ON GETTING ALONG. Every community has its bers who can not get along their fellow citizens. Many offices, stores and factories have persons on the staff who are incompatible with their fellow workers. Every and woman knows somebody he or she "can't bear."

No two persons are alike, and evry nation and race has traits pecu iar to itself. Sometimes the poin of disagreement is opinion, such eligious, race or national prejud ice. Between individuals attitude habits, personality and tastes may be the cause for dislike. Sometimes people disgust others, and often they even anger their fellows. Women are said to be even more prone to take personal dislikes to others than are men, but among men there is often heard the remark, "If it wasn't for the law!"

But this is a large world and one another. Since it is no longer feas- protection. To-day, although they hermit or to retire to the recesses things, the skate, ski and sled are of a monk's monastic cell, people making countless men and women .er.se must learn to conquer their dislikes and children robust and vigorous, isn't pleasant, but it is frequently \$2.66 necessary. Workmen have been successful in abolishing many undesirable working conditions, but they have never evolved a sure method of of the ridding themselves of working companions. People make life easier and sweeter for themselves by seeing the one good trait in the person who has a dozen traits.

WHY MEN WORK

All about us the vast, complicated, ungainly thing which we call Indus- States?" The speaker mentioned try grinds and groans. Somewhere within that soulless body each of us moves back and forward, performing his task and seldom asking why he and all the other cogs should go round or what keeps the machine in

At its simplest there are two op- such gross discourtesy. posed forces in material life: the that an outstanding Canadian things we want, on the one hand, straining against the growing un- C.A. and a world secretary of the willingness of the land from which all things must be won. The more you take out of the earth the less it will give. This whole terrible hour; "unavoidable engine of Industry, all invention and organization, is an attempt to wring from the earth enough to satisfy us.

There is the growth of the people. Every generation is millions larger than the preceding. Every generation sees a greater demand for good if the standard of living is to be even maintained. But the wants the people grow in variety as well as in volume. Poor people to-day enjoy many comforts and advantages in bewilderment, "What is your imwhich not even the rich of other days could command. They are actually rich by the standards of the past, but poor to-day because of their inability to participate in the new known goods that have become necessities in this age. Man's wants and his capacity to use and enjoy appear limitless.

On the other hand the land which supplies all his wants is continually and it will not yield another crop of lie schools. the same size for the same trouble. These dissimilar incidents are The deeper a mine is worked the more does each ton of ore cost. enough to postpone his sentence by industry combined with invention. steadily making each man's work count for a bigger product. Machines which consume only as much goods as one or two men, produce more than could several men. By improved means of transportation we carry the product about with a less consumption of goods than if we did the same trade in the old way. Transportation has played an ever greater part by providing the means for goods to be produced in and flow from new areas of land. Higher organization has also the effect making our goods go further with less consumption in handling. Civilized man has developed a tremendous capacity for co-operation. Men all over the world are laboring to make the things he wants, while he does the same for them, without either knowing nor caring who the other is. And in all this tremendous complexity both the beginning and the end have been lost sight of and the simple law obliterated. there it stands, underlying all dustry and invention. It is well

CANADIAN DISCOURTESY.

The other day a Chinese docto of philosophy in addressing a gathe ing of the students and Queen's asked quietly: was not allowed to land at Vancouver but was made to go by way of Seattle and across the United the indignity almost casually and without any apparent personal grievance, which served only to deepen the regret of his hearers that Canadian officials, whether of the govern ment or of the transportation company, should have been guilty of scholar, head of the National Y.M. Student Christian Movement, had been refused permission to travel across China without the slightest Death Duties. reason being given for the refusal; would it not at once have been made an international issue?

Fortunately Canada had increased the good doctor's puzzlement by admitting him on the slight basis of nothing more than a hasty telegram and without any of the prescribed certification and red-tape, on his return from Europe. It went part way towards redeeming our previous says Mrs. Ferguson, in inhospitality. But well might he ask migration policy towards Asiatics?"

The other day an Indian child was forced to leave a Vancouver public school because his father insisted that he wear a turban. To break down that father's obstinacy the school board passed a special regulation that no school child might come wearing a turban. Hats, caps, toques or bare heads-no notice of these was taken. But the turban, in process of exhaustion. If a grain symbol of national pride, was outcrop is grown on a piece of land the lawed by special ordnance and its fertility of the land is partly spent wearer forbidden access to the pub-

nevertheless connected. The indignities to the foreign traveller and to This extra labor for the same result the schoolboy are both evidences of I means higher costs and less goods to an all too common mental attitude. go round. But man has been clever And as long as we consider ourselves superior to "foreigners," long as we are discourteous and inhospitable towards the representa tives of alien races, so long will our cherished superiority continue to a hollow and transparent mockery.

BETTER TRADE PROSPECTS.

All competent authorities-bank bulletins, trade journals, wholesale and retail reports and so on-are agreed as to two things: First, that both regards. Their statements as to what has happened are confirmed by the facts as to railway traffic, which afford an absolutely infallible der all conditions the product trade. The railways create nothing. They are merely the carriers

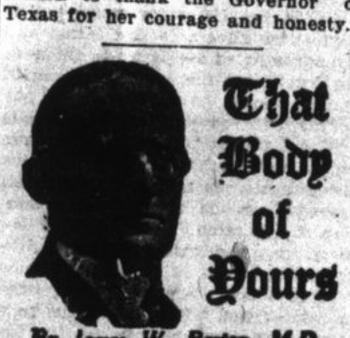

of commerce in motion. Since the end of 1924 there he been an almost uninterrupted crease in the number of loaded cars bleeding at once. handed over to the railways for novement. Despite a decrease 10,300 carloads in the period of last year, there had been up to the middle of February an increase of nearly 11,000 full cars. Word from the lands of winter This betterment has applied to both bright person had suggested to the snow and ice agrees that winter the East and the West. Especially sports never before attracted as significant has been the large gain many devotees as during this win- in carloads of merchandise. The thin rubber finger stall, covered with ter. In Europe, Canada and the bank bulletins tell us that this has vaseline, and inserting it northern part of the United States, been due, in particular, to revival in the nose with the open end toward

people at large. The only way to realize upon the inviting outlook is to pull together. Separations, class rivalries, and sectional selfishness may easily combine to rob us of the fruits of opportunity. On the other hand, unity is an all but omnipotent force in the winning of big results. In a word, we need to have a national ideal and a national impulsea broad and aggressive Canadianism that looks over and beyond all petty situations and petty purposes. If we have that as a working and impelling force, Canada ought to forge ahead this year as never before. One thing more must, however, be assured. Parliament must not tamper with the freight rates structure. That might easily be the pivot on which our brightest hopes will turn. There is where we need stability, with the safe, sure and sound hand of the Railway Commission on the When politics begins to shape railway rates the red signal of danger should be hoisted.

ly, when no offence of any kind was intended, it is most stupidly ridiculous to take offence; and if the aforesaid aristocracy are offended, all that can be said is that the British Whig is very sorry indeed that it did not use a more elegant phrase.

ch Canudas Story AB odwer Davies

March 7. This marks the day in 1842 when Queen's College, Kingston, was opened. The Scotch Presbyterians were disturbed over the lack of higher education. King's College, at Toronto, was virtually open to Anglicans only. For seven years the preparations had been on foot. Youths eager for education, had first to be prepared for matriculation. they were eligible for the and funds had to be raised by publie subscriptions. Finally the difficulties were overcome and studies commenced. The first Canadianborn principal was Dr. George Munro Grant, destined not only to place the college in the forefront of universities, but also to write his name indelibly upon the history of Canada. He had the vision of a prophet, and was endowed with wisdom and personal magnetism such as fall
