CLEANLINESS HELPS FIGHT SKIN DISEASE

By Dr. Hugh S. Cumming. Did you ever look upon the skin of a little baby, so clear and pink and think that perhaps in a few years that same face would be perhaps blotchy and marred by scars and pimples?

Acne is a skin eruption produced by inflammation of the sweat glands and hair follicles. Before there is any general eruption, there are likely to be blackheads. Pimples and blackheads constitute a very frequent skin condition as a result of the inflammation of the oil glands of the skin and a plugging up of the outlet of these glands.
