Wishing You A Happy New Year

THE CLUB, Men's Wear 3 Doors Below Grand Theatre

Addresses Given on the Foundation of Agriculture and the Value of Alfalfa.

Following the opening address by the president of the Eastern Ontario Dairymen's Association, on Wednesday morning, the following committees were appointed:

Resolutions -G. A. Gillespie, Alexander Hume, W. J. Newman, W. B Cochrane, J. Allison, A. Nicholson and J. F. Gibbons.

Nominating-James Sanderson, . Robertson, E. Campsall, W. A Edwards and Alexander McGrure. President Olmstead announced that the directors would be heard from and short addresses were given

Mr. E. Campsall, of Hartington stated that a better system of grading was needed. He deplored some actions that had been carried out in the past and hoped that there would be a remedy in the future.

G. A. Gillespie, of Peterboro, declared that his experience with graders was just the opposite of that of Mr. Campsall's. He had got along thousands of cattle at the outskirts well with the graders and had found of the city and drives them through their judgment to be good af times. He referred to the absence of the streets. The steers stampede, wreck stores, terrorize the populace Mr. Ward, who had attended the first and disrupt traffic. Mr. Burgess was heartily in favor of the practice of prize giving to

timulate greater interest and create teener competition among the producers for the best grades. Mr. A. Wilson, of Leeds, advocated that cheese made in the winter

months, No. 1 be given a score of 90 and that cheese made in summer months or winter months be given a mark showing during which season Mr. Burgess replied, stating that

this question would be taken up as

one of the points of his address to-

Mr. J. A. Campbell, of Dundas, praised President Olmstead and stated that great appreciation was felt for the way he was carrying on his duties. He said that the "soft pedal" should not be put on anything and advocated that the factories that were always in the best condition should be given the prizes, not the ones that made a last minute splurge during the prize-awarding time. He

was proud of the majority of factories in Dundas, but said that some of them were quite bad yet. He said that there was work yet for the Dairy Standards Act people to do out in Dundas. It should be the aim of the Eastern Ontario Dairymen's Association to bring about these re-

"The foundation of agriculture Mr. Alliston, of Vankleek Hill, the soil. The four corner stones of stated that he was greatly pleased at the edifice of successful agriculture the large attendance and declared are, namely, crops, livestock, man-

"We may think of the soil as th were so many small factories in his munity of farmers. No permanent progress can be made in farming if the fertility of the soil is not main tained. Therefore, if we look upon the soil as the basis of all of farm business, we build upon sure and solid foundation.

"The proper management of so demands three things: Weed cor trol, maintenance of fertility and pro duction of suitable and economical feeds, for live stock. There is little by a palatable feed which is rich in Thompson, Corbyville. excuse for weedy farms, or run-down farms, in Eastern Ontario. Short rotations of crops, enormously increasing the amount of clovers, particularly alfalfa and sweet clover the proper handling of manure, and the wise use of supplementary fertilizers, will help solve this problem in farming which we will have before us for all time.

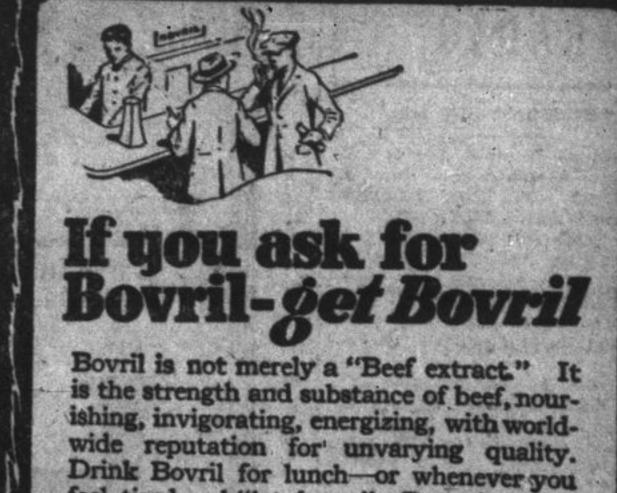

"Some widely grown crops are no the most profitable. As the illustration let me refer to the oat erop, our most widely grown cereal crop Ontario. A study of provincial more profitable crop to grow. It will out-yield oats in pounds per acre. reliable crop to grow, not being so oats. Other crops which should be used more widely by the dairy farmer are alfalfa and sweet clover. The day of timothy hay on dairy farms should be past.

"Then, referring to live stockstructure. Many look upon live-stock as the most important department of the farm. That is an erroneous view point. Live stock provides means to an end In your dairy herd. economically utilize the crops which you have spent money and time

"The third corner stone is that of business management. Farmer hould view their farm operations not merely as an occupation by which they hope to make a living which capital and labor are utilized or the ultimate purpose of making profit. Is there any good reason time, adjust our farm managemen so that corn slisge, the most widely grown but expensive feed for dairy cattle, cannot be, to a great extent replaced by sweet clover. By reducing the cost of such staple feeds as wall ilage we are surely in a position to widen the margin between cost and | Westpor selling price of our dairy produce.

"Finally, the man himself as part of the great structure of agriculture. Surely if any man needs good judgment, business enterprise an extensive general knowledge, and | Westport unfailing optimism and enthusiasm. it is the modern farmer. Upon the ston, Lindsay individual farmer more than upor
