

DODGE BROTHERS TOURING CAR

When summer invites you into the country, you will appreciate more than ever the advantages of Dodge Brothers Touring Car. Open to fresh air and sunlight the Touring Car is healthful and delightful to drive.

Moreover, it is common knowledge everywhere that Dodge Brothers product is dependable. One-eighth of the total weight of the car consists of chrome vanadium steel—the toughest and most enduring steel that can be used in motor car construction. This is exceptional. It goes far to explain why Dodge Brothers Touring Car stands up so many years under the hardest usage.

HIGHWAY CONDITIONS

Report issued by the Department of Public Highways at Toronto.

Toronto to Quebec Boundary—302 miles. From Toronto city limits on the Danforth Avenue to Eastwood Avenue, sewers under construction. Advise through easterly traffic to use Kingston road from Queen St. From the junction of the old Kingston road and the new transprovincial highway, asphalt and concrete pavement now extends easterly to Bowmanville, a distance of 34 miles. Gravel from Bowmanville to Port Hope in fair condition. Paved, Port Hope to Cobourg. Cobourg to Trenton, gravel road in fair condition. Trenton to Belleville, mostly paved. Belleville to Kingston, gravel and tarred macadam in good condition. Kingston to Brockville, macadam road in fair condition except for a few breaks which are under repair. Brockville to Prescott, fair macadam and gravel. Prescott to Quebec boundary, fair macadam except for canal bank roads at Cardinal, Iroquois, and Morrisburg which are in poor condition.

THE CANADIAN GOOD ROADS CONVENTION

To Be Held in Quebec City on September 22 to 24 Next.

The twelfth annual convention of the Canadian Good Roads Association will be held on September 22, 23 and 24, next, at Quebec city, according to an official announcement by the president, the Hon. P. J. Veniot, Premier of New Brunswick.

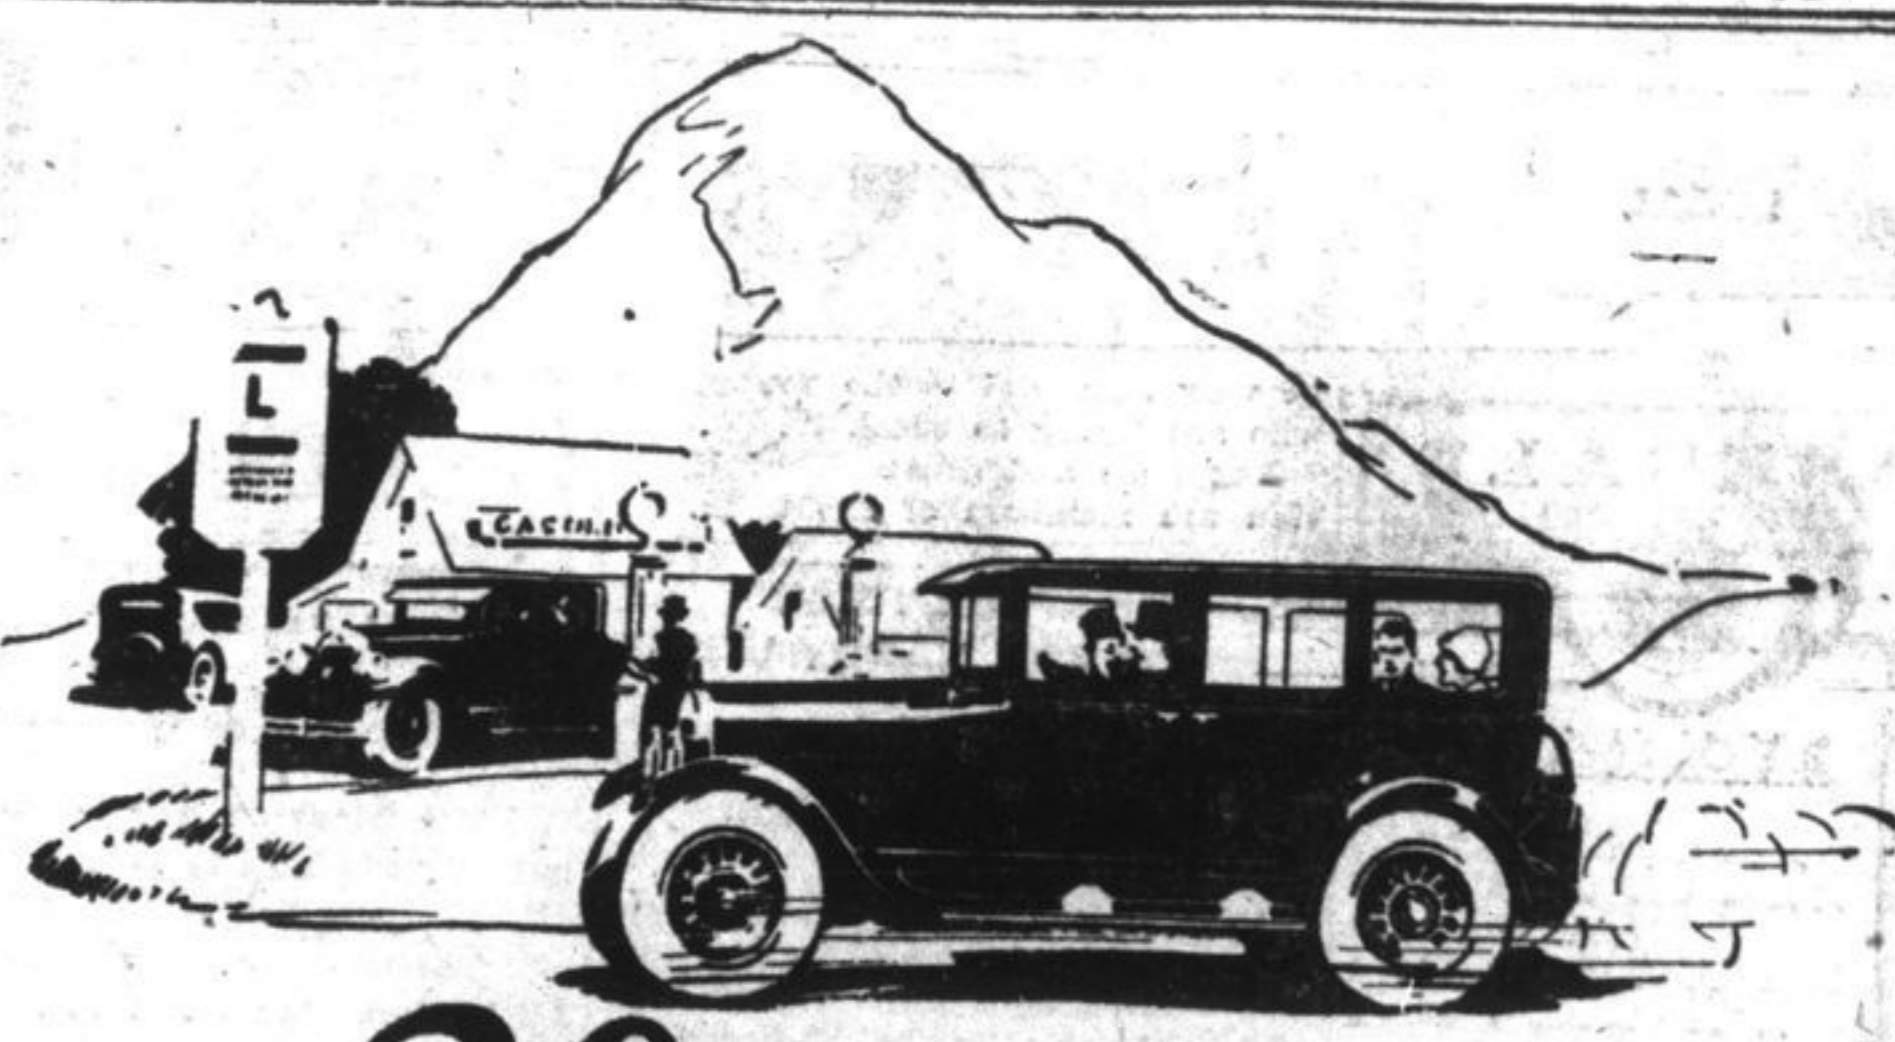

In recent years the convention has been held in the spring of the year, but the question was raised at the St. Andrew's-by-the-Sea convention last June as to whether this was the most suitable time for highway engineers, government officials, road contractors and municipal delegates to attend, it being pointed out that these were busy with the initiation of their road programmes for the year and that

valuable data made available at the meetings, could not be utilized until the following year.

The matter was studied at an inter-provincial conference held during the past winter, and it was decided to recommend a fall convention, with the result that the executive of the association have fixed the fourth week in September for the meeting.

At the request of the honorary president of the Good Roads Association, the Hon. J. L. Perron, the Quebec Government has kindly placed the Legislative Building at the disposal of the association for the holding of their sessions, while the Chateau Frontenac will be the headquarters of the convention.

The gathering in September will have an international aspect, for delegates from France and Great Bri-

30 Miles to the Gallon

Starting good news to tens of thousands—the first announcements of the new good Maxwell's amazing results. Never since the Chrysler took the country by storm has the automobile industry known such whole-hearted response—such a dramatic and decisive triumph.

Not content with designing into this car power and pick-up equaled only in the higher priced fields, Chrysler engineering genius and fine manufacturing facilities enable the new good Maxwell owner to enjoy these performance advantages with unparalleled economy.

In almost sensationally low cost of operation and maintenance—as in speed and acceleration—this great car has written a wholly new page in motor car achievement, and in the accomplishment of the great organization which builds the Maxwell.

We await with eagerness your permission to prove in a demonstration drive that the new good Maxwell is the greatest value in the field of fours.

We are pleased to extend the convenience of time-payment. Ask about Maxwell's attractive plan. Maxwell dealers and superior Maxwell service everywhere.

The New Good MAXWELL

BUS LINES COVETED

BY MUNICIPALITIES Which Seek to Take Over Those That Pay.

There is quite a pretty struggle going on at the moment in many places over the desire of the municipalities, where the conditions are suitable and the prospects at all attractive, to secure the business of passenger conveyance by public hire vehicles.

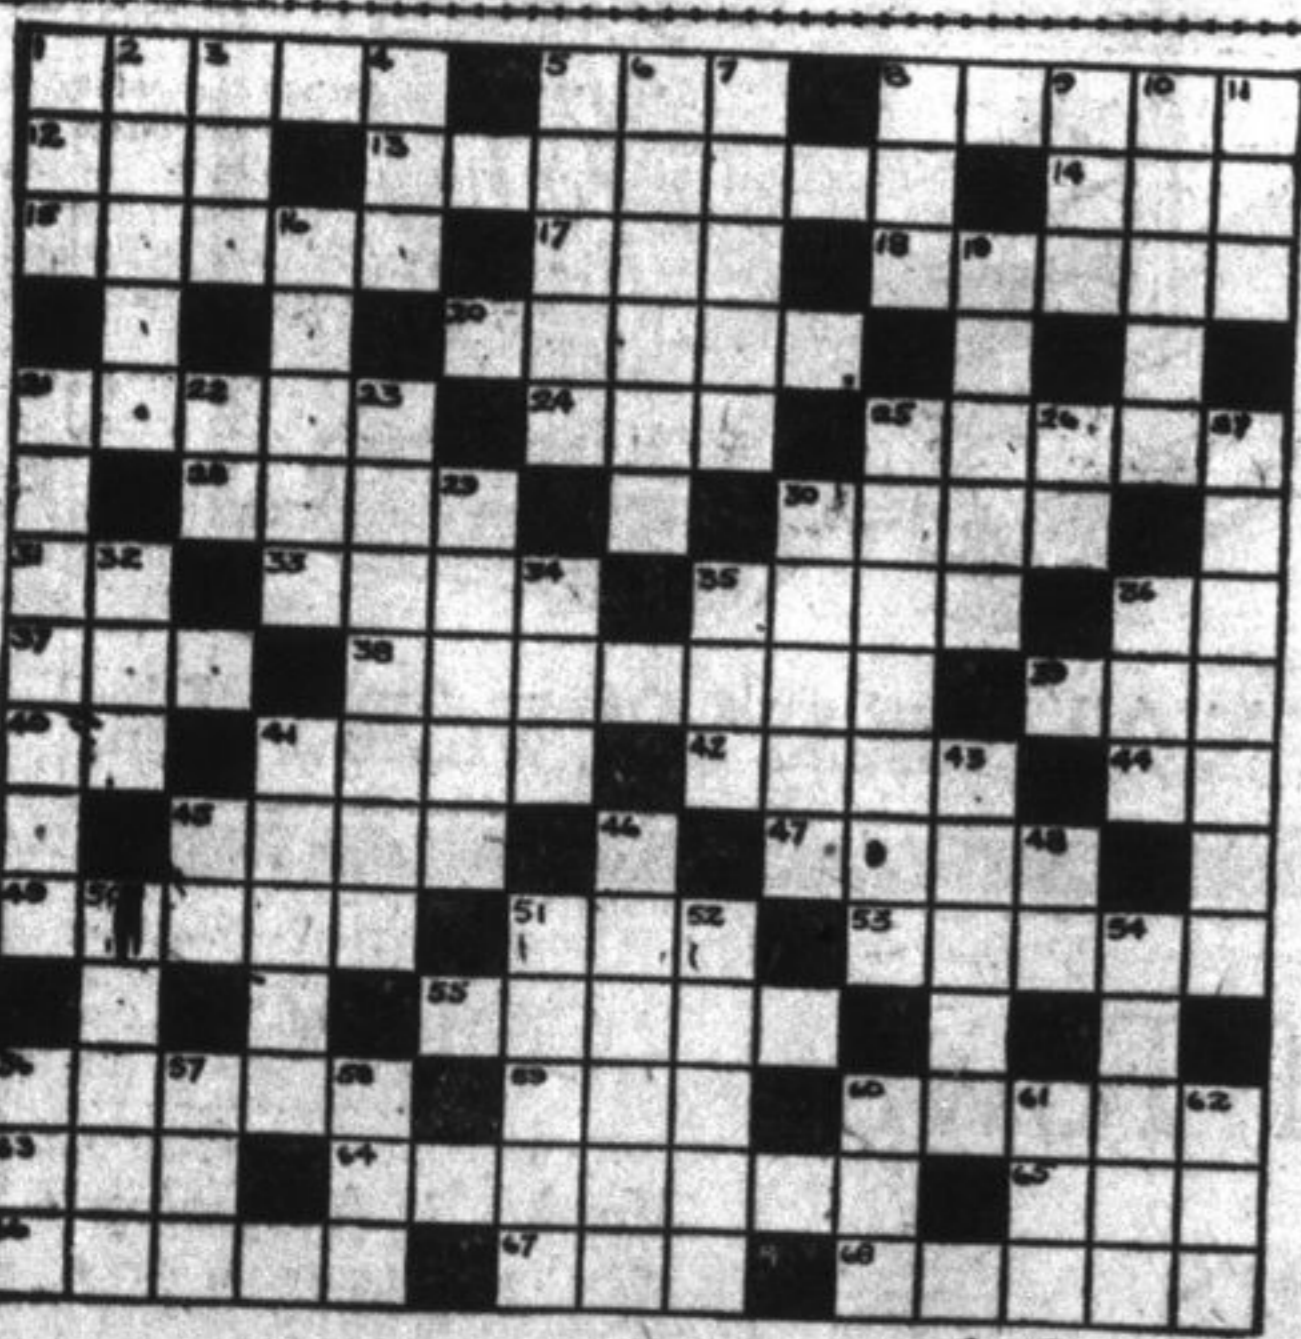

One can, says the Commercial Motor (London, Eng.), feel a certain sympathy with the principle of a mu-

nicipality providing an essential service such as transport of people, because in theory, that service is as vital to the community as the supply of water or electric power and the provision and operation of a drainage system. Such services must be continued whether they pay or not, and if they cannot, for one reason or another, be made to pay, the local rates may fairly be drawn up to meet any deficiency.

The country, as it happens, has been well served in the past by the large bus concerns, continuity of

services having been maintained on unprofitable routes because it has been recognized that, in this way, good-will is built up and traffic is encouraged to develop. In very many cases it would be extremely unwise for a municipality to compete with such services, where they are adequate to public requirements, nor is it fair to adopt a policy of repression, by way of a refusal of licenses, where a local desire has arisen to appropriate to the public authority a business which has been built up by private enterprise.

CROSS-WORD PUZZLE

4-10

There's only one new word in this puzzle, and chemists should get it without trouble. For those who aren't chemically inclined, the unkeyed letter is given.

- Horizontal.
1. Thin piece of wood.
2. Rodeo.
3. Starting bar of a machine.
12. Sea eagle.
13. Mean.
14. Stir.

4-24
Answer to Friday's Crossword Puzzle.

15. Dogma.
17. Pine tree.
18. Invigorating medicine.
20. To change a ring setting.
21. Common viper.
24. Scarlet.
25. Lets it stand (printing).
28. Foretoken.
30. Stalk of a plant.
31. Toward.
33. Twelve months.
35. To float.
36. 3,1416.
37. Wrath.
38. Columbium, a metallic element of steel gray color. (Unkeyed letter "h.")
39. Cyst.
40. Second note in scale.
41. To pierce.
42. To migrate (chiefly South Africa).
44. Inspired with reverential fear.
47. Frozen rain.
48. Act of objecting.
51. To waver.
53. A great quantity.
55. To creep.
56. To be on the border.
59. English coin.
60. Sugary.

63. Eon.
64. External part.
65. Beer.
66. Patterns.
67. Rooster's wife.
68. More evil.

Vertical.

1. To place.
2. To take particular course.
3. Hotel.
4. Shrub used by Arabs for a beverage.
5. To allude.
6. Gota up.
7. Weighed to determine net weight of container.
8. To allow.
9. Truck used for moving furniture.
10. Decree.
11. Large fabulous bird.
16. Foo.
19. Opposite of inner.
21. Dressed.
23. To fare.
23. To come in again.
25. Parts of flower necessary for fertilization.
26. Printer's measure.
27. Round stick used to hold yarn.
29. Fresh water mussel, also a nymph.

57. Corded cloth.
58. Goddess of dawn.
60. To work with needle and thread.
61. Organ of hearing.
63. Small mound of earth on golf course.

Recorder Miles, of North Bergen, N.J., when filming a seventeen-year-old girl motorist, said that women drivers are incompetent and unfit to operate automobiles. Of the 3,000 girls who were helped last year by the Girls' Service League of New York, one-third were run-aways attracted by the hope of becoming film stars.

LITTLE KNOWN BITS OF CANADIAN HISTORY

By Lyman R. Jackson.

EXPLORATION IN THE FAR NORTH.

We do not know the names of the first Europeans to visit the far northern areas of this continent during the era of exploration that opened with the Cabots in 1497. That there were such visitors is very clear from maps and charts that guided Henry Hudson in the formulation of plans for his first voyage in 1607. To Hudson, however, the honor and credit must be given for the proper joining up of

Hudson turned adrift.

these isolated discoveries. In all he made four voyages to the far north. Three of these were made under English patronage and one under the flag of Holland. They were all made with a view of finding the much sought for passages to China and Japan.

The end of the fourth voyage in the spring of 1611 is one of the darkest tragedies in our early history. Hudson entered the bay that bears his name in the month of August, 1610, and wintered in the southwest corner of James Bay. When the ice broke up he had a violent quarrel with a young man named Henry Greene. Hudson had befriended this young fellow in many ways, and had taken him aboard to share in the honors of any discoveries that might be made. Greene incited the crew to put the leader and eight others who were

sick, into a small boat and cast them adrift without provisions. The remaining members of the crew then made for England, but in going out of the Bay they had an encounter with the Eskimos in which Greene was killed with others. Those who reached England were thrown into prison and to this day no tidings or relics have ever been found of Henry Hudson.

The Hudson and James Bays were next explored by a navigator named Pere Albalan, of whom little is known, in the year 1672, and it was not until 1719 that northern exploration was again seriously taken up. In that year the Hudson Bay Company commenced a series of expeditions to find the phantom North-west passage. The first of these was on the Albany, a frigate commanded by Captain George Berkeley. After the ship left England she was never heard of again. In the same year the Prosperous sailed from Fort York on the Hudson Bay, and returned a year later without being able to break through the ice. In 1721 two more vessels put out and one was lost. Four other expeditions were fitted out until 1737, when the company gave up this exploration work in despair.

The next great discoverer of the north started out from Montreal there to compete with the Hudson Bay Company, and in 1787 they sent Alexander Mackenzie out. He pushed on and on until he came to Great Slave Lake and discovered the vast north-flowing river that bears his name.

The name of Franklin is closely associated in the public mind with the disaster that overcame his expedition which sailed from England in 1845. His two previous overland journeys to the north are not so well understood. On the second of these he passed through southern Ontario and was a distinguished visitor to the little capital of Upper Canada en route. He followed the trail of Mackenzie and reached the Arctic by means of that great river of the same name. The first important and accurate survey work in the far north was done

during this expedition. Over twelve hundred miles of coast line were mapped, and it was for this work that he received his knighthood in 1829. All these expeditions were undertaken with a view of finding the North-west passage to the Orient.

SALES OF PROPERTY.

Have Been Made at Hartington and Neighborhood.

Hartington, April 23.—Wesley Babcock has bought the Lake estate. Daniel Freeman sold his village property to Benjamin Villabock yesterday. J. Goslin, Beaverton, was called to visit his mother, Mrs. J. Goslin, who is seriously ill at her daughter's, Mrs. Ray Babcock, Hillford. Ella Smith is ill with pneumonia.

The teachers and students have returned to their various schools after the holidays. Oscar Campbell, New Liskard, visited his uncle this week. Mrs. Arthur Smith is sick also. Mrs. M. Albertson. No service in the Methodist church on Sunday owing to the big snow storm which blocked the roads for cars but it is gone. Seeding has been retarded.

Death of An Old Resident.

Tweed, April 24.—One of the oldest residents of Hungerford passed away on April 17th, in the person of Charles Rush, in his seventy-third year. The funeral was held on Sunday to St. Edmund's church, Stoco. The six sons acted

pared to discuss them fully at the various sessions of the convention. The important topic of who shall pay for the roads, linked with which is the question of traffic control, will be one of the main subjects scheduled for discussion, while another will be the problem of dust elimination on gravel roads.

Jacob Cabel, 107, oldest resident of Butler County, Pa., is dead. His father lived to be 103, and his mother 101.

Pottsville, Pa., rules that a married man can kiss any woman provided the woman kissed has no objections.

Railway Age estimates supply of coal in storage in the U.S., April 1st, at about 24,000,000 tons less than a year ago.

70-NIGHT prepare for a good to-morrow

There will be a marked difference in your feelings, and in your ways, if to-night you will seek the aid of Beecham's Pills.

This thoroughly tried, time-tested family remedy will not disappoint those who use it, correcting the mistakes made in eating and living. Beecham's Pills tone the stomach, stir the liver and regulate the bowels. They clear the system of the impurities which do mischief and cause suffering. To feel and look in better condition.

TAKE BEECHAM'S PILLS
