

In other parts of the ship the furniture was fast, but passengers were thrown to the decks and bruised, some seriously. Water poured down through ventilators, drenching all who happened to be nearby. On the boat deck the few who were out were saved from being swept overboard by the railing and the rolling chairs which formed a barrier.

Port Holes Crushed In.

Port holes were crushed in and there was scarcely a cabin that did not get drenched. Improvised couches were put up in the dry spots, where many of the passengers slept until the ship docked today.

The ship's supply of fresh water was contaminated, but owing to the short distance from port little discomfort resulted, as bottled waters were supplied.

The ship had all the ear-marks of having gone through a terrible storm. Four life rafts and one lifeboat had been swept overboard, nine other boats were badly smashed and practically all outside woodwork on the decks was scarred or smashed in.

The most seriously injured was Frank Kearney, of Liverpool, a ship's fireman, who sustained a fractured spine in an effort to rescue a little girl who was being tossed about in the wreckage.

the result of his energy and good management.

GROWS 18,500 IN 3 YEARS.

City of Windsor's Population is Now 52,000.

Windsor, Aug. 28.—The population of Windsor has increased 18,500 in three years, according to a close estimate just completed by local officials, which gives the city a total of 52,000.

The combined population of Windsor, Walkerville, Sandwich, Ford Riverside and LaSalle is placed at 77,255. Each community, the figures show, has made substantial increases since the completion of the 1914 census.

SOME FIRE PREVENTION REGULATIONS NEITHER KEPT NOR ENFORCED IN KINGSTON

Dangerous Combustibles Kept in Buildings—Little Care Taken in the Burning of Rubbish in the Open Air—Dead Letter By-law.

Here are some sections of the city's by-law regarding the prevention of fires, which many citizens do not keep and which the civic authorities do not enforce:

No person shall place, have or keep hay, straw, grain in straw, cotton, flax, hemp or wood shavings or any other easily inflammable material in stack or pile in the city without securely enclosing or covering the same so as to protect the same from the danger of ignition by fire.

No person shall smoke or have in his possession any lighted pipe or cigar in any building where straw, shavings or other combustible material may be.

Any person requiring to burn any hay, straw, chips, shavings, rubbish or other combustible materials in the open air shall do so during the day-time on a damp day when there is no wind, and at a distance of not less than seventy feet from any house or building or any vessel in the harbor, and such fire shall be constantly watched and completely extinguished before nine o'clock at night of the day in which it is lighted.

The chief constable or any police

constable of the city may enter in or upon any lot, building or premises in or upon which there is any stove, stovepipe, furnace, chimney, flues or any shavings, wood, lumber, gunpowder or other combustible or inflammable materials which may be dangerous in causing or communicating fire.

In case such chief constable or other constable or officer of the city shall find in or upon such lot, building or premises any material or thing which may be dangerous in causing or communicating fire, he shall cause notice in writing to be served forthwith upon the owner, tenant or occupant to take down, remove or make secure and safe such dangerous material or thing, and thereupon such owner, tenant or occupant shall forthwith take down, remove or make safe and secure all and every such dangerous material and thing.

Notwithstanding the above fire regulations, cellars are full of dangerous combustible material and even prominent citizens are disobeying the one with regard to burning rubbish in the open air. The fire department has on various occasions been called to places where fires have occurred because rubbish has been burned close to fences and buildings.

"You Said It, Marceline!"

By MARCELINE DALROY

On "Dumb Lovers"

The GREATEST LOVE is SILENT because it is PAST WORDS—But NO GIRL wants A LOVER THAT WAY. She wants him at LEAST To SAY that he CANT say The things he WANTS to say—Then she will probably sit A LITTLE CLOSER and SQUEEZE his HAND A little HARDER in Order to make it EASIER For him to SPEAK.

He KISSES her lips— If he is, he tells her He'd like to; Of course, there is a time To talk of love— No man should talk to a woman Of love when she is Hungry, this is very bad Taste and may make Both him and his love Appear distasteful. Women, after all, are Not very different from men— They soon get fed up. If they are not fed right.
