DISCUSSES QUESTION OF JUVENILE COURT

Mrs. A. L. Clark Gives Much Information to the Rotary Club.

Mrs. A. L. Clark of this city addressed the Rotary Club on Friday touching on the subject of a juvenile court for Kingston. Mrs. Clark brought much information to the club on this much-discussed question and was given a most sympathetic hearing throughout. A report by the joint committee from the Rotary and Kiwanis clubs was read, setting out the results of the investigation of this committee into the advisability of establishing a juvenile court here. The report was favorable to the project, and estimated the cost of operation at \$2,000 per year without the judge's salary, as it was thought that a suitable person could be secured to act as judge gratis. Mr. Cliff Reynolds, who read the report, said that he thought \$1,500 would be sufficient and speaking later in the meeting he reduced this estimate to \$1,000.

Kiwanian Hugh C. Nickle and R. H. Fair were present and Mr. Nickle put up a number of the new weekly passes which the street railway company has issued, to be drawn for by the Rotarians.

Mrs. Clark, in speaking on the subject of the juvenile court, said that she considered it a very important question and that the child welfare workers in the city needed the support of a juvenile court. The court would be regularly constituted under the attorney-general's department and would deal with delinquents under the age of sixteen. Mrs. Clark said the definition of a delinquent child was a child that was not a criminal but one misguided and misled by the environment in which he lives. The speaker contended that there was no suitable machinery now in operation in the city capable of dealing with this class of child and getting at the root of the trouble—the environment of the home.

Mrs. Clark declared that the most important part of the juvenile court was the citizens' committee which was appointed and was given a certain authority. This committee, she believed, could do much good work among the delinquents and especially among wayward girls. Mrs. Clark paid tribute to the work of the chief of police and Rev. Father Coyle were trying to do among the boys by following up cases after they were disposed of by the police court, but she said that no adequate effort was being made on behalf of the girls.

Another point brought out by the speaker was that there was at the present time no proper place in the city where delinquents, when apprehended, could be detained. As a consequence, they were allowed to go home and sometimes, after admitting their guilt to the police, they denied it in court. The juvenile court provided for suitable detention quarters, she said. In addition to dealing with all cases where juveniles are concerned this court also deals with all adults who are an accessory or are contributory to the delinquency of a child.

Mr. R. H. Fair stressed many of the points made by Mrs. Clark and said that the committee of the Kiwanis club had been trying to do some work among the boys of the city but had found their hands tied from lack of any authority.

The report of the joint committee of the Rotary and Kiwanis brought out the fact that the Orphans' Home had offered quarters to the court if it was gone through with, but the cost of fixing up a suitable room in the Orphans' Home would be about \$283.

It was moved by Rotarians Mac Thomas and Gilbert Caldwell that the Kingston Rotary Club go on record as being in favor of the establishing of a juvenile court in this city. The motion carried unanimously.

TOURIST ASSOCIATION SEEKING ASSISTANCE

Dr. W. W. Sands, Director, Submits Report to Civic Industries Committee.

At a meeting of the Industries Committee on Thursday, Dr. W. W. Sands, who is a director of the Ontario Tourists' Association, made a report as to the directors' meeting held in Toronto, Dec. 28th. This meeting was held for organization purposes. Information was given that Ontario has been very backward in forming a Tourists' Association, as for some time past Switzerland, Florida, California, Quebec, Nova Scotia, New Brunswick and British Columbia were experiencing large returns from the efforts of their associations.

A meeting of the heads of Departments interested in Motor Leagues, Board of Trades and other citizens took the initial step in April last, and a meeting was held in November, 1925, when the officers and board of directors were appointed. Business concerns desirous of increasing the demand for their products advertise in a market available by salesmen, posters, or magazines, newspaper advertising or the securing of satisfied customers, and this applied to Ontario means, Ontario is for sale as a district for touring and recreation, and in order to do this, the Ontario Tourists' Association was brought into existence. The magnitude of this project may be seen from the figures that 1,342,742 American automobiles entered the Province of Ontario through sixteen ports of entry during last year, to stay from one to 30 days, and the tourist traffic of this province by motor, rail and water, an industry amounted to \$40,000,000. The tourist traffic of the Dominion is now third on the list as an actual business industry, the grain industry being first and pulpwood and paper second, and we are told that this industry is just beginning.

Budget for Season.

A meeting of the directors was held in Toronto on Dec. 28th to prepare a programme and budget for the coming season. The budget asked for amounts to \$20,000, obtainable from municipalities, boards of trade, motor clubs, hotels, corporations, counties and individuals. It was decided to divide the province into districts. This district will include the Counties of Frontenac, Lanark, Leeds and Grenville. An office will be opened in each of these districts, and for this district it will be located in the office of the Secretary of the Board of Trade, Bank of Commerce building.

The Ontario Tourists' Association are seeking the co-operation and assistance of the local organization already carrying on this work, and do not intend to interfere with the good work they are doing, which to a great extent would be of an overlapping kind. This Association will use all the monies collected for the purpose of advertising Ontario in other countries, especially the United States, as the "Tourist Paradise." It will be their object to bring the tourist into Ontario, and asks the other local organizations from each district to take care of them after they are here. It is, therefore, very important that each local municipality start early and make special preparations for this tourist traffic which is sure to come.

To Equip Offices.

The Association will equip these district offices with all books, pamphlets, road maps, etc., required for the information of the tourist. As a great many of these tourists put up at tourists camps it is very important that a first-class motor camp be maintained here with all the requirements connected with it.

The Ontario Government is lending its assistance to this association by supplementing the advertising with booklets and other pamphlets. The Government will also provide free accommodation for head office.

Our Big Inauguration Sale TO-NIGHT

\$1.75 OPERA STYLE VESTS, \$1.25

for the Association, and assist financially by giving 30 per cent. of the contributions up to \$5,000. The Government will also lend the Association the assistance of a Government official.

Dr. Sands said it would be well for the people of this district to remember that in obtaining benefits from this great traffic we will be rewarded to a great extent by the amount of interest and energy we put into it, and this is the season of the year to lay plans for the coming tourist season.

Yellow Lights Hit.

Yellow lights have no place in our traffic signaling system because between 2 and 3 per cent. of our male population is color-blind, in the accepted interpretation of the term, says Dr. Knight Dunlap, professor of experimental psychology at the Johns Hopkins University.

SLOW DRIVER A MENACE ON THE HIGHWAYS

"A slow car on the highway is the greatest menace there is," says Robbins E. Stoeckel, commissioner of motor vehicles for Connecticut. Stoeckel advocates a minimum speed regulation to keep all slow cars off the highway.

The greatest danger from slow driving autos is that those who drive behind are forced to pass around the side and in congested districts this practice is dangerous and often results in accidents.

Stoeckel's plan is to divide the main traveled streets into routes and each street have a minimum speed limit and an anti-passing restriction.

This will prevent the accidents which are caused by one car passing around another and will also speed up traffic.

Manufacturers of commercial automobiles will be forced to build speedier cars in order to get the best service from the machines, for all of the slow-moving, bulky trucks now built would be assigned to the slow thoroughfares, according to Stoeckel's routing plan.

Gasoline tax now effective in forty-four states, was originated in the state of Oregon in 1916.

HOMES

January, the Resolution Month

Resolve to buy a home for yourself. I will help you. Many terms. Pay like rent. You have before you a wonderful year in a wonderful country.

What the World Is Doing
(As Seen by Popular Mechanics Magazine)

Sewing Machine Ranks First of Farm Conveniences

Sewing machines were found to be the most popular labor-saving devices in a typical country neighborhood surveyed in Ohio. Eighty-eight out of a hundred families owned them, sixty-six had automobiles, sixty-three kitchen sinks, sixty-one oil or gas stoves, and fifty-five had washing machines. There were gas or electric irons in the homes of thirty-two, thirty-eight families had phonographs, twenty-two telephones, and twelve homes were equipped with bathtubs.

Keeping Mortar Warm

During the winter months a contractor, who was erecting a large apartment building, found it necessary to provide heat to prevent the mortar from freezing and to keep the workmen as warm as possible. Being pressed to meet the completion date, which made it necessary for the work to go on without an interruption, a large number of electric heaters were used as shown in the illustration. The mortar was placed directly in front of the heater and the workman, standing near by, was also kept warm. The heaters were placed in

Names of Garments Traced to Many Languages

Study of costume terms reveals that the names of many garments, like the articles themselves, have had an interesting history and date from early times. In fact, the word "costume" itself is the same as "custom"—that which is customarily worn. The "cap," for instance, is a relic of the old "cappa," a cape with a hood. When the cape fell into disuse, the name was shortened to apply only to that portion that went over the head. The hero of Burns' poem explains the "Tam O'Shanter," and the term "pajama" is of Hindoo derivation, the origin being "pajama" or leg clothing. "Coat" is from the Latin "cotta," a tunic; "jacket" sprang from "jaque," a short coat of mail and "jumpers" describe a garment which the wearer slips on, or into which he jumps.

The "knicker" of today recall the wide breeches first worn in America by Dutchmen, who were called "knickerbockers" by Washington Irving. "Skirt" is allied to "shirt"; a "petticoat," originally worn by men, was, in French, a "petit cote" or small coat; pinafone is a contraction of "naperon" or cloth. "Kilts" got their name because they are killed or tucked up; "frock" comes from the "froc" worn by French monks; "clog" was a wooden-soled shoe for use in mud, and "pumps" take their name from "pompe," a French word meaning ornament.

Ammonia Water Application for Spilled Battery Acid

Ammonia water, quickly applied, will prevent damage from acid that may be dropped while taking a hydrometer reading. This is a timely hint for all those who are using wet-cell storage batteries. A rubber mat or glass plate under the battery is always advised.

Auto Stile over Farmer's Fence Saves Opening of Gates

Where a country road passed through a farmer's field and two gates had to be opened and closed every time a car passed, which meant a considerable waste of time for the motorist, the stilt shown in the drawing was found quite a timesaver. Two runs of 2 by 8-in. boards served as tracks and pieces of 2 by 6-in. material were spiked on the sides to prevent the wheels from slipping off. The whole track is, of course, securely braced and mounted on posts set in the ground. The stilt makes it unnecessary to open and close the gates, and, besides, it is impossible for cattle to cross over on these tracks.

First Aid to Frozen Plants

In spite of all precautions plants sometimes freeze accidentally. The following first-aid tip has saved several. Sprinkle the plant liberally with acid water. Then, after half an hour, let warm air enter the room gradually, but under no conditions should the plant be brought into a heated room. The whole process of revival should be spread over a period of one to two hours.

THE VOICE FROM WOAW

The voice of the "sandman" that is heard from the studio of WOAW comes from the feminine throat of Val McLaughlin. Her gay little laugh and funny little yarns set thousands of toes giggling nightly as they sit in their mother's arms. She is shown before the "micro" holding a book from which she is reading a story to her thousands of child listeners.
