IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place.

Because of its germ-destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rash, pimples or roughness.

You do not have to wait for improvement. It quickly shows. You can get a little jar of Rowles Mentho-Sulphur at any drug store.

Pyramid Rids You of Piles

A box or two of Pyramid Pile Suppositories has enabled so many others to recover, many saved from operations. It is needless for you to suffer the pain, strain, nervous, itching and bleeding of protruding piles. Slip into any drug store and get a 50-cent box today. Relief is sure.

straightway she fell to belaboring the pate of the defenseless count. "But, my dear!" remonstrated that bewildered gentleman, "what is the cause of this undue merriest?" "Brute! Monster! Ingrate!" mouthed the infuriated woman, "to-day is our wedding anniversary and you have forgotten it!"

"Daring," rebuked her lesser half, "isn't this the anniversary of your marriage to your third husband?"

"My mistake," murmured Peggy, thoughtfully.

THE GASOLINE AGITATION.

Extract Taken From "Canadian Labor Press," Ottawa, Oct. 11th.

Considerable agitation is going on at the present time in the City of Toronto for the purpose of having the city engage in the business of supplying gasoline at retail prices to motorists. Ostensibly the idea is to give Toronto any benefit of cheaper gasoline at present being supplied by a few refineries in the United States.

But the motive behind it is really deeper than appears on the surface. The facts are that a few United States concerns have a surplus of gasoline at the present time and they intend to make that surplus a weapon to capture the Canadian trade from the firms already established here. Once that is done, prices will go up again, probably beyond what they are now. What should be Labor's attitude to such a price war? At first sight it will be said that they should welcome anything that would reduce prices. But should they? Labor must first look at the conditions existing in the United States plants and then compare them with the conditions under which the workers are employed by the Canadian firms, and if that is done, then the advantage, so far as the worker is concerned, is overwhelmingly in favor of the Canadian firms.

Investigation shows that their workmen are treated well, of which further proof can be found in the fact that their workers have been with them for years, that a great deal of self-government exists throughout their plants in connection with conditions, that employees are taken into consultation and have a voice in the industry, and that by means of insurance and welfare methods the workers is in an excellent condition as compared with the same class of labor in the United States.

There is also another aspect to be considered and that is the Canadian companies have plant equipment, the manufacture of which has put millions of dollars in wages into the pockets of Canadian workers and if we are to build up Canadian industry, then it is better to have these plants working at full time to have them idle and buy our gasoline from the United States.

Labor must strenuously oppose the proposal to have the city of Toronto engage in the gasoline business, because its effects would be to damage Canadian industry which is doing good work, and because it means adding more unemployment to the present situation without giving the benefit of cheaper gasoline to the consumer, and in fact, without any return benefits at all.

"Those whom the gods would destroy they first made mad," says an Eastern proverb and surely it is madness for Canadians to agitate for a condition that would help to cripple Canadian industry at a time when we all ought to be thinking out ways and means to build it up.

Steamships Preferred Is Active.
At Montreal, on Tuesday, Canada Steamships Lines preferred furnished trading in 5,100 shares, this being the most active day in many months for this issue. The principal buying was from strong quarters, and the price jumped 3 1-2 points to the new high level of 54 3-4. The president of the company some time ago intimated the necessity of new expenditures for upper-lakes shipping and the immediate future would seem to hinge on the decision of the directors as to whether the surplus that has been accumulated under the new regime should be expended for the purpose of such extensions or for resumption of distribution on the preferred stock.
