FACTS ABOUT TEA SERIES—No. 8

The Consumption of Tea

Tea as a beverage is used in nearly every country in the world. It is estimated over 200 billion cups are consumed annually. Australia leads in tea drinking with an annual per capita consumption of about nine pounds, which means that every Australian consumes from six to eight cups of tea every day. The consumption per capita in England is 8½ lbs., and in Canada nearly 5 lbs. In the United States, it is less than 1 lb., but this is largely because Americans have not been able to get fine teas until comparatively recently. "SALADA" is considered one of the choicest blends on the market, and is the largest selling tea in either United States or Canada.
