The Home Garden
What is Home without a Garden?

ASTERS AND THEIR TROUBLES.
Stem rot and root aphid are other pests. Lime or wood ashes applied to the soil at planting time avoid these troubles and copious doses of tobacco tea or nicotine solution poured about the roots of the plants will destroy the aphid.

Insect pests, which work above ground, are more easily controlled. The aster beetle comes in August. Plant later types and this pest is eluded. Black or Brown aphid, which often infest the asters may be dislodged with tobacco tea, dust, or nicotine solutions sprayed on the plants. They are easy to control.

Lime the soil two weeks before setting out the plants, enough hydrated lime or pulverized limestone to give it a light coating like a light snow, rake it in lightly, and then give bone meal when the asters are set out and success is likely. The pests need not deter anyone from growing asters. If you had yellow last year, plant the asters in a different soil this year.

The twin shingle saves both Time and Money

THE Twin shape of Bird's Asphalt Shingles has made them known as the one man, one hand shingle. Each Twin Shingle though covering double the area may be laid as easily as an ordinary shingle, without extra motion and in the same time, and requiring but two thirds the quantity of nails.

And what is more—Bird's Asphalt Twin Shingles are fire-safe and weather-proof, yet cost no more than ordinary shingles. Their permanent non-fading colors, Red, Green or Blue-Black, will lend charm to any building.

The Twin shape "two shingles in one," is an exclusive Bird feature—not made by any other manufacturer.
Bird & Son Limited—Hamilton, Ont. and Port Rouge, Que.

The Charge.

The attorney was setting up illiteracy as a defence for his client, accused of forgery. "Why, your honor," he argued, "this man could not have been guilty of this crime; he cannot write his own name."
"Your argument is worthless," said the judge. "The prisoner is not charged with writing his own name, but that of someone else."
