

A High Tariff Will Greatly Increase the Cost of Living in Canada

Woman Fears For Family Market Basket

This election is going to be decided by the women's vote, for there are more women than men voters' names on the Kingston lists. And the women are going to see to it that the mistake of December, 1921, is not repeated in October, 1925. They are going to make sure of the election of Mr. John M. Campbell, the Liberal candidate, so that Kingston will have as its member a supporter of the King Government, which is assured of being returned to power, according to reports coming in from all over the country. Here is what one woman, who last time voted for Dr. Ross, says:

"I am going to vote for Mr. Campbell in this election because I have become convinced that a high protection tariff would be very bad for Canada. I cannot see it in any other way. There is not the slightest doubt in my mind that our agricultural industry would be given a black eye if high protection was adopted. And I am also sure that the family market basket would suffer, for what else could result from a high tariff in this country than dearer produce? We women do not want to see the necessities of life costing more. Prices now are reasonable all round, and let them at least remain at that and not go higher. A dollar can buy a fair amount of produce now.

"Another thing that I fear if Canada adopted a higher tariff and barred out the products of other countries would be that the United States would retaliate and put an export duty on coal. We in Ontario have to depend largely upon American anthracite coal to keep warm in winter, and it would be suicidal to take any chances of having the anthracite supply cut off.

"You may have thought that I would vote for Dr. Ross because of family political traditions, but I do not like his leader's protection policy, and that is why I must vote for Mr. Campbell."

THE PREMIER TELLS ABOUT THE TARIFF

To Further Greatest Good to the Greatest Number.

THE GREAT QUESTION

Of the Unity of the Country Is the Greatest of All, Says Mr. King.

London, Ont., Oct. 17.—"We wish to work injury to none," exclaimed Premier King last night, outlining the Government's policy on the tariff.

"We want to further as far as we can the greatest good of the greatest number."

Mr. King described the working of the proposed tariff revision board.

"We purpose as we take up the tariff, to take it up in light of the advice given to us by the board. That advice will be available to the Government. It will be available to Parliament. We feel that, guided by this experience and advice, we should be able to work out such a modification of the tariff as may be necessary, either in the way of raising it in some places and lowering it in others, to give us what we need in the way of revenue and also to give our industries what they need in the way of safeguarding them against unfair competition from other parts of the world."

"I have only one message to give, that is that beneath all policies more fundamental than all questions of administration, is the great question of the unity of the country, unity between all parts of the Dominion and how best that unity may be maintained."

The tariff issue, Mr. King thought, might have been left altogether out of account in this contest.

Conference Ended In Blaze of Glory

Locarno, Oct. 17.—Europe's security conference ended early this morning, literally in a blaze of glory.

Throughout the night there were fireworks, music and dancing to commemorate the initialing of the pacts which the Allied and German statesmen have formulated with the idea of a new Europe arising from the old slough of discord.

OSLERS TO PLAY

With the Cleveland Shale Brick Team on Saturday.

Toronto, Oct. 17.—All arrangements have been completed by the Oslers Baseball Club to bring the Cleveland Shale Brick team of Cleveland here to-day for a contest to determine possession of the Barney Penock Shield. The Cleveland team are amateur baseball champions of the United States and are practically the same squad that represented the Baner's of Cleveland here several seasons ago. It has been decided to play at Hampden Park. At two o'clock the teams met in an exhibition with "Irish" Rason pitching for Oslers. At 3:30 the championship game takes place and it was likely that Spring would twirl for Oslers.

ROBBERS SENTENCED

To Eight Years and To Get Twenty Lashes.

Nanaimo, B.C., Oct. 17.—Pleading guilty to the robbery of \$42,000 from the Nanaimo branch of the Royal Bank of Canada on Dec. 12th last, Edward Gorman, T. H. Castro and T. H. Johnson were late yesterday afternoon sentenced to terms of eight years in penitentiary and twenty lashes each by Magistrate H. Bever-Potts.

A CANARD NAILED

A story has been circulated to the effect that the Frontenac Floor and Wall Tile Co., Limited, which was dormant during the Meighen regime, and is now running full time, will close its doors if the Mackenzie King Administration is again returned to power. This statement has been emphatically denied by Mr. Townsend, the manager of the company. It is a signpost of the imagination of some enthusiastic Conservative worker.

TWELVE KILLED BY RAILWAY COLLISION.

Bressana, Italy, Oct. 17.—Twelve persons were killed and twenty injured yesterday when a freight train crashed into a passenger train bound from Milan for Genoa. The victims were mostly peasants.

Fifty Convicts Are Given a Three Weeks' Holiday

London, Oct. 17.—Fifty convicts at Maidstone jail were given three weeks' holiday in the Isle of Wight as a reward for good conduct. They were lodged at the Camp Hill penal establishment, where they did only light work during their vacation, and where they were in the midst of the beauties of Parkhurst forest.

BISHOP FALLON MAY BE HONORED BY POPE

Claim Bishop of London Diocese Will Be Created Cardinal if Two Named.

London, Ont., Oct. 17.—Intimation from Quebec that Pope Pius XI is likely to name two Canadian cardinals early in December, prompted Sir Philip Pocock, prominent member of St. Peter's Cathedral parish, Wednesday, to reiterate his opinion, expressed three months ago, following the death of Cardinal Beign, Quebec, that Rt. Rev. Michael F. Fallon, D.D., bishop of London, should be honored by the gift of the red hat.

"Should two cardinals be appointed," observed Mr. Pocock, "it is more than likely that one would be French-speaking, as have been all previous Canadian cardinals, and that the other would be English-speaking. Appointments of this nature would not be made in any competitive sense, but rather following out the diplomatic policy of the Roman Catholic church, in doing its utmost to recognize outstanding services among the different groups which make up the entire body of the church."

"And thus as the second of two cardinals," concluded Mr. Pocock, "no priest could be more deserving or more capable of discharging the duties of such an high office than Bishop Fallon, who as bishop of the diocese of London, has rendered signal service to the church, particularly along educational lines."

His Grace Mr. Emard, archbishop of Ottawa, is mentioned as a probable cardinal for the Dominion.

REV. MR. FEE MAY NAME A SUBSTITUTE

To Conduct Service for Presbyterians in St. John's Church, Pittsburgh.

Toronto, Oct. 17.—Mr. Justice Logie this morning, on motion of the non-concurrents of St. John's Presbyterian Church of Pittsburgh township amended the order, which pending appeal as to the ownership of church property, provided for the use of the church on alternate Sundays by both sections of the congregation. When this modus vivendi was originally arranged, it was provided that non-concurrent services should be conducted by Rev. W. M. Fee, minister of the Continuing Presbyterian church, but on a recent Sunday Mr. Fee was unable to attend and the services were conducted by his nominee. Objection was taken to this by the unionists, on the ground that the court order specifically provided for Mr. Fee to conduct the services and no one else.

Mr. Justice Logie's amendment provides for the non-concurrent services being conducted by the nominee of Mr. Fee as well as by Mr. Fee in person.

R. S. Robertson, on behalf of the trustees of the church opposed the motion, on the ground that Mr. Justice Logie had no jurisdiction to amend the order of Mr. Justice Hodgins, who first prepared this modus vivendi.

Terrific wind storm swept over four counties, says despatch from Louisville, Ky., severely injuring twelve persons, one fatally.

Four robbers held up plant of International Harvester Company, Chicago, and escaped with \$50,000. Affairs of British Empire exhibition at Wembley are to be placed in the hands of liquidators.

Ottawa reports show that employment situation in Canada continues to improve.

A GUARANTEE OF 75 PATIENTS FOR MOWAT

Made By the Hon. Dr. S. H. Beland, Minister of D.S.C.R., to John M. Campbell, President of the Kingston Health Association.

On Friday afternoon Mr. John M. Campbell, newly-elected president of the Kingston Health Association, received the following telegram from Hon. Dr. H. S. Beland, Minister of Soldiers' Re-Establishment:

"Quebec, Que., Oct. 16.

"Am instructing D.M.S. to make arrangements for seventy-five patients for Mowat Sanatorium. (Signed) "H. S. Beland."

This means that the future of the Mowat Sanatorium is assured. It requires one hundred patients to adequately conduct this institution, and now that the Minister of Soldiers' Re-Establishment has guaranteed that the Dominion Government will place seventy-five soldier patients in the Mowat, the Kingston Health Association has had a big burden lifted from it. Enough other patients from the district can be secured to make up one hundred at any time.

The Mowat Sanatorium means a great deal to Kingston, as \$110,000 is expended there each year. There is a large staff attached to the institution, and the merchants of Kingston benefit greatly.

Mr. Campbell, who was elected president of the Health Association on Wednesday, immediately got in touch with Hon. Dr. Beland, and the above guarantee of patients was forthcoming within forty-eight hours.

FRONTENAC WARD PROMISES J. M. CAMPBELL A BIG VOTE

Enthusiastic Meeting Held on Friday Evening—Lady Workers Pleased With the Prospects For the Liberal Candidate—No. 15 Expected to Roll Up Record Majority.

The Liberals of Frontenac ward held another of their enthusiastic and successful weekly meetings on Friday evening. The ward headquarters at the corner of Montreal and John streets was overcrowded, and many people assembled on the walk outside to listen to the proceedings. The chair was occupied by R. J. Allen, a sub-division chairman, who has done valiant service for the electors in this part of the city. He introduced a number of speakers, most of whom were workers in Frontenac ward, and they one and all testified to the growing popularity of the Liberal cause and to Mr. J. M. Campbell's splendid chances of an overwhelming victory.

Among those who addressed the gathering were T. Doolan, of the Canadian Locomotive Co. staff; Ald. Joyce, Ald. Dunphy, Norman Davy, J. McGuire, Ex-Ald. H. F. Norman, Mrs. C. Walker, Lemman A. Guild, past president of the Liberal Association, and others. Ald. Joyce reported on the result of the canvass that had been in progress in the ward, and was most optimistic in his conclusions. This ward had done splendidly in past elections, but there was every indication that its record this year would be better still. No. 15 sub-division would roll up the biggest majority ever given to a Liberal candidate.

Mrs. Walker reported for the ladies, and the same note of healthy optimism pervaded her remarks. The ward had been thoroughly organized, and the lady workers were well pleased with the prospects.

Mr. Guild brought greetings from the general association, and spoke cheerfully of the local situation as viewed by those who were in a position to know and judge. There was, he stated, no doubt concerning Mr. Campbell's election. The Mowat Hospital would not in this time be closed before 3 p.m. as it was in the last federal election, and the result would be a far different story. Dr. Ross's control of the situation was a thing of the past. Mr. Guild touched upon the tariff question, showing that a moderate customs tariff worked for the benefit of the people as a whole, rather than for the favored few who under high protection, could enrich themselves at the expense of the workers. He expressed the opinion that neither the prairie provinces in the west nor the maritime provinces in the east would support the higher tariff platform of Hon. Arthur Meighen and his party; they realized that tariff was only another name for tax, and they were heartily behind Premier King in his efforts to reduce taxation.

Chairman Allen, on being called upon by the meeting, told of a recent conversation with a prominent Conservative lawyer, who in the course of a business discussion, related that conditions in the rural districts were growing rapidly better. More money had come into his office during the past two months, in payment of notes and mortgages, than he had seen in a long time, thus showing conclusively that the farmers were once more enjoying a good measure of prosperity. A government under which the agricultural workers can liquidate their debts is deserving of the support of the people. Frontenac Ward's weekly meeting was brought to a close with the singing of the national anthem, and with three rousing cheers for King and Campbell.

Mr. Meighen and His Progressive Opponent Speak From Same Platform Friday Night

Lundar, Man., Oct. 11.—Right McKewen Oliver order on freight rates.

Hon. Arthur Meighen and Harry Leader, Progressive, two candidates for the federal seat of Portage la Prairie, met on the same platform last night in a tiny hall in Lundar. The Conservative leader had been billed to speak here as well as Mr. Leader, and when it was learned that only one hall was available the two contestants agreed to a joint meeting.

Mr. Leader spoke first, attacking Mr. Meighen's attitude toward the

Richardson Laboratory and Douglas Block of General Hospital Opened

Dedication by Principal Taylor of Queen's to Mercy and Healing—Addresses by Col. Kent, Dr. J. C. Connell, Chairman—H. C. Nickle, Mayor Angrove and Hon. W. F. Nickle.

Another great step forward in medical training and in the work of healing and ministering to the sick, was taken on Friday afternoon when the Richardson Laboratory and the Douglas Block of the Kingston General Hospital were thrown open to the public. A very large number of people were present during the afternoon and made an inspection of the buildings, which are complete in every way and will add very materially to the equipment of the medical faculty of Queen's university and to the General Hospital.

The front part of the building is the Richardson pathological laboratory while the rear part is the clinical building. This building has direct access to the main building of the hospital and will prove of inestimable value.

Lt.-Col. R. E. Kent presided at the formal opening, and on the platform with him were: Mayor Angrove, Dr. R. Bruce Taylor, Hon. W. F. Nickle, K.C., Hugh C. Nickle, Dr. J. G. Fitzgerald (Toronto), Dr. J. C. Connell, Dr. W. T. Connell and Mr. Elmer Davis.

A Proud Day.

The chairman said that it was a very proud day for the hospital and he felt very proud at presiding at the meeting to formally open the fine building which was the consummation of an aim which had been worked toward for many years. The main object was to procure more accommodation for the public ward patients. The Board of Governors had started at the service building, and had worked up until they could use a building of the proportions and equipped as fully as the one they now had in the Douglas Block and the Richardson Laboratory.

At this point Dr. Taylor, principal of Queen's university, dedicated the buildings to mercy and healing in the name of the Great Healer of men's bodies and men's spirits, Jesus Christ.

Col. Kent called on Dr. J. C. Connell, dean of the faculty of medicine at Queen's university, to give an outline of the history of the Kingston General Hospital.

Began Ten Years Ago.

The movement which culminates to-day in this happy function, began ten years ago. Dr. James Douglas, then chancellor of the university, was interested in medical education and was paying the salaries of professors in Guy's Hospital in London, England, and in the Memorial Hospital of New York. It was he who provided the first radium used in these hospitals. It was my good fortune to secure his interest in this hospital. I wish to emphasize that this interest was educational rather than compassionate. Indeed, whatever has come to this hospital recently in the way of buildings, has come because of its association with Queen's University. This association is not only of material value—it is a better hospital in every way because of the teaching here. It is beyond question that it is to the general advantage of the patients to be cared for in a teaching hospital.

"Dr. Douglas made the scheme possible by a generous subscription of \$100,000," continued the speaker. "Before it could be spent \$20,000 interest had accumulated. Acting upon his advice, hospital architects were asked to make a survey and general plans. Messrs. Stevens & Lee, who were then chosen, have been in charge throughout and have brought to us their long and varied experience in hospital construction. When the first survey was completed and presented to the Board, the Great War was at its height and it became necessary to postpone action. In 1920 the work was resumed and to-day we see around us the results achieved so far. Already in use are the service building, the heating plant, the laundry, the isolation unit and the addition of private rooms to the Empire wing."

BURIED IN THE SAND FOR FIVE MINUTES

Leon Currier Victim at Cornwall—It is Expected He Will Recover.

Cornwall, Oct. 16.—To be buried under a platform for five minutes, with about three-quarters of a car of sand on top of him, and come out alive, was the experience today of Leon Currier, a young man employed by Mr. Dore, who is doing contract work for the Howard Smith Paper Mills here. The contractor was getting ready for a clay pit near his heater room and the car of sand was being unloaded on a platform. Men were bracing it better to stand the weight, when the platform collapsed. Currier was at about the centre of the platform when it gave way, and got the full weight of the sand. The other workmen got out safely and worked with men from the mill in shovelling Currier out. He was given first aid by Thomas Williams, of the mill staff, while Dr. Hamilton and an ambulance were sent for. The man was hurried to the Hotel Dieu Hospital, where he received treatment, and it is expected he will recover.

Urges Embargo on Nickel

Toronto, Oct. 17.—Declaring that the control of Canadian nickel has passed completely out of Canada, Norman McEachern, president of the Central Liberal Association here and one of the two Liberal candidates contesting the riding of Toronto South, urges an embargo on nickel and other mineral products in order to stimulate their conversion into finished articles in Canada.

HIGHWAYMEN TRIED TO HOLD UP AUTO

Mr. and Mrs. Lorne McAvay, Gananoque, Did Not Stop for Them.

Gananoque, Oct. 17.—Mr. and Mrs. Lorne McAvay, when motoring down the road between here and Lansdowne, had quite an exciting experience when two men attempted to hold them up. Jumping out in the middle of the road one of them pointed what was supposedly a gun, and demanded them to stop, but Mr. McAvay took the chance and stepped on the gas instead forcing both of the men into the ditch. Mrs. McAvay was quite ill from the shock yesterday.

Canadian War Aviator Gets French Cross

Paris, Oct. 16.—Major W. J. Susan, of Ottawa, Ont., in command of the Sherifienne escadrille, 37 regiments of aviators, French air forces in the Moroccan war, has been awarded a colonial cross and received laudable mention in despatches for the valiant services of the Canadian ace in fighting the Riflians.

New York police arrested woman and seven men as leaders of band of criminals responsible for many crimes, including murder and robberies over period of six years.

With Chinese sailors threatening to bombard Tsing Tse and with Chinese soldiers bringing up artillery to oppose his threat, British and United States residents of Shantung took refuge in their consulates.

"How has it all been possible?" asked the speaker. "First, by the generosity of the late Dr. Douglas. (Continued on Page 7)
