

DR. KNIGHT SPEAKS BEFORE ROTARY CLUB

Urges the Necessity of Co-operation to Improve the Fishing Conditions.

Declaring it to be a very conservative estimate, Dr. A. P. Knight, chairman of the Dominion Biological Board, while speaking at the Rotary luncheon in the British American Hotel, on Thursday, stated that eighty to ninety per cent. of the fry placed in the streams of Ontario by the Government in the last three or four years to be not worth "a continental cent" at the present time.

The chief reason why the fry died in the small streams was because they were starved for want of food. The body of water in which they were placed was not sufficiently large to feed them. The lack of food tended to keep them from breeding and thus their numbers diminished.

he had realized in 1919 what was the trouble with the fishing situation in Ontario, he had taken it up as a matter of special interest and had set to work to investigate and gather data.

Questioned by one of the members of the club as to the means of remedying the situation which confronted the province, Dr. Knight pointed out that there were three ways and they all must be contained in any programme along this line. The first method was to keep up the efficient method of breeding, which was being carried on in our hatcheries, and the speaker thought that there could be very little improvement there.

In winding up his plea for the support by the public of Mr. McCrea, Dr. Knight said, "If he is going to be successful in his efforts to improve the fishing situation, he won't force the law."

The speaker was tendered a hearty vote of thanks on motion of Rotarian Prof. G. Caldwell.

Announcement was made by the president, Rotarian Roy Ward that the District Governor would pay the local club a visit on Wednesday next.
