GAS IN THE STOMACH IS DANGEROUS

Recommends Daily Use of Magnesia to Overcome Trouble Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stomach accompanied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritis accompanied by serious stomach ulcers. Food ferments and sours, creating the distressing gas which distends the stomach and hampers the normal functions of the vital internal organs, often affecting the heart.

It is the worst of follies to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids. Instead get from any druggist a few ounces of Bisulphated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the best form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Stopped Her Hair Coming Out

Specialist Offers Simple Home Recipe to Stop Loss of Hair and Make It Grow Again. Men and women whose hair is thinning and coming out freely will be interested in the suggestion of a well-known hair specialist who says: "Anyone can easily and inexpensively make at home a recipe which, in my opinion, is unequalled for stopping loss of hair and making new hair grow out again thick, glossy and luxuriant. You get from any druggist 1/2 oz. of Bay Rum, 1 oz. of Lavone (or Camphor) and one-half dram of Menthol Crystals. Mix together and allow to stand over night before using. Rub thoroughly in to the scalp with the finger tips or a stiff brush. This prescription is perfectly harmless, acts quickly and neither dries out the hair nor makes it greasy. But ladies using it should be careful not to get it on the face or where hair is not desired."
