Disease Germs Doomed

Many have lost terrors for the Scientist

The progress of recent years in medical research is little short of marvellous. Daily, science kills germs by the million Daily, new ones are being discovered isolated and exterminated by the march

Science is winning. What were once egarded as serious diseases are now laughed out of countenance by the doctors. Fearlessly they plunge naked hands into swarms of them, their only precaution being to rinse their hands afterwards with a reliable germicidal preparation. We are witnessing the pirth of an era when the world will

have little to fear from microbes. Absorbine Jr., besides being the all-purpose liniment that removes pain and ful antiseptic that is death to the microbe

By-ron wrote in ridicule of this duel, and Earth has no sorrow that Heaven can-Moore instantly sent him a challenge, but no duel followed, and the two poets became fast friends.

Moore's poems became immensely popular, and he received prices for them far in excess of anything paid Forth from the throne of God, pure for literary work up to that time. For ceived \$15,000 before a copy had been sold. Among his most popular works Earth has no sorrow, but Heaven can each other better his "Irish Melodies," "National Airs," and his "Ballads and Songs," containing such universal favorites as, "The

The Good Samaritan

By Wm. E. Gilroy. D.D., Editor-in-chief of The Congregationalist. Here, in a story that it takes only bout one minute to read, Jesus has iven us the most important thing in all religion and in all literature.

If everything that has been written and taught were to be wiped out, and we had the privilege of saving just one story from it all, surely the one most significant and important for humanity would be this story that we call THE PARABLE OF THE GOOD SAMARITAN!

It begins with the most important question man can ask, What Shall I do to inherit eternal life? It is true that the question was asked to tempt, or to try, Jesus; but Jesus answered it very seriously. He knew that a man

men come to write hymns, because for in all thirty-two hymns, which he pub-" '- tota with the title "Sacred grow out of a deep spiritual experi Songs," In this set were some which gifted song-writer and poet, "Sound the Loud Timbrel o'er Egy-

> life, and of his own life in particular, until he learns to ask that as the great-

> est of all inquiries. So our story is related at once to the noblest quest of which man is capable. Naturally, therefore, Jesus begins with the highest power that man may

have in attaining that quest. He links man up with God. To love Him who has loved us, and to love Him with all the heart, soul, strength and mind, is the first duty and privilege of man, if he wants to start right at the beginning in seeking the highest and best life that is possible, He must get right

Simple and Natural.

And in the next place, or in the same place, for the second great commandment is "like unto the first," he must get right with his fellowmen,

How natural and simple that all is! Was not this the glory of Jesus that he revealed the supreme things so clearly and simply? How could this matter of eternal life be otherwise?

Is not life a matter of the right relation of a man to his environment? And Jesus says that eternal life is the right relation of man, through love, to his eternal environment - the living God and the eternal souls of his fellow-

Notice also how Jesus made the lawyer define these things for himself. Jesus did not say to him, "You know what's written in the law," and then go on to expound an interpretation that the lawyer might have questioned. He let the lawyer do his own interpreting. "What," he asked, "is written in the law? How readest thou?"

And the lawyer had to give an honest answer. He knew the truth. He St. Luke's Church, Nelson Street. 7th. Rev. L. F. Kipp, of Toronto, defined it with unerring exactness, sounerringly that Jesus approved his de-Chalmers church, corner Ear! and | ed right: this do, and thou shalt live."

The Railway Situation

The railway situation in Canada is improving. The first two weeks He has the great example of Jesus, of November showed a gain of 4,035 him. It is not for lack of truth but for period of last year. This is most en grain to be moved. It means at leas two things: First, that the genera business of the country has improved: and second, that the western crop has been very actively in mo

tion in order to realize on high

market prices.

The western situation is aptly il lustrated in the fact that during the second week in November last year 15,818 carloads of grain were mov ed, while this year the number was 12,965. Having regard to the quantity available, the performance this year is sati-factory. There was this year in the West an increase in car loads of coal, live stock, pulpwood, lumber, ore, merchandise and mis cellaneous. The decline was

most wholly in grain. In the East there was a better ment for the first two weeks November, as against last year's traffic. The gain- were in grain, osl, pulpwood, timber, merchandise and miscellaneous. The increase in the last two classes amounted to 974 carloads, which, while not any way suggesting special activity is clearly significant of improved conditions as to trade. As the National City Bank of New York, pointed out in its November bulletin, "carloadings of freight constitute the best available index to the volume of commodities moving in commerce."

The railways are optimistic. Since the elections in the United States and Great Britain, setting up polisays out of this great parable to you tieal stability in both countries along old party lines, a tremendous increase has taken place in the market value of securities. This is accepted as demon-trating the return of confidence. Uncertainty al-
