# Inside the Now

People didn't know about things in the Dark Ages. They didn't know what was in lightning, mines, trees, air, that with a little ingenuity would make an electric light, a watch, a high-grade soap, a radio. They didn't know how to go about to know things. They didn't have many things worth while to know.

To-day you have countless conveniences. You have all the facts you need to get hold of these conveniences. You have advertisements. Advertisements tell you frankly of wonders you can buy, where to buy them, how to recognize them, how to use them, how much to pay. By reading advertisements you can know what they will do for you before you spend one cent. How that lubricant will act in your own car. How that electric stove will lighten work in your own kitchen. Advertisements spread things before you so conveniently that almost by reaching out-you have them! You find them in any better store. Their prices low, because advertisements urge their use by thousands. Their values honest, because they are advertised as they are. The best you can buy, because what is widely advertised is what has survived harsh public test.

Don't let the Dark Ages touch any portion of your life. Use the advertisements. They surround you with Now.
