The circulation of THE BRITISH WHIG is authenticated by the A B O Audit Bureau of Circulations

Wonder if it isn't about time to dig up old King Tut again?

The value of a kiss depends upon the law of supply and demand.

To the charming divorcee, life is just one darned husband after another.

Only a few more months until bathing girls will be back on magazine covers.

It is easy to figure what you should have said after it is too late to say it.

Here's news that will tickle the wild ducks. A duck-hunter had his feet frozen.

The vital and telling phrases coined day by day are soon incorporated in our language.

Character is made by the things you stand for; reputation is made by the things you fall for.

The rottenness in Denmark appears to have communicated itself to the German mark.

What, in three letters, will a man tell his wife when he gets home very late at night?

When the man tells her that he loves her wonderful mind, he means that she isn't much for looks.

Here's a double one. Who just fiddled around while what burned? Both words in four letters.

Beauty secret: Biting the finger nails leaves a bad impression on your fingers and on your friends.

If you are worried, just think of the money you save this season by strawberries being out of season.

The only crime wave that shocks a rural community is when a fresh young thing waves at a married man.

It was Benjamin Franklin who said: "He that cannot obey, cannot command." This saying still stands true.

What does one chew when one desires to refrain from kissing a girl? Seven letters. Begins with "to."

Why is it a woman always does what she does? Seven letters. Begins with "be" and ends with "cause."

Who is it that we know isn't Santa Claus and cracks his shin on a chair in the dark and cusses? Six letters, please.

An Oregon man is reported to have been refused admittance to a poorhouse because he had an automobile. Maybe that was the reason he had to apply.

BIBLE THOUGHT: IS IT NOT to deal thy bread to the hungry, and that thou bring the poor that are cast out to thy house?

THE MOTOR IN BIG CITIES.

The impossibility of getting conveniently and easily into the centre of any large American, or indeed Canadian, city in one's own automobile, whether for the purpose of attending one's office, or of shopping, or of attending a theatre, has already become a subject of common jest.

This is a very important development, and one which is destined to add materially to the disadvantage of the large city as compared with the small city for a place of residence for the well-to-do working-classes and the middle classes. It does not affect any automobile owner who can afford his own chauffeur, for the question of parking does not then arise; but like most kinds of personal service now-a-days the private chauffeur is the prerogative only of the decidedly rich.

But the dweller in the town or small city can still get out of his car every use of which it is capable, and that at a cost for garage space (and probably also for traffic fines and repairs) much lower than that which must be paid by his large-city brother. The future of the privately-owned car belonging to the middle-class citizen in cities of the size of Toronto and upwards is strictly limited; in the country and in smaller places it has no limits.

REVOLUTIONARY LABORATORY.

M. Krassin, the first Russian Soviet ambassador to the French Republic, announced on his arrival last week that he was glad to find himself in "that revolutionary laboratory," the country of France.

The majority of the French people are, we presume, proud of the general results of their one great historic revolution, though there are probably some details about which even they could wish had occurred otherwise.

Stomach or Peptic Ulcer. The number of people suffering from ulceration of the stomach, peptic ulcer as it is called, is undoubtedly a large one.

But the number of people who think they are suffering with this condition is many times as large. Now the whole point of the matter is that an ulcer is an ulcer no matter whether it is found on the lining surface of the stomach, or elsewhere in the body.

Thus an ulcer of the stomach is a loss of substance, and a hole partly through the wall. The causes of ulcerated stomach are still matters of debate, but all agree that something happens to the stomach wall that makes it lose its resistance toward the action of the gastric juice.

Some people are able to trace their first stomach trouble, which afterwards was diagnosed as an ulcer, to some trouble with their teeth, tonsils, or other infection.

Now the symptoms are fairly definite once the ulcer really exists. An hour or two after a meal, and that means practically every meal, there will be a feeling of fullness, or pressure, or of actual pain.

One Farthing Reward! One farthing reward will be paid by the Victoria Fire Company to any person or persons who will produce the rascal that cut the hose of the company's engine on the morn-

ful, and periods of quiet life are therefore to be desired. We rejoice therefore that even M. Krassin could scarcely hail this Dominion of ours as "a revolutionary laboratory."

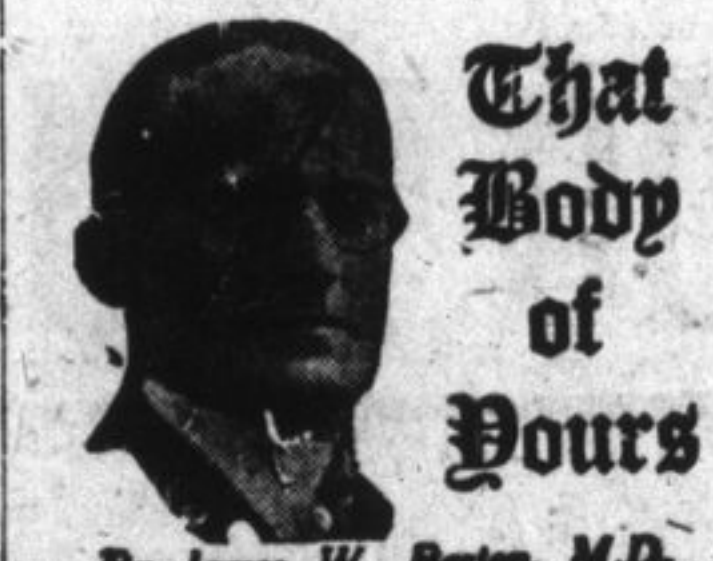

STOCK MARKET AND INCOME TAX.

One factor which is supposed to be aiding in holding the American stock market at high levels is the circumstance that rich security owners cannot sell out at a profit without having that profit added to their taxable income, and being therefore compelled to sacrifice a heavy share of their gains in the shape of income-tax.

The British and Canadian conception of income does not include gains due to an increase in value of a capital holding. There is no doubt that a great deal of income, and that in the hands of our wealthiest and therefore most heavily taxable citizens, escapes taxation under this definition.

But there is no such thing as perfect justice in any scheme of taxation, particularly in any tax on so vague and many-sided a thing as income. The American system itself tolerates many injustices, and it seems better that some income should escape its proper burden, as in Canada, than that great masses of securities should be tied up in the possession of owners who are afraid to sell them because of the tax they would have to pay if they did.

Next—What Is Fear KINGSTON IN 1854 Sidelights From Our Files—A Backward Look. Still Another Fire. Jan. 28—A fearful fire doing much damage broke out in Kingston late on Friday night, whereby the whole block in Ontario street, known as the Shaw water property was burnt down.

That Body of Hours By James W. Barton, M.D.

ODD FACTS ABOUT YOURSELF

You Make Your Face. "Beauty is only skin deep." There is something more than just the outer appearance of persons that makes you love or dislike them.

Caesar objected to a man because he was thin. Even to-day we are inclined to believe that the fat person is better natured.

Some twenty years later the same painter wanted to paint the face of Judas, the betrayer. He wanted the most despicable, the hardest face obtainable, so he went to the State prison and there found a young murderer with the meanest face a human being could possess.
