crimes. Whether or not it serves as try in Canada were as follows: a check on those who are disposed to kill will, like the fundamental issue, be a matter for dispute. The difficulty is in bringing positive proofs to bear on either side of the argument. We are not, however, likely to make a change in Canada. OUT-OF-TOWN REPRESENTATIVES:

SEEKING A WAY OUT.

If internal pressure can do it. United States will soon be beside other nations in an organized effor to preserve the peace of the world. Quite recently twenty-six leaders of peace groups presented a plan to President Coolidge for the entry of that country into the proposed new World Court. The essential features You never find true religion and of that plan are contained in the following two clauses and subclauses of the proposal:

> "The immediate adherence of the United States to the Court Protocol, with the Harding-Hughes-Coolidge reservations.

"Within two years after the adherence by the United States to the Court Protocol, the signatories thereto, including the United States Government, shall formally declare by appropriate Governmental action their endorsement of the following basic principles of the outlawry of war, and shall call an international conference of all civilized nations for the purpose of making a general treaty embodying these principles:

"(a) War between nations shall be outlawed as an institution for the settlement of international controversies by making it a crime under the law of nations. (The question of self-defence against attack or invasion is not involved or affected.)

"(b) A code of international law of peace, based upon the outlawing of war and upon equality and justice between all nations, great and small, shall be formulated and adopted.

"(c) When war is outlawed the Permanent Court of International Justice shall be granted affirmative jurisdiction over international fined in the code and arising under

The purpose of these peace advocates in making the foregoing proposals will be obvious to any one who has followed the course of events across the border. The Permanent Court of International Justice is not fundamentally different from the League of Nations. If there Hopkins Research Laboratory for is any difference at all it is more in the label than in purpose. But the elimination from it of certain im-United States, for reasons having purities, will be received as good more to do with domestic policies news by the medical fraternity as than anything else, declined to enter | well as by sufferers from diabetes. the League of Nations. In so doing, It will also bring to mind the fact that country committed herself as that this specific was discovered by a being opposed to certain articles in young Canadian, Dr. Banting, to To qualify for an honorary degree the constitution of the League; and, whom Parliament at its last session you must show some evidence that while those reasons were neither granted a life pension of \$5,000 per you can get the school into the head- strong nor unanswerable, national annum. > Milch cows 3,726,985 Other cattle 5,733,851 Sheep 2.684,743 Swine 5,069,181 Poultry 47,538,130

As compared with 1920, there were increases in milch cows, swine and poultry. The growth was largest in the last named, and amounted to 57 per cent. The falling off in other cattle, from 6.067.504 to 5. 733,851, has been due in some measure to the lower demand for beef following the war. The increase in swine, from 3,516,587 to 5,069,181, is attributable to a better market abroad for pork and pork products.

It is, however, by looking at some of the collateral aspects of our live stock possessions that we get a glimpse of what they mean in the trade of the country. In 1923 we produced 162,834,608 pounds of \$56,873,510. Factory cheese in that year amounted to 151,624,376 pounds, valued at \$28,645,192. The butter and cheese industry is growing. The prairie provinces have taken up dairying, and thus far have found it a valuable adjunct to grain life. These habits once well estab-

trade situation when we find that for the fiscal year 1924 our exports of live cattle had a value of \$10,852. 558. At the same time we shipped abroad 108,865,800 pounds of pork, valued at \$19,492,258. Beef had a total of 20,577,400 pounds. Our bacon and hams are commanding the market in Great Britain, and it is conceded that we have during the past twenty years improved their quality. That is vital to further development.

The domestic market is, of course, of greater value to the raisers of live stock than is the foreign. The cities and towns of the Dominion are large consumers of meats, dairy products and eggs. They also require an enormous supply of milk. Our farmers probably realize what this marthan formerly; and out of that understanding should come hearty and cheerful co-operation in all that makes for the common good.

ard Bridge where first blood was shed during the War of 1812-14-July 24th, 1812." Some days earlier, however, General Hull, who in anticipation of the Declaration of War, had been moving his troops towards the frontiers of Canada, had crossed the Detroit River; and taken possession of Sandwich. But the British at Fort Malcolm had received the news two days before he did, and had quietly made a prize of an American packet of "Cuyahoga," capturing the crew, soldiers and passengers on board as prisoners of war. One of these kept a journal. which has been lately published. with notes, and according to the latter, the six Americans, under Major Denny, slain in the fight which took place with a body of Indians at the Canard Bridge, were the first to fall in the struggle, though there had been several previous skirmishes.

By James W. Barton, M.D.

Deserving A Medal. The superintendent of a Tubercugestion that is startling. It is that every cured patient should be awarded a medal, as a reward for the heroic fight he has put up with his dread ailment.

I would like to suggest that every cured patient that stays cured, should be awarded an extra bar to show that he is continuing his fight successfully.

Anyone who has watched the patient struggle of these unfortunates. will admit that it takes all the willpower, determination, to affect the cure. It is so easy when one is so weak and tired to fail to observe all creamery butter, having a value of the little rules that enter into the fight. The exact time for rest, for food, for light exercise, for temperature taking, for fresh air, all demand constant watchfulness and painstaking effort.

And what is thus created? Simply real sensible everyday habits of lished, become a veritable guide to We get a further grasp of the the patient not only during his stay in the sanatorium, but for the rest

A recent writer has well said "Zy forming good habits one places himself in the hands of an automatic policeman, who unconsicously determines his course of life."

And so your tubercular patient not only has this automatic policeman to guide him, but the habits he learned at the sanatorium are so much a part of his life, that he spreads the good news about his home, and about his neighborhood, so that all unconsciously are benefited. Now your body is very much like a machine and it needs care and attention at regular times. It is easy to establish proper habits of daily life insofar as rest, sleep, eating, and so forth are concerned, and it is likewise easy to establish irregular habits.

The whole matter is with your ket at their door means; and yet will. You will to obey the policethere would appear to be times when man or to defy him. Chauncey Decontroversies between sovereign they overlook it. Be that as it may, pew, now past ninety, tells us that the fact of interdependence between he enjoys life so much because he town and country is probably better "wills to observe the common sense rules of diet and health." Eating what his policeman tells him has always been good for him or agreed with him, getting the rest the policeman says is necessary, and occupying his mind likewise as his policeman -good habits-have taught him.

We shouldn't have to go to a sanatorium to learn how to take care of ourselves.

Wallace Havelock Robb

"Go and get the Bird-man, girls, quick!" yelled one of the campfire girls, at a summer camp where I had been asked to do some nature work. Naturally, there was some excitement. This girl claimed she had been up to the well to get a drink and that half a dozen wild turkeys were spreading their tails and were "just as tame as anybeyond me: I just ran with the others and prepared for the worst.

When we arrived at a point not far from the well (which was really a mountain stream with a barrel in it for collecting the water), we saw the supposed wild turkeys. They were partridge, known also as Birch Partridge and Ruffed Grouse. The partridge with feathers on, looks about the same size as a turkey dressed and on the table. I suppose the strutting and tail spreading resembled turkey manners. At any rate, what the girls took for wild turkeys, were partridge.

Since almost anyone may run into wild partridge, up in Muskoka, or Parry Sound, or North Hastings, or Kawartha Lakes, or any Canadian lake and woods district, a few remarks about the bird may be help-A few years ago Essex Historical ful.
